Realigning Research and Practice in Information Systems Development Nancy L. Russo,Brian Fitzgerald,Janice I. DeGross,2013-06-29 Given the pervasive nature of information technology and information systems in the modern world the design and development of IS and IT are critical issues of concern New research topics continuously emerge in tandem with the latest developments in technology E Business Knowledge Management Business Process Reengineering for example However when the initial flurry of research abates and the gloss of these areas has diminished somewhat as it inevitably does the enduring core issue remains as to how to develop systems to fully exploit these new areas Both information systems and information technology are interpreted fairly broadly in this book Of particular interest to the editors were research studies that facilitate an understanding of the role and impact of information technology on society organizations and individuals and which strive to improve the design and use of information systems in that context The contributions to the book are categorized into four broad themes First is the core issue of developing information systems in the current environment In this section several fundamental challenges to current assumptions and conventional wisdom in information systems development are posed The second section considers the management of information systems Again the conventional wisdom is challenged The penultimate section focuses on researching information systems Here various issues to do with research methods are surfaced and the use of leading edge research methods in information systems development is pioneered and discussed Finally a section is devoted to understanding information systems This section addresses the perennial challenge in the IS field in relation to the conceptual foundations of the field This volume comprises the proceedings of the Working Conference on Realigning Research and Practice in Information Systems Development The Social and Organizational Perspective which was sponsored by the International Federation for Information Processing IFIP and held in Boise Idaho USA in July 2001 Given the central importance of information systems development in the current age this eclectic book which considers the topic from a rich and varied set of perspectives will be essential reading for researchers and practitioners working in all areas of IS and IT

Human Resource Management Theory and Research on New Employment Relationships

Dianna L. Stone,James H. Dulebohn,2016-10-01 This volume of the series Research in Human Resource Management HRM focuses on a number of important issues in HRM and OB including performance appraisal political skill gratitude psychological contracts the philosophical underpinnings of HRM pay and compensation messages and electronic human resource management For example the first article by Cleveland and Murphy considers a very controversial issue i e the

reasons that organizations are abandoning the use of performance appraisal The next article by Harris Ferris Summers and Munyon is extremely interesting and focuses on how composite political skills e g social astuteness interpersonal influence helps individuals develop productive work relationships in organizations The third article by Scandura and Sharif presents a very innovative model of gratitude in organizations and the authors argue that gratitude is essential for maintaining positive social relations in organizations The fourth article by Suazo and Stone Romero provides an extremely comprehensive review of the theory and research on psychological contracts in organizations from 1960 2015 The subsequent article by Bae Kang and Kim presents a very unique perspective on HRM and considers the philosophical underpinnings of the field The sixth article by Murray Dulebohn Roehling and Werling presents a very innovative model to explain the role that organizational messages about changes in pay or compensation systems have on anticipatory pay satisfaction The final article in the series by Johnson Thatcher and Burleson presents a thought provoking framework for understanding the key role that information technology IT plays in the field of HRM The series should be useful to researchers and doctoral students in the fields of HRM OB and Industrial and Organizational Psychology It should also be relevant for doctoral courses and scientist practitioners in these fields
