Responding to Environmental Conflicts: Implications for Theory and Practice Eileen Petzold-Bradley, Alexander Carius, Árpád Vincze, 2012-12-06 A comprehensive tour d horizon of the debate on the environment and security focusing on the various policy options for building peace and preventing environmental conflict Experts from the areas survey the key environmental challenges in Eastern and Central European states and those of the former Soviet Union extending the debate to such regions as the Balkans the Black Sea and Central Europe This is the first time such extensive case study research has been reported for these regions Both practical and theoretical approaches to the debate are presented within a multi disciplinary framework the contributors ranging from academic experts involved with peace and conflict research to actual policy makers active in the fields of environmental and security policy Readership Experts already working in the relevant disciplines both academic and governmental as well as those seeking an introduction to the various policy fields A graduate level study text excellent survey for policy makers and an academic contribution to ongoing studies *Environmental Change and Security Project Report*, 2002 **Security and Environment in the Mediterranean** Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century **Globalization and Environmental Challenges** Hans Günter Brauch, Úrsula Oswald Spring, Czesław Mesjasz, John Grin, Pál Dunay, Navnita Chadha Behera, Béchir Chourou, Patricia Kameri-Mbote, P. H. Liotta, 2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century **Responding to Environmental Conflicts** Eileen Petzold-Bradley, Alexander Carius, Árpád Vincze, 2001 Facing Global Environmental Change Hans Günter Brauch, Navnita Chadha Behera, Patricia Kameri-Mbote, John Grin, Úrsula Oswald Spring, Béchir Chourou, Czesław Mesjasz, Heinz Krummenacher, 2009-06-04 The year

2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally. Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth Assessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media. This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large. The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore. By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings, the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world.

*Africa: Facing Human Security Challenges in the 21st Century* Tatah Mentan, 2014-05-12 Africa's dynamic security environment is characterized by great diversity from conventional challenges such as insurgencies, resource and identity conflicts and post conflict stabilization to growing threats from piracy, narcotics trafficking, violent extremism and organized crime taking root in urban slums among others. This precarious environment jeopardizes security at the societal, community and individual levels. In a globalized and interconnected world, millions of people worldwide are affected by some form of human insecurity. Infectious and parasitic diseases annually kill millions. Internally displaced persons number millions, including 5 million in Sudan alone. In Zambia, 1 million people in a population of 11 million are reported to be HIV positive, a situation much worse than in other countries. Potable water crisis looms almost everywhere. In this book, Tatah Mentan points out the need to shift the focus away from a state-centric and military strategic emphasis on security to an interdisciplinary and people-centric approach that embraces notions like global citizenship, empowerment and participation. The primary elements of economic, food, health, environment, personal, community and political security all comprise the broader understanding of human security in an intricately interconnected world.

Water Scarcity and Conflict in African River Basins Mahlakeng Khosi Mahlakeng, 2023-03-31 The book presents a critical and comparative analysis of the hydropolitical landscape of African transboundary river basins which for much of the past century have been affected by water scarcity. River and lake basins can become a source of tension and conflict due to a complicated mix of environmental, demographic, diplomatic, historical and geopolitical factors. This book, however, specifically focuses on the important and often underlooked role played by scarcity in generating or exacerbating conflicts in shared river basins. Asserting that transboundary river basins tie states into a web of interdependence, this book raises awareness of how water scarcity or the depletion of water resources complicates this relationship as nations are forced to look beyond their own borders to meet the demand for water to satisfy multiple needs. Taking a comparative approach, it examines three shared basins: the Orange, Senqu, the Nile and the Niger River basins. While situated in different regions, all three basins are

marked by serious environmental challenges that are detrimental to combustible hydropolitics over such shared water resources and they provide fascinating insights into the links between climate variability and change water resources human security conflict adaptation and regime capacity Overall this book argues that conflict over transboundary resources can be prevented given the establishment of norms rules and the role of external actors that help regulate state behaviour and control their impacts This book will be of great interest to students and scholars of water resource management hydropolitics environmental conflict resource scarcity and international relations It will also be of interest to policymakers involved in transboundary water resource governance

**Climate Change, Human Security and Violent Conflict** Jürgen Scheffran, Michael Brzoska, Hans Günter Brauch, Peter Michael Link, Janpeter Schilling, 2012-05-26 Severe droughts damaging floods and mass migration Climate change is becoming a focal point for security and conflict research and a challenge for the world's governance structures But how severe are the security risks and conflict potentials of climate change Could global warming trigger a sequence of events leading to economic decline social unrest and political instability What are the causal relationships between resource scarcity and violent conflict This book brings together international experts to explore these questions using in depth case studies from around the world Furthermore the authors discuss strategies institutions and cooperative approaches to stabilize the climate society interaction

Sustainable Development and Peace Romina Gurashi, 2023-04-21 This book explores the growing attention that sociology has started to give to environmental issues in terms of peace and social justice With a focus on sociological theory and its development it reconstructs the long journey made by the social sciences towards the reconstruction in a single theoretical paradigm of the problems associated with the implementation of conditions of peace and sustainability Beginning from the premise that environmental issues are never purely environmental but entail political economic and social implications Sustainable Development and Peace offers an understanding of where we are heading and how reflecting on present challenges and possible directions for the future It will therefore appeal to scholars of sociology social theory development studies politics and environmental studies

*Banditry and Security Crisis in Nigeria* Al Chukwuma Okoli, Saliou Ngom, 2023-08-10 This book examines the growing phenomenon of armed banditry in Nigeria and its implication for national security Nigeria's banditry crisis and deepening security challenges are fuelled by the existence of vast ungoverned hinterland and trans border spaces where various non state armed groups operate unhindered and outside of the law engaging in various forms of transnational crime This book explores the activities of these groups to assess the nature and significance of banditry as a complex threat to security It does so against the backdrop of reports of increased bandit attacks on farms markets mining sites villages and rural communities and the rising tide of violent crimes in Nigeria

especially the northern region This book analyses the factors that are responsible for the emergence of banditry as a recent national and transnational security threat and outlines the contemporary dynamics of Nigeria's banditry crisis and how it can be mitigated This book will be of interest to researchers and students in the field of African Studies International Relations Security and Strategic Studies Political Studies Peace and Conflict Studies as well as policymakers and practitioners interested in complex security threats and their implications in Nigeria and beyond

*International Water Law and the Human Right to Water* Imad Antoine Ibrahim, 2024-11-19 This book examines the development of international law applicable to Transboundary Aquifers TBAs considering the Human Right to Water and Sanitation HRWS The purpose is to determine how International Water Law IWL and the HRWS can be harmonized in the context of TBAs This is important given rules and instruments adopted to address this topic are relatively nascent and the field itself is still in the process of developing regulatory frameworks Taking the application of the HRWS to shared aquifers as a case study the work discusses whether IWL and International Human Rights Law complement each other The response to this question requires an analysis of the development of International Groundwater Law and its challenges the evolution of the HRWS the nature of transboundary groundwaters and the interplay between these two fields The author argues that IWL agreements should contain a provision related to the HRWS to ensure the protection of this right with a stipulation included in the nonbinding instrument that tackles shared groundwaters the Draft Articles on the Law of Transboundary Aquifers adopted in 2008 through the United Nations General Assembly Resolution The book will be of interest to international lawyers water and human right experts geologists and anyone interested in water and human rights issues

*Impacts of Climate Change and Variability on Pastoralist Women in Sub-Saharan Africa* Melese Getu, Munyae M. Mulinge, 2013 The term climate change is used to denote any significant but extended change in the measures of climate The changes could be due to natural variability or as a result of human activities such as the burning of fossil fuels to produce energy deforestation industrial processes and some agricultural practices Such activities release large amounts of carbon dioxide and other greenhouse gases into the atmosphere that hang like a blanket around the earth thus trapping energy in the atmosphere and causing it to warm up This results increasingly in climate variability which is characterised by extreme seasonal annual temporal and non spatial variability in temperature vagaries of precipitation rainfall patterns and amounts and or wind patterns occurring over a prolonged period of time The last decade 2001-2010 has been the warmest on record with the average temperatures reaching 0.46°C above the 1961-1990 mean and 0.21°C warmer than the 1991-2000 period It has been proved that the African continent is warming up faster all year round than the global average a trend that is likely to continue By the year 2100 it is predicted that temperature changes will fall into ranges of about 1.4°C to nearly 5.8°C increase in mean surface temperature compared to 1990 and the mean sea level will rise between 10cm to 90 cm AMCEN 2011 The interior of semiarid margins of the Sahara and central southern Africa will be the most affected by such warming AMCEN 2011 To

tackle the phenomenon of climate change effectively human societies have put in place a combination of mitigation and adaptation mechanisms and strategies Whereas mitigation aims at avoiding or lessening the impacts of the unmanageable the goal of adaptation is to manage the unavoidable That men and women are affected differently by climate change suggests that they also differ in terms of the adaptation mechanisms they employ Despite the existence of gender based differences in the effects of climate change and in adaptation and coping strategies studies on the gender differential impacts of climate change and variability on women in general and pastoralist women in particular in sub Saharan Africa are limited This volume offers insights and knowledge that pastoralist women developed on climate change adaptation through their experiences in their households and communities and thereby tries to narrow this gap

*Governance, Natural Resources and Post-Conflict Peacebuilding* Carl Bruch,Carroll Muffett,Sandra Nichols,2016-04-07 When the guns are silenced those who have survived armed conflict need food water shelter the means to earn a living and the promise of safety and a return to civil order Meeting these needs while sustaining peace requires more than simply having governmental structures in place it requires good governance Natural resources are essential to sustaining people and peace in post conflict countries but governance failures often jeopardize such efforts This book examines the theory practice and often surprising realities of post conflict governance natural resource management and peacebuilding in fifty conflict affected countries and territories It includes thirty nine chapters written by more than seventy researchers diplomats military personnel and practitioners from governmental intergovernmental and nongovernmental organizations The book highlights the mutually reinforcing relationship between natural resource management and good governance Natural resource management is crucial to rebuilding governance and the rule of law combating corruption improving transparency and accountability engaging disenfranchised populations and building confidence after conflict At the same time good governance is essential for ensuring that natural resource management can meet immediate needs for post conflict stability and development while simultaneously laying the foundation for a sustainable peace Drawing on analyses of the close relationship between governance and natural resource management the book explores lessons from past conflicts and ongoing reconstruction efforts illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives and presents an emerging theoretical and practical framework for policy makers researchers practitioners and students Governance Natural Resources and Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six books of case studies and analyses with contributions from practitioners policy makers and researchers Other books in this series address high value resources land water livelihoods and assessing and restoring natural resources
