Research Universities And The National Interest A Report From Fifteen University Presidents:

Research Universities and the National Interest Carnegie Corporation of New York, 1977 The connection between the major research universities and the federal government in furthering advanced learning of high quality was reassessed during a series of meetings of the presidents of 15 major universities It is argued that one of the decisive elements in the quality of a society is the level it is able to reach and sustain in the quality of its research and scholarship a national need for excellence in higher learning which cannot be met without a renewed and strong partnership between major research universities and the federal government Serious limitations in international competence exist in American universities in terms of language instruction specialized libraries and collaboration between American scholars and scientists and those in developing countries The long term international effectiveness of the United States would be substantially enhanced by the achievement of full international competence on the part of the major American research universities Without federal assistance even the competence achieved since World War II will erode Recommendations include 1 under the International Education Act or other appropriate authorizing legislation the federal government should develop a ten year program of grants in support of plans by individual research universities for achieving and maintaining greater competence in research on foreign areas and international problems and that these grants be awarded on the basis of demonstrated merit 2 federally funded fellowship programs should support the advanced training of graduate students and the work of postdoctoral scholars in international studies 3 a comprehensive federal fellowship policy should be developed and 4 funding for present and future federal programs designed to increase our national competence in international studies should be increased by 75 million a year CC

Research Universities and the National Interest Ford Foundation, 1978 *The Political University* Robert M.

Rosenzweig, 2001-12-05 Research universities are unique in American education in the degree to which they are sensitive to policies of the national government According to Robert Rosenzweig it is impossible to understand the recent past the present and the future of the university without understanding the political process that determines those policies including the various ways universities have tried with mixed results to shape them to their own ends In *The Political University* the former Stanford administrator and president of the Association of American Universities offers an insider's perspective on research universities the AAU and the Washington political agenda Drawing on thirty years of professional experience Rosenzweig discusses the problems and prospects of American research universities in light of such issues as shifting federal policies resource constraints increased partnerships with business and industry and the changing needs and perceptions of the larger society His book also brings other valuable perspectives to the discussion those of twelve former university presidents all of whom served through the 1980s all of whom left office around 1990 for various reasons and none of whom will ever hold a presidency again This edition contains a new introduction which brings some of the issues dealt with in the book into sharper relief In candid and wide ranging discussions with Rosenzweig the former presidents examine the complex

political process on which the modern research university depends and through which the modern university president must lead constituents

Research and Relevant Knowledge Roger L. Geiger, 2017-09-29 The rise of American research universities to international preeminence constitutes one of the most important episodes in the history of higher education Research and Relevant Knowledge follows Geiger's earlier volume on American research universities from 1900 to 1940 This second work is the first study to trace this momentous development in the post World War II period It describes how the federal government first relied on university scientists during the war and how the resulting relationship set the pattern for the postwar mushrooming of academic research The first half of the book analyzes the development of the postwar system of academic research exploring the contributions of foundations defense agencies and universities The second half depicts the rise of the golden age of academic research in the years after Sputnik 1957 and its eventual dissolution at the end of the 1960s graduate education When the federal patron soon reduced its largesse university students took the lead in challenging the putative hegemony of academic research The loss of consensus quickly brought the malaise of the 1970s stagnation frustration and equivocation about the research role The final chapter appraises the renaissance of the 1980s based largely on a rapprochement with the private sector and ends by evaluating the embattled status of research universities at the beginning of the 1990s Research and Relevant Knowledge provides the first authoritative analytical account of American research universities during their most fateful half century It will be of critical importance to all those concerned with the future of higher education in the United States

Funding the Future Alison R. Bernstein, 2013-12-16 In an era of declining state support for colleges and universities the role of private philanthropy in helping to shape the future direction of higher education has become even more crucial and significant than in the past Knowing about philanthropy's historic influence on higher education and what philanthropy currently prioritizes is now virtually a prerequisite for presidents and academic leaders in both public and private institutions This book discusses the complex relationship of philanthropy to higher education both in historic perspective and in the present It is not a primer on how to write a successful grant Rather it provides a road map for understanding philanthropy's influence on American higher education It will be of interest to academic leaders advancement professionals students of higher education and philanthropy and others concerned with the future of colleges and universities

American Foundations Helmut K. Anheier, David C. Hammack, 2010-09-01 Foundations play an essential part in the philanthropic activity that

defines so much of American life No other nation provides its foundations with so much autonomy and freedom of action as does the United States Liberated both from the daily discipline of the market and from direct control by government American foundations understandably attract great attention As David Hammack and Helmut Anheier note in this volume Americans have criticized foundations for their alleged conservatism liberalism elitism radicalism devotion to religious tradition hostility to religion in short for commitments to causes whose significance can be measured in part by the controversies they provoke Americans have also criticized foundations for ineffectiveness and even foolishness Their size alone conveys some sense of the significance of American foundations whose assets amounted to over 530 billion in 2008 despite a dramatic decline of almost 22 percent in the previous year And in 2008 foundation grants totaled over 45 billion But what roles have foundations actually played over time and what distinctive roles do they fill today How have they shaped American society how much difference do they make What roles are foundations likely to play in the future This comprehensive volume the product of a three year project supported by the Aspen Institute's program on the Nonprofit Sector and Philanthropy provides the most thorough effort ever to assess the impact and significance of the nation's large foundations In it leading researchers explore how foundations have shaped or failed to shape each of the key fields of foundation work American Foundations takes the reader on a wide ranging tour evaluating foundation efforts in education scientific and medical research health care social welfare international relations arts and culture religion and social change
