**Handbook of Communication and Aging Research** Jon F.

Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research

captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging

*Professor, A President, and A Meteor* Cathryn J. Prince, 2010-12-14 When a fiery meteor crash in 1807 lit up the dark early morning sky in Weston Connecticut it did more than startle the few farmers in the sleepy village More importantly it sparked the curiosity of Benjamin Silliman a young chemistry professor at nearby Yale College His rigorous investigation of the incident started a chain of events that eventually brought the once low standing of American science to sudden international prominence And by coincidence the event also embroiled Silliman in politics pitting him against no less an adversary than President Thomas Jefferson Based on a wealth of original source documents and interviews with current experts in history astronomy and geology this journalist tells the remarkable story of Benjamin Silliman arguably America s first bonafide scientist In a lively narrative rich with fascinating historical detail the author documents the primitive state of American science at the time Silliman s careful analysis of the meteor samples and the publication of his conclusions which contradicted both popular superstitions regarding meteors as ominous portents and a common belief that meteors come from volcanic eruptions on the moon She also describes Silliman s struggles to build a chemistry department at Yale with rudimentary material new insights into geology that resulted from his analysis of the meteor and his report to the prestigious French Academy which raised the prestige of American science Finally she discusses the political turbulence of the time which Silliman could not escape and how the meteor event was used to drive a wedge between New England and Jefferson This is a fascinating vignette of Federal Period America when science on this continent was still in its infancy but was just

Lie,2009-06-30 In modern states John Lie argues ideas of race ethnicity and nationality can be subsumed under the rubric of peoplehood He argues indeed that the modern state has created the idea of peoplehood That is the seemingly primitive atavistic feelings of belonging associated with ethnic racial and national identity are largely formed by the state Not only is the state responsible for the development and nurturing of these feelings it is also responsible for racial and ethnic conflict even genocide When citizens think of themselves in terms of their peoplehood identity they will naturally locate the cause of all troubles from neighborhood squabbles to wars in racial ethnic or national attitudes and conflicts Far from being transhistorical and transcultural phenomena race ethnicity and nation Lie argues are modern notions modernity here
