Teaching Psychiatry Linda Gask, Bulent Coskun, David A. Baron, 2011-04-08 In psychiatry as in all of medicine clinicians are frequently involved in training students and residents yet few have themselves been trained in pedagogy Improving the quality of psychiatric education should both improve the quality of psychiatric care and make the profession more attractive to medical students Written by a team of international experts with many years of experience this comprehensive text takes a globally relevant perspective on providing practical instruction and advice on all aspects of teaching psychiatry It covers learning from undergraduate and postgraduate level to primary medical and community settings enabling readers to find solutions to the problems they are facing and become aware of potential issues which they can anticipate and be prepared to address The book discusses curriculum development using examples from around the world in order to provide trainees with the basic attitudes knowledge and skills they require to practise psychiatry Features Instruction on developing a curriculum for Residency training teaching interviewing skills teaching psychotherapy and using new technology Innovative ways of engaging medical students in psychiatry and developing their interest in the specialty

including experience with new types of elective and research options and development of roles for students in patient care

S. Hale,1990-08-02 **Clinical Child Psychiatry** William M. Klykylo,Jerald Kay,2012-03-23 Clinical Child Psychiatry THIRD EDITION Making a psychiatric diagnosis in children can be challenging some clinicians say the incidence of some childhood disorders such as bipolar disorder and ADHD is over diagnosed while others say they are undiagnosed undertreated and are a large burden on society The drug treatment of child psychiatric disorders can also be controversial in children and adolescents This book fulfills the need for an objective clinically relevant source to dispel this confusion Clinical Child Psychiatry is a textbook of current clinical practice in child and adolescent psychiatry It is designed as a reference for clinicians that is both easily usable and authoritative a chairside reference for the consultation room This book addresses a defined series of clinical entities that represent the bulk of current treatment modalities and disorders encountered in 21st century practice It is authoritative in the areas addressed while at the same time being rapidly accessible in format To facilitate access it presents disorders in declining order of frequency The authors believe that worthwhile clinical work must be informed by both evidence based practice and by psychiatry s traditional attention to internal and interpersonal dynamics They are committed to an approach that is broadly biopsychosocial while based on current clinical evidence for a pragmatic clinical focus The book is divided into four sections The first Fundamentals of Child and Adolescent Psychiatric Practice addresses assessment treatment modalities and planning Common Child and Adolescent Psychiatric Disorders and Developmental Disorders cover the diagnosis and treatment of the large majority of disease entities encountered in practice The final section Special Problems in Child and Adolescent Psychiatry includes a variety of topics such as foster care and adoption loss and grief and forensics New evidence relating to the areas of depression psychosis trauma New insights from genetics genomics and proteomics cleverly integrated into chapters on the individual disease with focus on their clinical application New chapter on consultation and collaboration within systems of care The book addresses a need for clinicians many of whom are beginners non psychiatrists or psychiatrists entering unfamiliar territory to come up to speed rapidly in providing more than perfunctory service to needy populations This challenge grows ever greater **National Institutes of Health Annual Report of International Activities** John E.
