Psychiatry In The Practice Of Medicine:

Psychiatry in the Practice of Medicine Hoyle Leigh, 1983-01-01 **Professionalism in Psychiatry** Glen O.

Gabbard, Laura Weiss Roberts, Holly Crisp-Han, Valdesha Ball, Gabrielle Hobday, Funmilayo Rachal, 2012-09-24 Physicians and psychiatrists typically see themselves as true professionals. But in the past some displayed behavior far beneath the confines of professionalism including exploding at nurses, not returning calls or conducting insensitive interactions with patients that was usually tolerated and seldom disciplined. Today the rise of professionalism in medicine in general and psychiatry in particular has prompted a quiet revolution in how doctors are trained and how they are expected to behave in the workplace. The Accreditation Council for Graduate Medical Education (ACGME) has now advanced professionalism to be one of the core competencies all emerging practitioners must have. While almost all physicians believe in professionalism, the movement toward making it a core competency has challenged doctors everywhere to accept the practice of monitoring, observing, and assessing what is not always welcome in a field where autonomy is so highly valued. In *Professionalism in Psychiatry*, the authors identify and expand on professional behaviors such as being a good team player, being accountable, pursuing improvement in an ongoing way, and behaving compassionately toward patients and families. The importance of treating all co-workers with respect and of being attuned to the management of healthcare resources in a way that reflects fairness and integrity is also thoroughly reviewed. Important features of this book are: Tailoring professionalism principles from medicine to the unique features of psychiatry in order to enhance educators' teaching and improve the behaviors of psychiatrists and residents in the work setting; Development of guidelines for professionalism in cyberspace to provide psychiatrists with an ethical framework for dealing with patients in the online realm; Discussion of the ethical principles that apply when academic departments approach donors; Focus on cultural competency and empathy in an effort to improve patient care through greater understanding and sensitivity to ethnic, racial, gender, and sexual orientation issues encountered in clinical practice; Use of numerous clinical examples to articulate the new professionalism in psychiatry which illustrates the importance of going beyond one size fits all thinking. *Professionalism in Psychiatry* is an important contribution toward beginning to characterize the ever-evolving professional behaviors and clinical strategies of the contemporary psychiatrist and place them in a systematic framework.

Psychosomatic Medicine and Liaison Psychiatry Z.J. Lipowski, 2013-11-11 Men born to distinction do not always develop it in their homeland. Sometimes trans-plantation taps routes to hidden sources of concern for the embracing of novel concepts or the clarification of man's behavior, illuminating this understanding in the language of their adopted tongue. Such a one was Joseph Conrad, the Polish sailor whose new vision graced our literature long after his death in 1924. Such a one also is the author of this book, who was born in that same year to carry on his country's vigor and resourcefulness in our time. He is numbered among those distinguished emigres whose contributions to our culture and progress emanated from the trials and tribulations of the political upheavals, persecutions, and wars of Europe. Like many

others he has brought sound traditions and learning from his native land to enhance the new and less developed of what was only recently a frontier land Watersheds in world events impose themselves willy nilly on our lives One such time was 1946 when the author of this book left his native land and set out for the West He spent six months in London learning English and then moved to Ireland where he trained in medicine and also absorbed novel ways and a new culture including the writings of Swift and Joyce This young medical graduate's potential was soon recognized by his teacher in neurology at Belfast who with foresight predicted great accomplishment
