Radioactivity In The Environment Physicochemical Aspects And Applications Hardcover:

Radioactivity in the Environment Vlado Valkovic, 2000-09-26 Numerous sources of ionizing radiation can lead to human exposure natural sources nuclear explosions nuclear power generation use of radiation in medical industrial and research purposes and radiation emitting consumer products Before assessing the radiation dose to a population one requires a precise knowledge of the activity of a number of radionuclides The basis for the assessment of the dose to a population from a release of radioactivity to the environment the estimation of the potential clinical health effects due to the dose received and ultimately the implementation of countermeasures to protect the population is the measurement of radioactive contamination in the environment after the release It is the purpose of this book to present the facts about the presence of radionuclides in the environment natural and man made There is no aspect of radioactivity which has marked the passing century not mentioned or discussed in this book **Radioactivity in the environment**, 2000 Lead in Plants and the Environment

Dharmendra K. Gupta, Soumya Chatterjee, Clemens Walther, 2019-10-24 This book examines the way that lead enters the biosphere and the subsequent environmental impact The contributing authors include international experts who provide methods for assessing and characterizing the ecological risk of lead contamination of soil and plants Information is provided on the consequences for human health as a result of lead pollution This book reveals that approximately 98% of stable lead in the atmosphere originates from human activities Lead in Plants and the Environment reports on methods for detecting measuring and assessing the concentration of lead in plants The authors provide a method for the measurement of ^{210}Pb isotopes in plants This method can be applied extensively in different environmental settings not only as a way of revealing sources of lead but also as a way to monitor lead transport in plants and animals that ingest them The chapters include coverage on the following topics Lead bioavailability in the environment and its exposure and effects Radioanalytical methods for detecting and identifying trace concentrations of lead in the environment Lead contamination and its dynamics in soil plant systems Lead pollution monitoring and remediation through terrestrial plants in mesocosm constructed wetlands A review of phytoremediation of lead This book is a valuable resource to students academics researchers and environmental professionals doing field work on lead contamination throughout the world **Environmental Management Handbook,**
