Resources Textiles And The Environment:

Assessing the Environmental Impact of Textiles and the Clothing Supply Chain Subramanian Senthilkannan Muthu, 2020-03-20 Assessing the Environmental Impact of Textiles and the Clothing Supply Chain Second Edition is a fully updated practical guide on how to identify and respond to environmental challenges across the supply chain This new edition features updates to important data on environmental impacts and their measurements the sustainable use of water and electricity and new legislation standards and schemes Chapters provide an introduction to the textile supply chain and an overview of the methods used to measure environmental impacts including greenhouse gas emissions water and energy footprints and a lifecycle assessment LCA on environmental impacts This book will be a standard reference for R D managers in the textile industry and academic researchers in textile science Provides a holistic view of the sustainability issues that affect the textile value chain Explains ways to calculate the textile industry s use of resources its impact on global warming and the pollution and waste it generates Reviews key methods for the reduction of the environmental impact of textile products and how they are implemented in practice Includes methods for calculating product carbon footprints PCFs ecological footprints EFs and lifecycle assessments LCA

Smart Textiles from Natural Resources Md. Ibrahim H. Mondal, 2024-04-18 Smart Textiles from Natural Resources is an interdisciplinary guide to best practice and emerging challenges in the use of natural textiles in smart applications The movement towards smart textiles has attracted researchers from many fields creating multidisciplinary research frontiers with nanoscience smart materials and structures microelectronics and wireless communication This ground breaking book provides technical advice and foundational support to researchers from all of these backgrounds seeking to include sustainability in their solutions Each chapter in this book is written reviewed and edited to cover the principles of manufacture process techniques and mechanisms and the state of the art construction specifications properties test methods and standards of the major product areas and applications of this field Covers a wide variety of novel applications of smart textiles including medical protective and automotive Proposed solutions are based on case studies from academic and industrial labs around the world Explains how to improve the biodegradability renewability biocompatibility and non toxicity of smart products

Chemistry of the Textiles Industry C. Carr, 1995-05-31 The manufacture and processing of textiles is a complex and essential industry requiring many diverse skills to ensure profitability New products are continually being developed and reflect the energy and innovation of those working in the field This book focuses on the technological aspects of the chemical processing of textiles and on the modifications necessary for specific work environments Coverage ranges from fibre structure and its relationship to tensile properties textile aesthetics comfort physiology and end use performance through to the effect of domestic processing by the consumer on the textile product The industry is constantly under environmental pressure and the book examines the nature of environmental control and the development of alternative technology to produce less environmental impact In order to provide a balanced view of

the current situation authors have been drawn from academia research institutes and industry to produce a text that will be useful to both industrial readers and university students In conclusion I would like to thank the authors for their dedication and their contributions

Protective Textiles from Natural Resources Md. Ibrahim H. Mondal, 2022-06-15 Protective Textiles from Natural Resources provides systematic coverage of the fundamentals production methods processing techniques characterization techniques properties and applications of natural textile products for protective purposes The subject of this book is an important kind of technical textile designed to protect the wearer from injuries illness and death They offer enhanced protection against phenomena including heat cold flame chemical biological nuclear agents radiation disaster and even ballistics As no single type of clothing can be adequate for all kinds of protection extensive research is carried out to develop protective clothing for specialized civilian and military applications The latest research on the use of natural fibres in PPE is also covered which could make a significant contribution to the fight against the spread of COVID 19 This comprehensive guide explores a wide variety of themes from material processing and design to finished products through protection against specific hazards to specific applications including all significant new developments on natural materials for protective textiles Explains the latest technologies related to fibre extraction from natural sources chemical treatments weave constructions fabric finishes and coatings Includes the latest research on natural fibers in personal protective equipment PPE to protect wearers from bacterial and viral contamination Explains the state of the art in testing methods and standards for protective clothing

Medical Textiles from Natural Resources Md. Ibrahim H. Mondal, 2022-06-15 Medical Textiles from Natural Resources provides systematic and comprehensive coverage of the fundamentals production methods processing techniques characterization techniques properties and applications of medical textile materials from natural resources Medical textiles offer a variety of technical and functional properties valued in medical and healthcare sectors often relating to hygiene As medical textile products remain in close contact with the human body the fibre must have characteristics such as biological compatibility biological degradability permeability and nontoxicity Only materials from natural renewable sources have such characteristics This book provides the latest information on a wide range of medical applications from single suture and wound dressings to implants and tissue scaffolds It also offers a systematic review of the manufacture properties and applications of technical textiles for medical use Explains the latest technologies related to fibre extraction from natural sources chemical treatments weave constructions fabric finishes and coatings Describes innovative applications of nanomaterials in the treatment of textile fabric and the utilization of carbohydrate polymers in the preparation of nanoparticles deposited in nonwoven fabrics Helps product designers to find appropriate materials from natural resources with the characteristics of biodegradability renewability biocompatibility and nontoxicity

Handbook of Technical Textiles A. Richard Horrocks, Subhash C. Anand, 2000-10-31 This major handbook provides comprehensive coverage of the manufacture processing and applications of high tech textiles for a huge range of
