Psychiatric Response To Family Violence Identifying And Confronting Neglected Danger:

Psychiatric Response to Family Violence Edward W. Gondolf, 1990 **Health Care Ethics** Donald VanDeVeer, Tom Regan, 1987 **Case Studies in Family Violence** Robert T. Ammerman, Michel Hersen, 2012-12-06 Since the publication of the first edition in 1991 there has been substantial progress in our understanding of the etiology and associated features of domestic violence As in the first edition this book elucidates and highlights the complex multidisciplinary issues facing clinicians who work with family violence cases Each chapter combines two illustrative cases with a broader discussion of the issues that are encountered by clinicians working with families that engage in abuse or neglect **Gender Violence** Laura L. O'Toole, Jessica R. Schiffman, 1997-03 How gender and sexuality can be life threatening Though violence against women has received increasing attention from scholars and the general public alike much of the literature on the subject is scattered in monographs journals and books focusing on specific forms of gender violence In their path breaking anthology *Gender Violence Interdisciplinary Perspectives* editors Laura L O Toole and Jessica Schiffman have brought together central articles and authors to construct a remarkably broad understanding of the gender related manifestations of violence *Gender Violence* is composed of three sections one examining the roots of male violence and victimization of women another exploring forms of sexual coercion and violence and a third offering a number of perspectives on promoting nonviolence in the context of gender relations Chapters consider topics including sexual harassment rape children and gender violence battering in intimate relationships and pornography The list of contributors includes such diverse and well known scholars as Friedrich Engels bell hooks Diana Scully Harry Brod and Linda Gordon and poets such as Audre Lorde and Margaret Randall The book also contains a number of original pieces with novel approaches to subjects such as domestic violence and its effects on children With its interdisciplinary perspective and wide ranging subject matter *Gender Violence* is an excellent primary text as well as an invaluable reference for scholars in the field of women and violence **Family Violence and Religion** Volcano Press (Volcano, Calif.), 1995 *Program Evaluation and Family Violence Research* Sally K. Ward, David Finkelhor, 2014-05-22 Understand and evaluate family violence programs for your community Twenty years ago the major issue in creating interventions to prevent domestic violence was persuading the courts the funding agencies and society that domestic violence was a serious problem worthy of time trouble and money Now that the importance of domestic violence has been established we need safe and effective ways to evaluate those interventions to see which ones are working and how they can be improved *Program Evaluation and Family Violence Research* brings together some of the best minds in the field discussing such vital evaluation issues as policy implications alternative designs for evaluation studies and ethical concerns This comprehensive book approaches the vexed question of evaluation with compassion as well as scientific rigor Clearly traditional double blind studies and control groups are difficult to conduct when family violence is the subject it is ethically indefensible to sit back and watch abusers hurt their mates or children when interventions are available Yet finding usable

methods of program evaluation is also essential Program Evaluation and Family Violence Research confronts these questions and discusses practical ways to evaluate a variety of domestic violence programs Program Evaluation and Family Violence Research draws on years of experience to address the difficult questions raised including going beyond evaluating program effectiveness to analyze why and how interventions help change behavior creating new research designs to adapt to the unique concerns of the family violence field using meta analysis for program evaluation research determining the interaction between research and program results identifying barriers between community activists and social scientists that may impede research Program Evaluation and Family Violence Research offers fresh and creative ways to do program evaluations guarantee subjects physical and emotional safety and make good science humane Women at Risk Evan Stark, Anne Flitcraft, 1996-03-26 Women at Risk brilliantly recasts the debate about violence against women and makes a major contribution to feminist thinking about women s health Practitioners and theorists who want to understand women s health issues from a stunning new perspective must read this book Heidi Hartmann Ph D President Institute for Women s Policy Research Washington DC Women at Risk is a unique and important blend of research practice and advocacy This volume makes a significant contribution to the health care profession s understanding of violence against women This is a long awaited book by two major scholars and practitioners in the field of violence against women Richard J Gelles Ph D Director Family Violence Research Program University of Rhode Island Women at Risk is a thought provoking investigation of the violence that may bring women to emergency departments with injuries or suicide attempts It challenges assumptions that patriarchy causes violence against women and that women are passive victims And it dares to acknowledge violence by women It goes beyond a plea for awareness of violence and outlines steps that hospital staff can follow to identify care for and advocate for battered women Evan Stark and Anne Flitcraft strongly affirm the status of wife assault as a public health issue N Zoe Hilton Ph D Mental Health Center of Penetanguishene Ontario Filled with groundbreaking research Women at Risk challenges current explanations of domestic violence and argues that reframing health in terms of coercion and violence is key to the prevention of some of women s most vexing problems Presenting major findings of studies conducted over 15 years authors Evan Stark and Anne Flitcraft maintain that the medical psychiatric and behavioral problems exhibited by battered women stem from a so called dual trauma in which the coercive strategies used by their partners converge with discriminatory institutional practices This timely volume explores the theoretical perspectives as well as health consequences of woman abuse and considers clinical interventions to reduce the incidence of homicide child abuse substance abuse and female suicide attempts associated with battering In addition the authors progressively promote the notion of shelter not as a facility or service but as a political space to be opened within families communities and the economy a space where toleration for male coercion ends Medical professionals mental health practitioners social workers and researchers as well as advanced students in health psychology or the social sciences will find this compelling volume a thorough resource Theory &
