Rainbow Trails Earlyday Adventures In Rainbow Bridge Country:

Rainbow Trails James E. Babbitt, 1990 *Navajo Land, Navajo Culture* Robert S. McPherson, 2003-01-01 In *Navajo Land Navajo Culture* Robert S. McPherson presents an intimate history of the Din or Navajo people of southeastern Utah. Moving beyond standard history by incorporating Native voices, the author shows how the Dine's culture and economy have both persisted and changed during the twentieth century. As the dominant white culture increasingly affected their worldview, these Navajos adjusted to change, took what they perceived as beneficial, and shaped or filtered outside influences to preserve traditional values. With guidance from Navajo elders, McPherson describes varied experiences ranging from traditional deer hunting to livestock reduction, from bartering at a trading post to acting in John Ford movies, and from the coming of the automobile to the burgeoning of the tourist industry. Clearly written and richly detailed, this book offers new perspectives on a people who have adapted to new conditions while shaping their own destiny. *Glen Canyon Dammed* Jared Farmer, 1999 Focusing on the saddening, maddening example of Glen Canyon, Jared Farmer traces the history of exploration and development in the Four Corners region, discusses the role of tourism in changing the face of the West, and shows how the invention of Lake Powell has served multiple needs. He also seeks to identify the point at which change becomes loss. How do people deal with losing places they love? How are we to remember or restore lost places? **BOOK JACKET** *In Search of the Old Ones* David Roberts, 2010-05-11 An exuberant hands-on fly-on-the-wall account that combines the thrill of canyoneering and rock climbing with the intellectual sleuthing of archaeology to explore the Anasazi. David Roberts describes the culture of the Anasazi; the name means enemy ancestors in Navajo, who once inhabited the Colorado Plateau and whose modern descendants are the Hopi Indians of Arizona. Archaeologists, Roberts writes, have been puzzling over the Anasazi for more than a century, trying to determine the environmental and cultural stresses that caused their society to collapse 700 years ago. He guides us through controversies in the historical record, among them the haunting question of whether the Anasazi committed acts of cannibalism. Roberts's book is full of up-to-date thinking on the culture of the ancient people who lived in the harsh desert country of the Southwest. **Conflicted American Landscapes** David E. Nye, 2021-04-27 How conflicting ideas of nature threaten to fracture America's identity. Amber waves of grain, purple mountain majesties. Americans invest much of their national identity in sites of natural beauty. And yet American lands today are torn by conflicts over science, religion, identity, and politics. Creationists believe that the Biblical flood carved landscapes less than 10,000 years ago; environmentalists protest pipelines. Western states argue that the federal government's land policies throttle free enterprise. Native Americans demand protection for sacred sites. In this book, David Nye looks at Americans' irreconcilably conflicting ideas about nature. A landscape is conflicted when different groups have different uses for the same location—for example, when some want to open mining sites that others want to preserve, or when suburban development impinges on agriculture. Some landscapes are so degraded from careless use that they become toxic anti-landscapes. Nye traces these conflicts to

clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today's environmental crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America's contradictory conceptions of nature are at the heart of a broken national consensus Byron Cummings Todd W. Bostwick, 2022-06-21 Byron Cummings known to students and colleagues as The Dean had a profound influence on the archaeology of Arizona and Utah during its early development An explorer archaeologist anthropologist teacher museum director university administrator and state parks commissioner Cummings was involved in many important discoveries in the American Southwest over the first half of the twentieth century and was a pioneer in the education of generations of archaeologists and anthropologists This book presents the first comprehensive examination of Cummings life offering readers a greater understanding of his trailblazing work Todd Bostwick elucidates Cummings many intellectual and cultural contributions investigates the controversies in which he was embroiled and describes his battles to wrest control of Arizona archaeology from eastern institutions that had long dominated Southwest archaeology Cummings saw the Southwest as an American wilderness where the story of cultural development revealed by the archaeologist and anthropologist was as important as it was in Europe Bostwick's meticulous account of his life reflects his great reverence for the region and pays tribute to a man whose dedication mentoring and friendship have forever sealed his place as The Dean *The Bears Ears: A Human History of America's Most Endangered Wilderness* David Roberts, 2021-02-23 A personal and historical exploration of the Bears Ears country and the fight to save a national monument The Bears Ears National Monument in southeastern Utah created by President Obama in 2016 and eviscerated by the Trump administration in 2017 contains more archaeological sites than any other region in the United States It's also a spectacularly beautiful landscape a mosaic of sandstone canyons and bold mesas and buttes This wilderness now threatened by oil and gas drilling unrestricted grazing and invasion by Jeep and ATV is at the center of the greatest environmental battle in America since the damming of the Colorado River to create Lake Powell in the 1950s In *The Bears Ears* acclaimed adventure writer David Roberts takes readers on a tour of his favorite place on earth as he unfolds the rich and contradictory human history of the 1.35 million acres of the Bears Ears domain Weaving personal memoir with archival research Roberts sings the praises of the outback he's explored for the last twenty five years **First Impressions** David J.
