Response To The National Research Councils Assessment Of Rands Controlling Cocaine Study:

Response to the National Research Council's Assessment of RAND's Controlling Cocaine Study, 2000 A 1994 RAND study Controlling Cocaine Supply Versus Demand Programs Rydell and Everingham drew widely cited conclusions regarding the relative cost effectiveness of spending additional drug control moneys on treatment and various modes of enforcement A National Research Council NRC committee last year issued a critique of that report concluding that it was not a good basis for policymaking Modeling is an inexact science and there is plenty of room for experts to disagree on methods and conclusions We feel however that the NRC s critique warrants a reply for two reasons First it appears to rest on incomplete information regarding the RAND model Our differences with the assessment are thus not simply a matter of varying judgment or opinion Second the critique was issued by a distinguished panel at the request of the Office of National Drug Control Policy Barring objection we fear that many in the drug policy community may tend to accept the conclusions of the panel as the last word on this topic

Response to the National Research Council's Assessment of RAND's Controlling Cocaine Study Jonathan Paul Caulkins, James Chiesa, Susan S. Everingham, 2000 In 1999 a scientific committee assembled under the auspices of the National Research Council issued a critique of RAND s 1994 Controlling Cocaine report The committee concluded T he findings of the RAND study do not constitute a persuasive basis for the formation of cocaine control policy In the current document RAND s Drug Policy Research Center rebuts the committee s claim The Center shows that most of the committee s criticisms rest on an incomplete understanding of the model used in the RAND report or when taken into account do not result in important changes in the findings based on the model The two remaining criticisms are that the data on cocaine treatment effectiveness are not adequate to support modeling and that the mode of price transmission down the cocaine production pipeline may be different from that assumed The Center acknowledges these points as potentially valid but holds that models need not have negligible probability of error to be useful as decision aids

Drug Policy and the Public Good, 2010 Drug Policy and the Public Good is a book by an international group of addiction scientists to improve the links between addiction science and drug policy It presents the accumulated scientific knowledge on drug use research that has a direct relevance to the development of drug policy at local national and international levels

Assessment of Two Cost-Effectiveness Studies on Cocaine Control Policy National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Data and Research for Policy on Illegal Drugs, 1999-06-05 This study is an important first step in the development of a national policy on illegal drugs It assesses two recent cost effectiveness studies on cocaine control policy one by RAND Controlling Cocaine Supply Versus Demand Programs and the other by the Institute of Defense Analyses An Empirical Examination of Counterdrug Interdiction Program Effectiveness *Choice, Behavioural Economics and Addiction* Nick Heather, Rudy E. Vuchinich, 2003-11-13 Choice Behavioural Economics and Addiction is about the theory data and applied

implications of choice based models of substance use and addiction The distinction between substance use and addiction is important because many individuals use substances but are not also addicted to them The behavioural economic perspective has made contributions to the analysis of both of these phenomena and while the major focus of the book is on theories of addiction it is necessary also to consider the behavioural economic account of substance use in order to place the theories in their proper context and provide full coverage of the contribution of behavioural economics to this field of study The book discusses the four major theories of addiction that have been developed in the area of economic science behavioural economics They are hyperbolic discounting melioration relative addiction rational addiction The main objective of the book is to popularise these ideas among addiction researchers academics and practitioners The specific aims are to articulate the shared and distinctive elements of these four theories to present and discuss the latest empirical work on substance abuse and addiction that is being conducted in this area and to articulate a range of applied implications of this body of work for clinical public health and public policy initiatives The book is based on an invitation only conference entitled Choice Behavioural Economics and Addiction Theory Evidence and Applications held at the University of Alabama at Birmingham March 30 April 1 2001 The conference was attended by prominent scientists and scholars representing a range of disciplines concerned with theories of addiction and their consequences for policy and practice The papers in the book are based on the papers given at the above conference together with commentaries by distinguished experts and in many cases replies to these comments by the presenters

Investing in the Disadvantaged David L. Weimer, Aidan R. Vining, 2009-03-26 With budgets squeezed at every level of government cost benefit analysis CBA holds outstanding potential for assessing the efficiency of many programs In this first book to address the application of CBA to social policy experts examine ten of the most important policy domains early childhood development elementary and secondary schools health care for the disadvantaged mental illness substance abuse and addiction juvenile crime prisoner reentry programs housing assistance work incentive programs for the unemployed and employers and welfare to work interventions Each contributor discusses the applicability of CBA to actual programs describing both proven and promising examples The editors provide an introduction to cost benefit analysis assess the programs described and propose a research agenda for promoting its more widespread application in social policy Investing in the Disadvantaged considers how to face America's most urgent social needs with shrinking resources showing how CBA can be used to inform policy choices that produce social value

Dynamic Perspectives on Managerial Decision Making Herbert Dawid, Karl F. Doerner, Gustav Feichtinger, Peter M. Kort, Andrea Seidl, 2016-09-15 This volume collects research papers addressing topical issues in economics and management with a particular focus on dynamic models which allow to analyze and foster the decision making of firms in dynamic complex environments The scope of the contributions ranges from daily operational challenges firms face to strategic choices in dynamic industry environments and the analysis of optimal growth paths The volume also highlights recent methodological

developments in the areas of dynamic optimization dynamic games and meta heuristics which help to improve our understanding of optimal decision making in a fast evolving economy

Controlling Crime Philip J. Cook, Jens Ludwig, Justin McCrary, 2011-08-22 Criminal justice expenditures have more than doubled since the 1980s dramatically increasing costs to the public With state and local revenue shortfalls resulting from the recent recession the question of whether crime control can be accomplished either with fewer resources or by investing those resources in areas other than the criminal justice system is all the more relevant Controlling Crime considers alternative ways to reduce crime that do not sacrifice public safety Among the topics considered here are criminal justice system reform social policy and government policies affecting alcohol abuse drugs and private crime prevention Particular attention is paid to the respective roles of both the private sector and government agencies Through a broad conceptual framework and a careful review of the relevant literature this volume provides insight into the important trends and patterns of some of the interventions that may be effective in reducing crime

Searching for Science Policy (Clt) Jonathan B. Imber, 2002-01-01 The findings of scientific research often provide an important baseline to the formation of public policy However effective communication to the larger public about what scientists do and know is a problem inherent to all democratic societies It is the prerogative of democratic societies to determine what kind of scientific research will be funded Searching for Science Policy offers innovative ways of thinking about how the rhetoric and practice of science operates in various institutional contexts The book is divided into two parts Part 1 Policy Uses and Misuses of Science explores the various ways in which scientific claims are inevitably mediated by how they are used Joel Best draws on statistics involving missing children violence against women and attendance figures at political demonstrations to demonstrate how the motivations to use inaccurate and misleading numbers stems directly from the ideological and organizational interests of those using them Judith Kleinfeld analyzes recruitment policies for women scientists at MIT showing how hiring practices that may be justifiable on extra scientific factors are carried out based on pseudo scientific studies not subject to public scrutiny Robert MacCoun addresses the journalistic misuse of drug and drug abuse statistics and shows how this profoundly distorts policy implications drawn from them And Allan Mazur examines the role scientific evidence has come to play in the law pointing out the pitfalls of its intrinsic quality and how such evidence may be interpreted or misinterpreted by judges and juries Part 2 Searching for Science Policy extends discussion of the role of science to specific ideas about how public policy making might be improved in matters of law family environment drug use and health Mark Kleiman weighs the sometimes conflicting claims of science and social order in formulating drug policy Norval Glenn calls for closer cooperation between professional associations the media and researchers in reporting provisional social science findings to the public Stanley Rothman and S Robert Lichter examine the dynamic by which environmental organizations shape public perceptions of risk and harm And in the concluding chapter Sheila Jasanoff looks closely at differences between the provisional nature of science as normally practiced and the more contentious sphere of

litigation that demands ultimate resolution In a time when scientists find themselves subject to more public scrutiny than ever before the well informed citizen is no longer a moral ideal but rather a social imperative Searching for Science Policy helps to clarify the grounds and the circumstances of more effective use of science in public discourse Jonathan B Imber is editor in chief of Society and Class of 1949 Professor in Ethics and professor of sociology at Wellesley College
