An Environmental History of Australian Rainforests until 1939 Warwick Frost, 2020-06-10 This book provides a comprehensive environmental history of how Australia's rainforests developed the influence of Aborigines and pioneers farmers and loggers and of efforts to protect rainforests to help us better understand current issues and debates surrounding their conservation and use While interest in rainforests and the movement for their conservation are often mistakenly portrayed as features of the last few decades the debate over human usage of rainforests stretches well back into the nineteenth century In the modern world rainforests are generally considered the most attractive of the ecosystems being seen as lush vibrant immense mysterious spiritual and romantic Rainforests hold a special place both providing a direct link to Gondwanaland and the dinosaurs and today being the home of endangered species and highly rich in biodiversity They are also a critical part of Australia's heritage Indeed large areas of Australian rainforests are now covered by World Heritage Listing However they also represent a dissonant heritage What exactly constitutes rainforest how it should be managed and used and how much should be protected are all issues which remain hotly contested Debates around rainforests are particularly dominated by the contradiction of competing views and uses seeing rainforests either as untapped resources for agriculture and forestry versus valuing and preserving them as attractive and sublime natural wonders Australia fits into this global story as a prime example but is also of interest for its aspects that are exceptional including the intensity of clearing at certain periods and for its place in the early development of national parks This book will be of great interest to students and scholars of Environmental History

Indians, Markets, and Rainforests Ricardo Godoy, 2001-08-01 This book addresses two important and related questions does participation in a market economy help or hurt indigenous peoples and how does it affect the conservation of tropical rainforest flora and fauna Oddly there have been few quantitative studies that have addressed these issues Ricardo Godoy s research takes an important step toward rectifying this oversight by investigating five different lowland Amerindian societies of tropical Latin America all of which are experiencing deep changes as they modernize Godoy examines the effect of markets on a broad range of areas including health conservation of flora and fauna leisure folk knowledge reciprocity and private time preference He concludes that contrary to considerable anthropological theory the effect of markets on the quality of life and the rainforest are often unclear or benign Godoy uses multivariate techniques to examine the changes modernization has had on many indicators of the quality of life and the environment and concludes that the seeds of socioeconomic differentiation may already lie dormant in simple economies The impact of modernization on lowland Amerindians is a topic of great concern to anthropologists researchers and policymakers in developing nations and this book is a significant contribution to the debate about the likely future of indigenous people
