Adolescents, Media, and the Law Roger J. R. Levesque, 2007-06-18 There is much controversy about the dangers of a free media when it comes to children and adolescents. Many believe that this constitutional right should be amended, altered, or revoked entirely to prevent the young from being negatively influenced. Graphic violence, sexual content, and the depiction of cigarette smoking have all come under fire as being unacceptable in media that is geared toward adolescents, from television and movies to magazines and advertising. Yet not much has been written about the developmental science behind these ideas and what effects a free media really has on adolescents. This book presents a synthesis of all current knowledge about the developmental effects of a free media on adolescents. Levesque first presents a full analysis of research studies into the media's effects on adolescents in four key areas: sexuality, violence, smoking, and body image. All findings are assessed within the context of normal adolescent development. Levesque then discusses how this knowledge can be used to inform current standards for the regulation of free speech with regard to adolescents. Both legal restrictions and less formal regulatory bodies, schools, parent groups, etc. are reviewed to present a full picture of the ways in which a free media is constrained to protect adolescent's development.

Dangerous Adolescents, Model Adolescents Roger J.R.

Levesque, 2005-12-27 Teachers make a difference. As someone who grew up in one of the poorest and rural areas of a poor state and ended up attending elite graduate and professional schools, I have much to credit my public school teachers. My teachers sure struggled much to teach an amazingly wide variety of students from different backgrounds, abilities, and hopes. Given that reality, which undoubtedly repeats itself across the United States and globe, one would think that I should be quite hesitant to criticize a system that produces countless grateful students and productive citizens. I agree. The pages that follow surely can be perceived as yet another attack on already much maligned schools that do produce impressive outcomes despite their limited resources, increased obligations, and the sustained barrage of attacks from competing interest groups. Some may even view the text as an affront to the inalienable rights of parents to raise their children as they see fit. Others surely could understand the analysis as another assault on our decentralized legal and school systems that should retain the right to balance the needs of communities, parents, schools, and students. I clearly did not intend and do not see the ultimate result as yet another diatribe on the manner teachers, parents, and communities treat students.

Attachment Theory

Applied Mario Mikulincer, Phillip R. Shaver, 2023-06-20 In this compelling book, prominent investigators Mario Mikulincer and Phillip R. Shaver review the state of the science of attachment-based interventions in psychotherapy and beyond. They critically evaluate a range of programs that aim to strengthen parent-child couple and therapist-client relationships. The theoretical and empirical underpinnings of each intervention are examined, as are specific techniques used to enhance felt security and foster personal growth. The book also looks at evidence-based interventions outside the mental health domain.

including programs that target teacher student relationships and academic performance Looking to the future the authors discuss emerging applications of attachment theory in medicine and health care management and organizational behavior and group and intergroup processes See also the related work from Mikulincer and Shaver Attachment Theory Expanded Security Dynamics in Individuals Dyads Groups and Societies

THE DYNAMICS OF ART AS THERAPY WITH ADOLESCENTS Bruce L. Moon,2012-05-01 This new and timely second edition updated with an expanded discussion of arts based processes and additional instructions and heartfelt client narratives continues in the trajectory of the first promising to shape and provide guidance to both current and next

generation of art therapists in the studio based approach to working with a challenging and often maligned population. It continues to offer much in the way of guidance, motivation and practical advice around the use of art making as the central curative component when developing therapeutic relationships with hurt and troubled teens. The author's initial focus is on understanding the developmental issues facing adolescents and how these affect the psychotherapeutic treatment. This includes an outline of the phases of therapy: Resistance Phase, Imaging Phase, Immersion Phase and Letting Go Phase. The second primary focus is devoted to the art as therapy approach to art psychotherapy with several chapters examining components of this model. The final focus presents the author's therapeutic approach to working with adolescents through responsive art making. A positive by-product of the book is that the reader will find many practical suggestions regarding materials, artistic tasks and therapeutic techniques. In addition, the text is greatly enhanced by the powerful illustrations that highlight the chapters' case narratives. This new edition continues to share the author's essential philosophical, technical, pragmatic and ethical aspects of practicing art therapy that have made him a standard bearer for those who believe in the therapeutic power of art. *The Dynamics of Art as Therapy with Adolescents* should be a cornerstone text for any Adolescent Art Therapy course.

Trauma Responsive Child Welfare Systems Virginia C. Strand, Ginny Sprang, 2017-10-24. This comprehensive reference offers a robust framework for introducing and sustaining trauma responsive services and culture in child welfare systems. Organized around concepts of safety, permanency and well-being, chapters describe innovations in child protection, violence prevention, foster care and adoption services to reduce immediate effects of trauma on children and improve long-term development and maturation. Foundations and interventions for practice include collaborations with families and community entities, cultural competency, trauma responsive assessment and treatment, promoting trauma informed parenting and when appropriate working toward reunification of families. The book's chapters on agency culture also address staffing, supervisory and training issues, planning and implementation and developing a competent, committed and sturdy workforce. Among the topics covered: Trauma informed family engagement with resistant clients; Introducing evidence based trauma treatment in preventive services; Working with resource parents for trauma informed foster care; Use of implementation science principles in program development for sustainability; Trauma informed and secondary traumatic stress informed organizational readiness assessments; Caseworker training for trauma practice and building worker resiliency. *Trauma Responsive Child Welfare Systems* ably assists psychology professionals of varied disciplines, social workers and mental health professionals applying trauma theory and trauma informed family engagement to clinical practice and/or research seeking to gain strategies for creating trauma informed agency practice and agency culture. It also makes a worthwhile text for a child welfare training curriculum.
