Unvarnishing Reality Derek C. Maus, 2012-10-15 Unvarnishing Reality draws original insight to the literature politics history and culture of the cold war by closely examining the themes and goals of American and Russian satirical fiction As Derek C Maus illustrates the paranoia of nuclear standoff provided a subversive storytelling mode for authors from both nations including Thomas Pynchon Robert Coover John Barth Walker Percy Don DeLillo Kurt Vonnegut Jr Vasily Aksyonov Yuz Aleshkovsky Alexander Zinoviev Vladimir Voinovich Fazil Iskander and Sasha Sokolov Maus surveys the background of each nation s culture language sociology politics and philosophy to map the foundation on which cold war satire was built By highlighting common themes of utopianism technology and propaganda Maus effectively shows the ultimate motive of satirists on both sides was to question the various forces contributing to the cold war and to expose the absurdity of the continuous tension that pulsed between the United States and the Soviet Union for nearly half a century Although cold war literature has been studied extensively few critics have focused so keenly on comparisons of satirical fictions by Russian and American writers that condemn and subvert the polarizing ideologies inherent in superpower rivalry Such a comparison reveals thematic and structural similarities that transcend specific national and cultural origins In considering these works together Maus locates a thoroughgoing humanistic refutation of the cold war and its operative doctrines as well as a range of proposed alternatives Just as the cold war combatants ultimately reconciled in 1991 with the fall of the Soviet Union Maus seeks to bring these two literary canons together now Their thematic scope transcends cultural differences and as Maus demonstrates these writers saw that there was not only the atomic bomb to fear but also the dangers of complete national militarization and the constant polarizing threat of emergency Thus their cold war critiques still resonate today and invite further comparative studies such as this one

Regimes of Historicity François Hartog, 2015-01-13 François Hartog explores crucial moments of change in society s regimes of historicity or its way of relating to the past present and future Inspired by Arendt Koselleck and Ricoeur Hartog analyzes a broad range of texts positioning the *The Odyssey* as a work on the threshold of a historical consciousness and then contrasting it against an investigation of the anthropologist Marshall Sahlins s concept of heroic history He tracks changing perspectives on time in Chateaubriand s *Historical Essay* and *Travels in America* and sets them alongside other writings from the French Revolution He revisits the insight of the French Annals School and situates

Pierre Nora's Realms of Memory within a history of heritage and our contemporary presentism. Our presentist present is by no means uniform or clear cut and it is experienced very differently depending on one's position in society. There are flows and acceleration but also what the sociologist Robert Castel calls the status of casual workers whose present is languishing before their very eyes and who have no past except in a complicated way especially in the case of immigrants, exiles and migrants and no real future since the temporality of plans and projects is denied them. Presentism is therefore experienced as either emancipation or enclosure in some cases with ever greater speed and mobility and in others by living from hand to mouth in a stagnating present. Hartog also accounts for the fact that the future is perceived as a threat and not a promise. We live in a time of catastrophe one he feels we have brought upon ourselves. *Beyond the People* Zoran Oklopčič, 2018

Beyond the People develops a provocative interdisciplinary and meta-theoretical critique of the idea of popular sovereignty. It asks simple but far-reaching questions: Can imagined communities or invented peoples ever be theorized without at the same time being re-imagined and re-invented anew? Can polemical concepts such as popular sovereignty or constituent power be theorized objectively? If as this book argues the answer to these questions is no, theorists who approach the figure of a sovereign people must acknowledge that their activity is inseparable from the practice of constituent imagination. Though widely accepted as important even vital for the development of political concepts, the social practice of imagination is almost always presumed to operate either historically or impersonally but seldom individually. Those who theorize the figures of popular sovereignty do not see that they are in effect conjurors of peoplehood. This book invites constitutional, international, normative and other political and legal theorists of sovereign peoplehood to embrace the conjuring side of their professional identities as a way of exploring the possibility of moving beyond eternally recurring insoluble and increasingly irrelevant questions. Instead of asking: Who is the people? What is the function of constituent power? Where may the people exercise its right to self-determination? *Beyond the People* asks the reader to consider the prospect of a riskier and more adventurous theoretical road that opens with the question: What do I as a theorist, imaginer or conjuror of peoplehood assume, anticipate and aspire to as I theorize the vehicles that mediate the assumptions, anticipations and aspirations of others? This question is examined throughout the book as it interrogates the idea of peoplehood beyond disciplinary boundaries, showing how polemical, visual, affective, conceptual and allegorical language critically shapes our idea of peoplehood. It offers a nuanced account of the contested relationship between the social imaginary of peoplehood on the ground and the imaginative practices of the professional conjurors of peoplehood in the academy. **Storying the Ecocatastrophe** Helena Duffy, Katarina Leppänen, 2024-05-31

How do writers and artists represent the climate catastrophe so that their works stir audiences to political action or at least raise their environmental awareness without however appearing didactic? *Storying the Ecocatastrophe* attempts to answer this question while interrogating the potential of narrative to become a viable political force. The collection of essays achieves this by examining the representational strategies and ideological goals of

contemporary cultural productions about climate change These productions have been created across different genres such as the traditional novel dance performance solarpunk economic report collage and space opera as well as across different languages and cultures The volume s twelve chapters demonstrate that rising temperatures erratic weather extinction of species depletion of resources and coastal erosion and flooding are an effect of our abusive relationship with nature They also show that our use of nuclear power extraction of natural resources and extensive farming including heavy reliance on pesticides intersect with intrahuman violence as fleshed out by heteropatriarchy racism neo colonialism and capitalism They finally argue that human activity has indirectly contributed to other contemporary crises namely the migrant crisis and the spread of contagious diseases such as Covid 19 Chapter 8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Tragedy of Property Maxim Trudolyubov,2018-08-16 Russian novels poetry and ballet put the country squarely in the European family of cultures and yet there is something different about this country especially in terms of its political culture What makes Russia different Maxim Trudolyubov uses private property as a lens to highlight the most important features that distinguish Russia as a political culture In many Western societies private property has acted as the private individual s bulwark against the state in Russia by contrast it has mostly been used by the authorities as a governance tool Nineteenth century Russian liberals did not consider property rights to be one of the civil causes worthy of defending Property was associated with serfdom and even after the emancipation of the serfs the institution of property was still seen as an attribute of retrograde aristocracy and oppressive government It was something to be destroyed and indeed it was in 1917 Ironically it was the Soviet Union that with the arrival of mass housing in the 1960s gave the concept of private ownership a good name After forced collectivization and mass urbanization people were yearning for a space of their own The collapse of the Soviet ideology allowed property to be called property but not all properties were equal You could own a flat but not an oil company which could be property on paper but not in reality This is why most Russian entrepreneurs register their businesses in offshore jurisdictions and park their money abroad This fresh and highly original perspective on Russian history will be of great interest to anyone who wants to understand Russia today Alexander Zinoviev as Writer and Thinker Philip Hanson,Michael Kirkwood,1988-06-18

The Afterlife of the 'Soviet Man' Gulnaz Sharafutdinova,2023-01-26 Almost three decades after the collapse of the Soviet Union today more often than ever global media and intellectuals rely on the concept of homo sovieticus to explain Russia s authoritarian ills Homo sovieticus or the Soviet man is understood to be a double thinking suspicious and fearful conformist with no morality an innate obedience to authority and no public demands they have been forged in the fires of the totalitarian conditions in which they find themselves But where did this concept come from What analytical and ideological pillars does it stand on What is at stake in

using this term today The Afterlife of the Soviet Man addresses all these questions and even explains why at least in its contemporary usage this concept should be abandoned altogether Alexander Zinoviev: An Introduction to His Work
