**Politics, Policy, and Government in British Columbia** R. Kenneth Carty, 1996-09-23 Politics Policy and Government in British Columbia examines the political life of Canada's dynamic Pacific province. Each of the seventeen chapters written by well-known experts provides an up-to-date portrait and analysis of one of the many faces of B.C. politics. Taken together, they provide a clear and comprehensive overview of the dominant themes and issues that have been the distinguishing features of the province's political life. Key elements of the book include sections on the political setting with discussions of B.C.'s political culture and economy and its relations with the rest of Canada and its own Native communities; B.C. style politics which focus on electoral and parliamentary party politics; the changing place of women in B.C. public life and the critical role of the media in explaining it all to British Columbians; governing the province with accounts of the premier and cabinet; the bureaucracy that delivers most government services and the complex system from the police to the courts that provides the administration of justice and the rule of law; and contemporary policy issues with clear explanations of the intricacies of fiscal and social policy. Analyses of recent conflicts over forest policy and environmental protection, a discussion of the role of lobbyists, and an examination of what difference is made when NDP governments are elected. Anyone interested in B.C. or its politics will find this book an informative up-to-date record of the processes and events that have marked B.C.'s past and will continue to shape its future. **The Other Canon of Economics, Volume 1** Erik Reinert, 2024-02-13 Other Canon Economics Essays in the Theory and History of Uneven Economic Development brings together key essays on development economics from one of the most prolific and important development economists and historians of economic policy today. Erik S. Reinert argues through essays ranging from 1994 to 2020 that neo-classical economics damages developing countries; the theory of comparative advantage leaves out a number of factors which make economic activities qualitatively different as carriers of economic growth. Based on a long intellectual tradition started by the Italian economists Giovanni Botero 1589 and Antonio Serra 1613 and later used in virtually all presently industrialised countries, Reinert shows that the country which exports increasing returns goods (e.g. high end manufacture) has advantages over the country which exports diminishing returns goods (e.g. commodities). This has important implications for today's development strategies that Reinert argues should be seen as industrial strategies. **Cost-Benefit**
