Psychogenesis of Mental Disease C.G. Jung, 2014-12-05 Jung began his career as a psychiatrist in 1900 when he was twenty five as an assistant in the cantonal mental hospital and clinic of the University of Zurich It was only six years later

after he had become senior staff physician of the Burgholzi Hospital and an associate of Dr Eugene Bleuler that Jung wrote his famous monograph *On the Psychology of Dementia Praecox*. A A Brill has called this work indispensable for every student of psychiatry the work which firmly established Jung as a pioneer and scientific contributor to psychiatry Ernest Jones described it as a book that made history in psychiatry and extended many of Freud's ideas into the realm of the psychosis proper. An earlier translation by Dr Brill has been out of print for many years. This volume of the *Collected Works of C G Jung* now makes this key study in medical psychology again available in an entirely new translation by R F C Hull. Grouped together with it are nine other papers in psychiatry the earliest being *The Content of the Psychoses* written in 1908 when Jung was a leading member of the early psychoanalytical movement. The latest are two papers written in 1956 and 1958 which embody his conclusions after many years of experience in the psychotherapy of schizophrenia the term introduced by Professor Bleuler for dementia praecox. These studies reflect the original techniques especially associated with Jung's name.

Jung on Ignatius of Loyola's Spiritual Exercises C. G. Jung, 2025-07-29 Jung's lectures on the psychology of Jesuit spiritual practice unabridged in English for the first time. Between 1933 and 1941 C G Jung delivered a series of public lectures at the Swiss Federal Institute of Technology ETH in Zurich. Intended for a general audience these lectures addressed a broad range of topics from yoga and meditation to dream analysis and the psychology of alchemy. Here for the first time are Jung's complete lectures on Ignatius of Loyola's *Spiritual Exercises* delivered in the winter of 1939-1940. These illuminating lectures are the culmination of Jung's investigation into traditional forms of meditation and their parallels to his psychotherapeutic method of active imagination. Jung presents Loyola's exercises as the prime example of a Christian practice comparable to yoga and Eastern meditation and gives a psychological interpretation of the visions depicted in the saint's autobiographical writings. Offering a unique opportunity to encounter the brilliant psychologist as he shares his ideas with the general public the lectures reflect Jung's increasingly positive engagement with Roman Catholicism a development that would lead to his fruitful collaborations after the war with eminent Catholic theologians such as Victor White Bruno de J sus Marie and Hugo Rahner. Featuring an authoritative introduction by Martin Liebscher along with explanations of Jungian concepts and psychological terminology this splendid book provides an invaluable window on the evolution of Jung's thought and a vital key to understanding his later work.
