Nominal Classification Marcin Kilarski,2013-12-18 This book offers the first comprehensive survey of the study of gender and classifiers throughout the history of Western linguistics Based on an analysis of over 200 genetically and typologically diverse languages the author shows that these seemingly arbitrary and redundant categories play in fact a central role in the lexicon grammar and the organization of discourse As a result the often contradictory approaches to their functionality and semantic motivation encapsulate the evolving conceptions of such issues as cognitive and cultural correlates of linguistic structure the diverse functions of grammatical categories linguistic complexity agreement phenomena and the interplay between lexicon and grammar The combination of a typological and historiographic perspective adopted here allows the reader to appreciate the detail and insight of earlier supposedly prescientific accounts in light of the data now available and to examine contemporary discussions in the context of prevailing conceptions in the study of language at different points in its history since antiquity Bibliotheca Mexicana, Or, A Catalogue of the Library of Rare Books and Important Manuscripts Relating to Mexico and Other Parts of Spanish America José Fernando Ramírez,1880 **Bernard Quaritch** Bernard Quaritch (Firm),1876 *A General Catalogue of Books* Bernard Quaritch (Firm),1877 *New Catalogue of Misc. The generosity of these funding agencies was of course previously acknowledged in my respective Editor's Introductions to the two books mentioned but cannot be repeated too often without their welcome and timely assistance. Various spin offs were foreseen and some of them happily realized.

The Languages of Native North America Marianne Mithun, 2001-06-07

This book provides an authoritative survey of the several hundred languages indigenous to North America. These languages show tremendous genetic and typological diversity and offer numerous challenges to current linguistic theory. Part I of the book provides an overview of structural features of particular interest concentrating on those that are cross linguistically unusual or unusually well developed. These include syllable structure, vowel and consonant harmony, tone and sound symbolism, polysynthesis, the nature of roots and affixes, incorporation and morpheme order, case, grammatical distinctions of number, gender, shape, control, location, means, manner, time, empathy and evidence, and distinctions between nouns and verbs, predicates and arguments, and simple and complex sentences and special speech styles. Part II catalogues the languages by family, listing the location of each language, its genetic affiliation, number of speakers, major published literature, and structural highlights. Finally, there is a catalogue of languages that have evolved in contact situations.
