Responsibility and Evidence in Oral Discourse Jane H. Hill, 1993-06-03 In Responsibility and evidence in oral discourse twelve prominent linguists and linguistic anthropologists examine responsibility authority and knowledge central but problematic concepts in contemporary anthropology Their detailed case studies analyze diverse forms of oral discourse everyday conversation conversational narrative song oratory divination and ritual poetry in societies in the Americas Africa Asia and the Pacific The studies show how speakers attribute responsibility for acts and states of affairs how particular forms of language and discourse relate to claims and disclaimers of responsibility and how verbal acts are themselves social acts subject to such attributions The volume challenges those cognitive theorists who locate responsibility for the meaning of verbal acts solely in the intentions of individual speakers Instead the contributors focus on the production of meaning between speakers and audiences in particular social and cultural contexts through dialogue and interaction which mediate between linguistic forms and their interpretations This landmark volume will serve for years to come as a point of reference in the study not only of responsibility and evidence but of reported speech authorship and other phenomena in the social life of language Besides linguistic and cultural anthropologists linguistics and folklorists it will interest also readers from pragmatics legal studies sociology religion and social psychology
