Resonant Matter Lutz Koepnick, 2020-12-10 In *Resonant Matter* Lutz Koepnick considers contemporary sound and installation art as a unique laboratory of hospitality amid inhospitable times Inspired by Ragnar Kjartansson's nine channel video installation *The Visitors* 2012 the book explores resonance the ability of objects to be affected by the vibrations of other objects as a model of art's fleeting promise to make us coexist with things strange and other In a series of nuanced readings Koepnick follows the echoes of distant unexpected and unheard sounds in twenty first century art to reflect on the attachments we pursue to sustain our lives and the walls we need to tear down to secure possible futures The book's nine chapters approach *The Visitors* from ever different conceptual angles while bringing it into dialogue with the work of other artists and musicians such as Lawrence Abu Hamdan Guillermo Galindo Mischa Kuball Philipp Lachenmann Alvin Lucier Teresa Margolles Carsten Nicolai Camille Norment Susan Philipsz David Rothenberg Juliana Snapper and Tanya Tagaq With this book Koepnick situates resonance as a vital concept of contemporary art criticism and sound studies His analysis encourages us not only to expand our understanding of the role of sound in art of sound art but to attune our critical encounter with art to art's own resonant thinking

Resonance Hartmut Rosa, 2019-07-26 The pace of modern life is undoubtedly speeding up yet this acceleration does not seem to have made us any happier or more content If acceleration is the problem then the solution argues Hartmut Rosa in this major new work lies in resonance The quality of a human life cannot be measured simply in terms of resources options and moments of happiness instead we must consider our relationship to or resonance with the world Applying his theory of resonance to many domains of human activity Rosa describes the full spectrum of ways in which we establish our relationship to the world from the act of breathing to the adoption of culturally distinct worldviews He then turns to the realms of concrete experience and action family and politics work and sports religion and art in which we as late modern subjects seek out resonance This task is proving ever more difficult as modernity's logic of escalation is both cause and consequence of a distorted relationship to the world at individual and collective levels As Rosa shows all the great crises of modern society the environmental crisis the crisis of democracy the psychological crisis can also be understood and analyzed in terms of resonance and our broken relationship to the world around us Building on

his now classic work on acceleration Rosa's new book is a major new contribution to the theory of modernity showing how our problematic relation to the world is at the crux of some of the most pressing issues we face today This bold renewal of critical theory for our times will be of great interest to students and scholars across the social sciences and humanities
