Psychiatry A Personal View:

A Short Introduction to Psychiatry Linda Gask, 2004-08-20 *A Short Introduction to Psychiatry* is designed to give readers a clear picture of the profession of psychiatry as it is today as well as an understanding of the subject from which to develop further study. The author describes the development of the profession, the route to qualification and the scope of contemporary practice including the work done by psychiatrists in a range of specialisms from child psychiatry to addiction services and forensic psychiatry. Drawing on the experience of people who have been through psychiatric treatment, the book also explores what psychiatry is like from the patient's user's perspective. Many criticisms have been levelled against the profession and the author Linda Gask summarizes key debates which have been and continue to be played out between psychiatry's critics and its defenders. *A Short Introduction to Psychiatry* is for anyone looking into psychiatry for the first time whether with a view to training or out of more general interest.

Fighting for Mental Health N. Sartorius, 2002-08-22 As Director of the Division of Mental Health at the World Health Organization and subsequently President of the World Psychiatric Association, Norman Sartorius has over many

years been in a position to survey the state of psychiatry worldwide and to campaign for greater equity and honesty in the clinical and research agenda The essays collected in this 2002 book represent his latest thinking as well as including his own selection from among a few of his innumerable speeches and previously published articles They range from trenchant critiques of mental health service delivery and prevention to more light hearted anecdotal pieces on the use of language and how to get things done All point to the core concerns for mental health programmes today definition of needs the role of psychiatry worldwide and the challenges that urbanization presents for mental health This is a book that every psychiatrist will wish to own

Healing Personal Psychology Jasenn Zaejian, 2012-07-10 The mental health professions are responsible for creating and maintaining a folie a deux or shared public delusion that their intention is to heal On close inspection we see that the primary function of mental health professionals is to serve as moral arbiters of human behavior The legislature has granted clinical psychology and psychiatry the legal rights to define certain behaviors as mental illness Behaviors are defined as mental illness by morally tinged personal clinical opinion Cleverly hidden from the public is the fact that the concept of mental illness has never been established by rigorous science to qualify as an illness or disease The concept of mental illness continues to be created or invented by selected moral judgments and committee discussions not science Healing Personal Psychology presents an historical line of development of psychology and psychiatry from its roots in 19th Century German authoritarianism and oppression to the present state of the field where little has changed The clinical gaze is the bedrock of the professions Therein lies the failure of the mental health professions to effectively heal Mainstream clinical psychology and psychiatry by their very natures engage in some of the most repressive practices in modern society Supporting the thesis of this failure with factual references we are taken on an experiential journey through the system to see the devastation mental health treatment has caused by the creation of disease including central nervous system motor neuron and organ diseases found in different studies to range between 10% 75% of all those treated Not to mention the personal ruin caused for millions of people every year by effectively eliminating their freedom of choice to engage in a pleasurable life existence Strategic change exercises effective in healing a range of serious difficulties are presented as a solution to this devastation Valuable resources for healing from surprising sources are illustrated with references for daily practice The author brings more than 30 years of experience to bear in pointing towards a healthy way out This book can be utilized by professionals and the public both as an instructive textbook on alternative healing approaches for psychosis depression anxiety fears phobias obsessive or compulsive behaviors trauma or post traumatic related difficulties and as a resource that documents the system of oppression and inconsistent level of competence in the clinical psychology and psychiatry professions

Key Debates in Psychiatric/Mental Health Nursing John R Cutcliffe, Martin Ward, 2006-10-12 This book is unique because no other psychiatric mental health nursing text has ever brought together opposing or contrasting views of the same issue and subsequently invited two separate chapters to be written in order to articulate the

different perspectives in the debate Further no book has then followed up such a wide and thorough discussion by inviting a third party to offer commentary The purpose of this book is to present a range of key issues that psychiatric mental health nurses face They are practice policy research and education related issues The purpose then is to present the most complete balanced arguments possible in order to inform educate and stimulate psychiatric mental health nurses Furthermore the purpose of the book is to make psychiatric mental health nurses more aware of the often uncertain nature of much of psychiatric mental health nursing practice and knowledge Psychiatric mental health nursing is not characterised by black and white easily delineated issues and is perhaps characterised by various shades of grey Indeed it is often stated as axiomatic that psychiatric mental health nurses can be described as a broad church Consequently the purpose of this book is to help psychiatric mental health nurses appreciate this broad church be able to understand the various shades of grey be able to understand that often there are differing views inconclusive arguments and contentious debates and for this to influence their clinical practice As the international range of contributors illustrates these debates to a greater or lesser extent are issues and debates that psychiatric mental health nurses face the world over these are matters of real international importance and significance These issues have been touched upon and to a limited extent debated at psychiatric mental health nursing conferences and to an even lesser extent within some psychiatric mental health nursing journals Thus they are real issues that many nurses are facing talking about and trying to resolve key debates are presented with arguments from opposing viewpoints followed by a third party commentary to give readers the necessary information to form their own view written by a range of international authors from different countries across three continents one of the first psychiatric mental health nursing books to explore the pedagogical value of debate

Seclusion and Mental Health

Ann Alty, Tom Mason, 2013-11-11 Seclusion as a concept is poorly understood and this is reflected in the literature on the topic particularly from nursing authors This has led to an emotionally charged altercation rather than academic debate both within the literature and at conferences But why bother learning about seclusion at all particularly as it is used less and less within mental health We would point out to those sceptical about the value of this book that seclusion is not only of interest as an intervention per se but is valuable in reflecting a shifting ethos within care For some reason seclusion has been neglected we believe that one reason is that it impinges upon widely held myths and beliefs within psychiatric practice Questioning about seclusion uncovers uncomfortable facts and assumptions concerning the values underpinning today's mental health care approaches Such uncomfortable questioning is often avoided for safer research pursuits Also we hold that this book is necessary in examining issues pertaining to seclusion practice There is a gap within nursing knowledge in so far as seclusion is concerned as our chapter on education upholds Yet inquiries and litigation have highlighted the fact that seclusion practice must be more clearly understood as an intervention At present such understanding is erratic and far from useful in providing a higher standard of care Practitioners need to make informed decisions regarding seclusion and this

book aims to provide the necessary information on which to base these decisions Making Mental Health Elizabeth Roberts-Pedersen, 2024-08-07 Making Mental Health A Critical History historicises mental health by examining the concept from the madness of the late nineteenth century to the changing ideas about its contemporary concerns and status It argues that a critical approach to the history of psychiatry and mental health shows them to constitute a dual clinical political project that gathered pace over the course of the twentieth century and continues to resonate in the present Drawing on scholarship across several areas of historical inquiry as well as historical and contemporary clinical literature the book uses a thematic approach to highlight decisive moments that demonstrate the stakes of this engagement in Anglo American contexts By tracing the unfinished history of institutions the search for cures for psychiatric distress the growing interest of the nation state in mental health the history of attempts to globalise psychiatry the controversies over the politics of diagnostic categories that erupted in the 1960s and 1970s and the history of theorising about the relationship between the psyche and the market the book offers a comprehensive account of the evolution of mental health into a commonplace concern Addressing key questions in the fields of history medical humanities and the social sciences as well as in the psychiatry disciplines themselves the book is an essential contribution to an ongoing conversation about mental distress and its meanings The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Mental Health in a Multi-Ethnic Society** Dr Suman Fernando, Dr, Dr Suman Fernando, Frank Keating, 2006-04-07 A thought provoking handbook for practitioners students and trainers in the mental health field Addresses controversial issues and offers revealing insights and intelligent suggestions for all those involved with mental health
