The Railways of Bradford & Leeds Peter Waller, 2023-12-30 It was to the south west of Leeds that one of the key lines in the development of Britain's railway network the Middleton Railway established the principle of seeking parliamentary sanction for the construction of a new form of transport Five decades later in the early nineteenth century it was again the Middleton Railway that was at the forefront of the use of steam rather than animal power to move coal from colliery to market From the early 1830s through until the early years of the twentieth century the local railway network continued to expand indeed if it had not been for the outbreak of the First World War in 1914 the area would have played host to one of the last first generation main lines to be constructed with the Midland Railway planning and partially constructing a new main line north from Royston In the event the line was never completed consigning Bradford to be served by no more than glorified branch lines Providing a largely illustrated account to the history of the railway development of the area the book includes a fascinating selection of illustrations that focus on the evolution of the network in the almost eighty years since the end of the Second World War

Report on the Working of the Government Railways, Tramways, and Electricity Supply Western Australia. Dept. of Railways, 1925 *The Great Central Railway* John Palmer, 2021-01-30 Sets out to address what really happened through its LNER days and into British Railways custodianship A well researched and

presented to me Key Model World For generations of railway enthusiasts and more lately for social historians the life and times of the former Great Central Railway and in particular its extension towards London in the 1890s and closure seventy years later have generated considerable interest and controversy Although many books have been written about the Railway the majority in recent times have concentrated upon providing a photographic record and a nostalgic look in retrospect to what was generally perceived as happier times for the route None of the books have presented the outcome from thorough research into the business aspects of the Railway and its successive private LNER and public BR ownerships through war and peace and times of industrial social and political change that influenced and shaped the demand for a railway service While retaining a strong railway theme throughout the book identifies the role played by successive governments the electricity and coal industries and the effect of social change that together resulted in a case for closure The content of the book replaces much supposition with fact and places on record what really happened The final part of the book acknowledges the fine work over half a century of volunteers dedicated to saving a section of the line in Leicestershire A valuable addition to the social and political history of railways The Railway Correspondence and Travel Society *The Commercial Vehicle* ,1915 **Tramway and Railway World** ,1908 *The Commercial Car Journal* ,1924 **Railway Times** ,1913
