Psychiatry And Advanced Technologies:

Psychiatry and Advanced Technologies Luigi Ravizza,1993 *The Mental Health Professional and the New Technologies* Marlene M. Maheu,Myron L. Pulier, Frank H. Wilhelm, Joseph P. McMenamin, Nancy E. Brown-Connolly,2004-09-22 In the last two decades new communication technologies have dramatically changed the world in which mental health professionals and their patients live Developments such as e mail online chat groups Web pages search engines and electronic databases are directly or indirectly affecting most people s routines and expectations Other developments are poised to do so in the near future Already for example patients are acquiring both good and bad advice and information on the Web many expect to be able to reach their therapists by e mail And already there is pressure from third party payers for providers to submit claims electronically These technological breakthroughs have the potential to make mental health care more widely available and accessible affordable acceptable to patients and adaptable to special needs But many mental health professionals as well as those who train them are skeptical about integrating the new capabilities into their services and question the ethical and legal appropriateness of doing so Those unfamiliar with the technologies tend to be particularly doubtful How much e mail contact with patients should I encourage or permit and for what purposes Why should I set up a Web site and how do I do so and what should I put on it Should I refer patients to chat groups or Web based discussion forums Could video conferencing be a helpful tool in some cases and what is involved How do I avoid trouble if I dare to experiment with innovations And last but not least will the results of my experimentation be cost effective The book includes an extensive overview of legal and regulatory issues such as those raised by the Health Insurance Portability and Accountability Act HIPAA concrete technical ethical and managerial suggestions summarized in a seven step Online Consultation Risk Management model and how to resource lists and sample documents of use to beginners and experienced professionals alike For better or worse no mental health professional today can avoid confronting the issues presented by the new technologies *The Mental Health Professional and the New Technologies A Handbook for Practice Today* will enormously simplify the job of thinking through the issues and making clinically ethically and legally prudent decisions

Telepsychiatry and Health Technologies Peter Yellowlees, Jay H. Shore,2018-01-22 The only current book on the topic *Telepsychiatry and Health Technologies A Guide for Mental Health Professionals* is a practical comprehensive and evidence based guide to patient centered clinical care delivered in whole or in part by technological devices and applications Not a technology centered health informatics book but rather one that describes basic technological concerns and emphasizes clinical issues and workflows it is designed for psychiatrists psychologists and other mental health clinicians who seek to learn the modes models and methods of telepsychiatry More than 30 practitioners of telepsychiatry across the core mental health disciplines were involved in development of the text contributing knowledge and clinical examples Rich with case studies and hands on guidance the book introduces strategies then clearly illustrates how to put them into practice The

editors believe that psychiatry increasingly will focus on the treatment of populations and that technology offers the best hope of doing so efficiently and effectively Careful thought went into the book s conception and design resulting in a marriage of structure and content that meets the needs of today s clinicians The editors employed a unique process of manuscript development first outlining each chapter in its entirety then assigning sections to contributors selected for their specific clinical experience and therapeutic expertise The result is a text that flows logically and creates synergy across chapters without duplication The book provides how to guidance on setting up a new telepsychiatry practice or integrating technologies into a current practice covering critically important topics such as data collection security and electronic health records Technologies addressed include telephony smartphones apps e mail secure texting and videoconferencing all of which are increasingly being used in the assessment and treatment of patients with psychiatric disorders More than 30 case examples of patients or programs are included illustrating the range of clinical techniques that can be used and the types of patient that can be treated using available technologies whether in person online or in a hybrid form of care combining both modalities Every chapter concludes with a summary of major learning objectives or findings covered Telepsychiatry and Health Technologies A Guide for Mental Health Professionals is destined to become a core resource in the training of mental health professionals from all disciplines as well as an indispensable reference for those already integrating new technologies into their practices

New Directions in Forensic Psychology: Applying Neuropsychology, Biomarkers and Technology in Assessment & Intervention Joan E. Van Horn, Josanne van Dongen, Yvonne H. A. Bouman, Märta Wallinius, Patrice Renaud, 2024-10-23 New trends in research assessment and treatment are currently visible in the forensic field in three relatively separate areas the use of neuropsychology biomarkers and wearables and VR technology in forensic mental health These areas individually can make a valuable contribution to improving forensic assessments and treatment but combined they might even have a greater impact For example heart rate variability a biomarker can be visualized during Virtual Reality VR scenarios to increase patients insights into their physiological responses With our topic New Directions in Forensic Psychology Applying Neuropsychology Biomarkers and Technology in Assessment and Intervention we hope to offer more insight into the state of scientific developments in the aforementioned areas as they relate to forensic psychology As a result we hope to be able to pinpoint lacking knowledge and offer suggestions for further research
