Tetlock, 2017-08-29 Since its original publication Expert Political Judgment by New York Times bestselling author Philip Tetlock has established itself as a contemporary classic in the literature on evaluating expert opinion Tetlock first discusses arguments about whether the world is too complex for people to find the tools to understand political phenomena let alone predict the future He evaluates predictions from experts in different fields comparing them to predictions by well informed laity or those based on simple extrapolation from current trends He goes on to analyze which styles of thinking are more successful in forecasting Classifying thinking styles using Isaiah Berlin s prototypes of the fox and the hedgehog Tetlock contends that the fox the thinker who knows many little things draws from an eclectic array of traditions and is better able to improvise in response to changing events is more successful in predicting the future than the hedgehog who knows one big thing toils devotedly within one tradition and imposes formulaic solutions on ill defined problems He notes a perversely inverse relationship between the best scientific indicators of good judgement and the qualities that the media most prizes in pundits the single minded determination required to prevail in ideological combat

Clearly written and impeccably researched the book fills a huge void in the literature on evaluating expert opinion It will appeal across many academic disciplines as well as to corporations seeking to develop standards for judging expert decision making Now with a new preface in which Tetlock discusses the latest research in the field the book explores what constitutes good judgment in predicting future events and looks at why experts are often wrong in their forecasts **John Chambers and the Cisco Way** John K. Tetlock,2025-06-23 Los fallos de inteligencia en torno a la invasi n de Irak ilustran dram ticamente la necesidad de desarrollar est ndares para evaluar la opini n de los expertos En este estudio Tetlock explora lo que constituye el buen juicio en la predicci n de acontecimientos futuros analizando por qu los pron sticos de los expertos son a menudo tan deficientes Durante m s de dos d cadas llev a cabo un registro que inclu a unos 82 000 pron sticos de 284 expertos El resultado Las predicciones fueron en promedio ligeramente m s acertadas que las suposiciones al azar pero el mercado de ideas no elimina a los malos expertos debido a que en parte no existe una rendici n de cuentas Bas ndose en la famosa distinci n entre zorros y erizos del fil sofo Isaiah Berlin Tetlock considera erizos a los expertos proclives a una visi n limitada y coherente del mundo desde firmes convicciones ideol gicas Los zorros sin embargo tienen la capacidad de ajustar sus opiniones son m s cautelosos pragm ticos tendientes a dudar de s mismos e inclinados a ver la complejidad y los matices Si bien no ofrecen grandes titulares y citas tienen probabilidades mucho mayores de acertar con sus conjeturas
