Restoration Of Temperate Wetlands:

Restoration of Temperate Wetlands Bryan D. Wheeler, 1995-06-08 Despite many wetland sites having suffered various forms of damage there has been a recent recognition that in some instances it may be possible to rectify this through deliberate and controlled restoration programmes Wetland restoration involves a variety of disciplines and interests concerning groups who are interested in wetland utilization such as farmers foresters peat extractors and water authorities as well as those who wish to safeguard the site or its wildlife such as conservationists natural historians ecologists and archaeologists Interaction between these action groups is regulated by planners and politicians and disagreements are frequently fuelled by an absence of reliable information In these circumstances wetland scientists have a responsibility to try to acquire and interpret relevant data in an informed objective and impartial way This volume reviews the current scientific knowledge of wetland restoration identifying the problems and opportunities associated with it Based on revised and edited contributions to the recent Restoration of Temperate Wetlands symposium it provides a broad overview of current information and experience of wetland restoration In some cases it highlights the lack of knowledge available and illustrates how difficult it can be to make informed decisions With contributions from Scandinavia Europe Australia the USA and Canada outlining the latest research and observations from a range of international wetland scientists and practitioners this book provides a critical review of current information and knowledge and gives insights into many aspects of wetland restoration with a focused approach to the ecological principles that underpin it **Creating and Restoring Wetlands**

Christopher Craft, 2022-05-12 **Creating and Restoring Wetlands From Theory to Practice** Second Edition describes the challenges and opportunities relating to the restoration of freshwater and estuarine wetlands in natural agricultural and urban environments in the coming century This second edition is structured by clearly defined chapters based on specific wetland types e g Peatlands Mangroves and with a consistent and coherent organization for ease of discoverability The table of contents is divided into four main subjects Foundations Restoration of Freshwater Wetlands Restoration of Estuarine Wetlands and From Theory to Practice each with multiple chapters Part 1 Foundations contains chapters describing definitions of wetlands ecological theory used to guide restoration and considerations on where to implement restoration on the landscape In Parts 2 and 3 restoration of specific freshwater marshes forests peatlands and estuarine tidal marshes mangroves wetlands are described Part 4 From Theory to Practice contains chapters describing performance standards to gauge success of projects and case studies describing small scale and large scale restoration projects of various freshwater and estuarine wetlands Each chapter contains clearly labeled sections which assist the reader to quickly and easily key in on the subject matter that they are seeking The approach of **Creating and Restoring Wetlands** is unique in that in each chapter it links ecological theory important to ecosystem restoration with practical techniques to undertake and implement successful wetland restoration projects including recommendations for performance standards to gauge success as well as realistic

expectations and timescales for achieving success Each chapter ends with a summary table describing keys to ensure success for a given wetland ecosystem Each chapter ends with a summary table describing keys to ensure success for a given wetland ecosystem Written by a single author providing a consistent structure that is coherent cohesive and well referenced Contains case studies of small and large scale restoration activities ensuring relevance to individuals and organizations

The Wetlands Handbook, 2 Volume Set Edward Maltby, Tom Barker, 2009-07-23 Forty two chapters by international experts from a wide range of disciplines make The Wetlands Handbook the essential tool for those seeking comprehensive understanding of the subject A departure from more traditional treatises this text examines freshwater wetland ecosystem science from the fundamentals to issues of management and policy Introductory chapters address the scope and significance of wetlands globally for communities culture and biodiversity Subsequent sections deal with processes underpinning wetland functioning how wetlands work their uses and values for humans and nature their sensitivity to external impacts and how they may be restored The text is illustrated by numerous examples emphasising functional and holistic approaches to wetland management including case studies on the wise use and rehabilitation of wetlands in farmed urban industrial and other damaged environments highlighting the long term benefits of multiple use The Wetlands Handbook will provide an invaluable reference for researchers managers policy makers and students of wetland sciences

An International Perspective on Wetland Rehabilitation W.J. Streever, 2012-12-06 Bill Streever author of Bringing Back the Wetlands and numerous technical articles about wetland restoration and creation worked for two years to bring together this collection of papers Authors ranging from private landowners to government managers to scientists present regional overviews case studies and discussions of various issues Regional overviews cover areas as small as the Commonwealth of the Northern Mariana Islands to areas as large as Australia and Africa Case studies range from relatively small projects such as rehabilitation of damage caused by wheel ruts in the high arctic to much larger projects such as attempts to rehabilitate thousands of hectares of Northern Territory wetlands in Australia Seedbank ecology economics remote sensing community involvement the role of the wetland consulting industry and other issues are discussed In an effort to synthesize information from around the world Joy Zedler presents a model that allows comparison of projects and may lead to better predictability of project outcomes In **An International Perspective on Wetland Rehabilitation** authors describe planting engineered structures prescribed flooding excavation and other rehabilitation methods from Israel to New Zealand to the Netherlands and elsewhere For the first time one volume offers an impression of the magnitude and diversity of the field of wetland rehabilitation around the globe
