Psychiatric Hospital As A Small Society:

The Psychiatric Hospital as a Small Society William A. Caudill, 1958 **Psychiatric Ideologies and Institutions** Anselm L. Strauss, 2017-09-29 The authors of this volume point out that what is ordinarily termed the psychiatric hospital's social structure is principally derived from three sources: the number and kinds of professionals who work there; the treatment ideologies and professional identities of these professionals; and the relationships of the institution and its professionals to outside communities, both professional and lay. They describe hospitals as sites where ideological battles characterizing the mental health arena are being fought, implemented, critiqued, modified, and transformed. This classic monograph in medical sociology was originally published in the 1960s. The period studied was 1958 through 1963, when somatic and psychotherapeutic ideologies were flourishing as now, and milieu therapy was just emerging. The research team was multidisciplinary: three sociologists, one psychologist, and one psychiatrist. Three distinct psychiatric environments were researched: two at the Chicago State Hospital (chronic services and treatment services) and one at a private hospital. What evolved were thoughtful comparative analyses of hospitals, wards, professionals, ideological positions, careers, and organizational and situational placements.

Committee on Armed Services, 1958 **Handbook of Mental Health Administration and Management** William H. Reid, Stuart B. Silver, 2013-08-21 Clinicians who understand mental health care administration in addition to their clinical fields are likely to be valuable to the organizations in which they work. This handbook is an accessible source of information for professionals coming from either clinical or management backgrounds. Sections offer coverage in mental health administrative principles, mental health care management, business finance, and funding of care, information technology, human resources, and legal issues.

The Time of the Therapeutic Communities Liam Clarke, 2004 From the 1950s onwards, different movements have contributed to Therapeutic Communities (TCs). This book follows these post-war changes to the present day and discusses the influence they had on the practice of psychiatry. Providing a thorough analysis of the emergence and progression of TCs, this book is essential reading for anyone in the field.

Language for Those Who Have

Nothing Peter Good, 2001-01-31 The aim of *Language for those who have Nothing* is to think psychiatry through the writings of Mikhail Bakhtin Using the concepts of Dialogism and Polyphony the Carnival and the Chronotope a novel means of navigating the clinical landscape is developed Bakhtin offers language as a social phenomenon and one that is fully embodied Utterances are shown to be alive and enfolded and their meanings realised in the context of given social dimensions The organisation of this book corresponds with carnival practices of taking the high down to the low before replenishing its meaning anew Thus early discussions of official language and the chronotope become exposed to descending levels of analysis and emphasis Patients and practitioners are shown to occupy an entirely different spatio temporal topography These chronotopes have powerful borders and it is necessary to use the Carnival powers of cunning and deception in order to enter and to leave them The book provides an overview of practitioners who have attempted such transgression and the author records his own unnerving experience as a pseudopatient By exploring the context of psychiatry's unofficial voices its terminology jokes parodies and everyday narratives the clinical landscape is shown to rely heavily on unofficial dialogues in order to safeguard an official identity

Hearing Voices Katherine M. Boydell, H. Bruce Ferguson, 2012-08-07 Qualitative methods are increasingly useful as psychiatry shifts from a focus on symptom reduction to enabling people to live satisfying and meaningful lives It becomes important to achieve a deeper understanding of the ways in which mental illness interferes with everyday life and the ways in which people can learn to manage and minimize illness in order to pursue their lives as fully as possible Although qualitative methods in psychiatry have seen a dramatic upsurge relatively few published studies use such methods specifically to explore the lives socio culturally and experientially of those with first episode psychosis This book highlights qualitative research in early psychosis The first half of the book centres on the individual lived experience of psychosis from the perspective of the individual the family and the practitioner The second half moves from the micro level to the macro focusing on broader system issues including medical trainees encounters with first episode psychosis in the emergency room and the implementation of first episode clinics in the UK and Australia This text is timely as the proliferation of early psychosis clinics worldwide demands that we inquire into the subjective experience of those impacted by psychosis and the social contexts within which it occurs and is lived out *Hearing Voices* is the first in a series of titles from The Community Health Systems

Resource Group at The Hospital for Sick Children This series will educate researchers policy makers students practitioners and interested stakeholders on such topics as early intervention in psychosis aggressive behaviour problems eating related disorders and marginalized youth in educational contexts
