Proceedings of the International Conference on Learning and Advanced Education (ICOLAE 2022) Mauly Halwat Hikmat,Yasir Sidiq,Naufal Ishartono,Yunus Sulistyono,Patmisari,Susiati,2023-08-29 This is an open access book The COVID 19 pandemic in the last two years has influenced how educational system works Online

learning became the primal policy taken by all institutions in the world to lower the risk of the virus spread. Despite the drawbacks of the online learning, teachers and students were accustomed with the distant learning through web meetings. Learning Management Systems (LMS) and other online learning platforms. In that time, topics under digital learning and education 5.0 were the main stakes in academic disseminations. This year, some institutions start to conduct their teaching and learning process classically as before the pandemic; others are still continuing online, and not few are in hybrid. This leaves a question: what learning reform should be made in post pandemic era? This conference invites researchers, experts, teachers, and students to discuss the coping solutions of the question. It is important for them to contribute to the understanding of re-imagining online education for better futures: innovative learning design, new skills for living and working in new times, global challenge of education, learning and teaching with blended learning, flipped learning, integrating life skills for students in the curriculum, developing educators for the future, distance learning, humanities learning in the digital era, assessment and measurement in education, challenges and transformations in education technology in teaching and learning, new learning and teaching models. Not limited to these, scholars may add another interesting topic related to learning reform in post pandemic era to present.

Literature and the Brain Norman Norwood Holland, 2009. LITERATURE AND THE BRAIN goes straight to the human core of literature when it explains the different ways our brains convert stories, poems, plays, and films into pleasure. When we are deep into a film or book, we find ourselves absorbed, unaware of our bodies or our surroundings. We don't doubt the existence of Spider-Man or Harry Potter, and we have real feelings about these purely imaginary beings. Our brains are behaving oddly because we know we cannot act to change what we are seeing. This is only one of the special ways our brains behave with literature. Ways that LITERATURE AND THE BRAIN reveals. 474 pp, 13 ill.

Servant-Leadership, Feminism, and Gender Well-Being Jiyong Song, Joe Walsh, Kae Reynolds, Jennifer Tilghman-Havens, Shann Ray Ferch, Larry C. Spears, 2022-09-01. In a world where leaders and organizations face global pandemics and power conflicts, gender dualism still prevails, and gender stereotyping and the glass ceiling continue to affect humanity's conceptualizations of leadership. How can we integrate the lost aspects of ourselves, often socialized by gender, so as to recover wholeness? How can we discern and develop the feminine and masculine within every leader? Servant Leadership, Feminism, and Gender Well-Being offers grace, strength, and hope by providing evidence of servant leaders crossing gender boundaries and integrating gendered traits and behaviors. Feminist ways of knowing, honoring both feminine and masculine giftedness, deepen the holistic foundation of servant leadership. By integrating female perspectives with male perspectives, a paradigm shift in leadership

theory through avenues inherent to servant leadership can move organizations from hierarchy driven rules based and authoritative models to value driven follower oriented and participative models
