Restructuring Eastern Europe The Microec

W. Bartlett, J. Bozikov, B. Rechel

Restructuring Eastern Europe The Microec:

Restructuring Eastern Europe Soumitra Sharma, 1997-01-01 Special attention is paid to the roles of corporate governance technological integration the role of environmental and regional policies and the reform of the banking system

Central Europe towards Monetary Union: Macroeconomic Underpinnings and Financial Reputation Ronald MacDonald, Rod Cross, 2012-12-06 A key objective of the Central European Economies CEE on their transition path from planned to more market oriented economies has been membership of the European Union EU The start of Economic and Monetary Union EMU in 1999 has added membership of the EMU to the agenda for the CEEs The task of the so called Vis grad countries the Czech and Slovak Republics Hungary and Poland of preparing for EU and EMU membership is the key theme underlying the papers contained in this volume There are many issues to be resolved before the Vis grad countries are admitted into the EU and this volume focuses on the issues relating to macroeconomic policies and financial sector structures The chapters of Central Europe Towards Monetary Union Macroeconomic Underpinnings and Financial Reputation contain new theoretical and empirical results and also comprehensive institutional overviews The intended readership of the book is policy makers and economists working in the academic and financial sectors

Small Enterprise Development in South-East Europe Will Bartlett, Milford Bateman, Maja Vehovec, 2012-12-06 Since the end of the Kosovo war in 1999 increasing attention has been paid to the problems of economic development and reconstruction in South East Europe In a context of limited resources small and medium sized enterprises SMEs have a key role to play in creating jobs and building a dynamic entrepreneurial economy Small Enterprise Development In South East Europe presents important findings from recent empirical research on key factors which hinder sustainable SME growth in South East Europe Finance is identified as a critical barrier to growth and the role of commercial banks micro finance institutions and credit cooperatives in assisting growth is addressed Yet finance alone is not enough A rebuilding of social capital a reduction of the unofficial or grey economy and the promotion of inter firm networks and clusters are also of vital importance in promoting sustainable growth The book concludes with critical analyses of SME policies in Albania Croatia and Macedonia countries which hitherto have received little attention in the literature Small Enterprise Development in South East Europe will be of great interest to policy makers business consultants and academics and post graduate students working on economic development and reconstruction in South East Europe

Health Reforms in South-East Europe W. Bartlett, J. Bozиков, B. Rechel, 2012-09-24 Over the last two decades the countries of South East Europe have engaged in far reaching reforms of their health systems However overviews of reform efforts in this part of Europe have been sorely lacking This book addresses this shortage through the analysis of key aspects of health reforms and health workforce mobility in South East Europe

Europe's Troubled Region William Bartlett, 2007-12-21 The countries of the Western Balkans Albania Bosnia and Herzegovina Croatia Macedonia Montenegro Serbia and the province of Kosovo form a core European region The region is

known for its instability and recent history of wars and civil conflicts but far less is known about the changes that have taken place in the economic and social welfare systems and the dynamic processes of transition development and European integration that have been taking place over the last twenty years Although economic growth has been firmly established many problems remain in relation to the labour markets where there is high unemployment large informal economies and widespread poverty The book discusses the role of welfare reforms international aid and European integration in addressing these difficulties The author argues that the resistance to reforms which were initiated under the communist system in former Yugoslavia led to the break up of the country and that since then a group of early reforming countries have made fast progress in institutional reform and have been at the forefront of EU integration He also acknowledges that the main problems have been among a group of late reformers including two international protectorates where aid dependence has held back progress with institutional reforms The book concludes that the resolution of these problems will unblock the completion of the transition development and EU integration in the region and open for the way for a more stable and prosperous future

Internationalization in Central and Eastern Europe Marin Alexandrov Marinov, 2018-04-27 This title was first published in 2002 This is a unique volume among the existing variety of publications on foreign direct investment FDI in Central and Eastern Europe CEE because it focuses on the internationalization process taking place there It addresses the rapid changes of the business climate in the region that have led to intensive internationalization of companies businesses and national economies Existing FDI books have mostly taken the perspective of attracting inward FDI flows missing the aspect of FDI outflows from CEE countries While foreign investors face the specific context of a region that poses new requirements to their internationalization strategies approaches and practices domestic companies must strive to make their businesses international Consequently the book presents the features of internationalization in CEE from home and host company and country perspectives providing a fresh perspective on this major economic problem

Catching Up and Falling Behind David A. Dyker, 2004 In this collection of essays David A Dyker explores some of the most difficult and fascinating aspects of the process of transition from autocratic real socialism to a capitalism that is sometimes democratic sometimes authoritarian The stress is on the economic dimension of transformation but the author sets the economic drama firmly within a political economy framework and a historical perspective Trends in key economic variables are analysed against the background of the struggle between different social and political groups for power and command over resources While the book pays due attention to topical issues like EU enlargement the underlying perspective is a long term one Transition is viewed not as a set of once and for all institutional changes or a process of short term stabilisation but as a historic opportunity to solve the inherited problem of poverty and underdevelopment in Central East Europe and the former Soviet Union The book ends with a critical assessment of how economics as a discipline has coped with the challenge of that historic opportunity

The End of Finance Jan Toporowski, 2002-03-11 This volume develops an original critique of the

belief that the present era of finance where finance markets dominate contemporary capitalist economies represents the best possible way of organising economic affairs. In fact it is argued the ensuing economic instability and inefficiency create the preconditions for the end of the dominance of finance. The End of Finance develops a theory of capital market inflation rooted in the work of Veblen, Kalecki, Keynes and Minsky demonstrating how it disinclines productive activity on the part of firms, provides only short term conditions that are propitious for privatisation and distorts monetary policy in the long term. The author examines the role of pension fund schemes and financial derivatives in transmitting capital market inflation and provides a nuanced analysis of the contradictory role they play in the financial system. Capital market inflation is also examined in its historical context and compared with past inflations in particular the South Sea and Mississippi Bubbles which spawned the first financial derivatives and the first privatisations. This broad historical vision allows us to see these forms of inflation as temporary and provisional in character.

Privatization, Corporate Governance and the Emergence of Markets E. Rosenbaum, F. Bönker, H. Wagener, 2000-03-23. The volume focuses on privatisation in transition countries addressing issues ranging from corporate governance to the relationship between privatisation and the emergence of markets from a multi disciplinary perspective. The contributors investigate both the theoretical groundwork of privatisation and enterprise restructuring as well as recent empirical evidence. The contributions show that changes in ownership titles are but one part of the story being closely interwoven as they are with the transformation of corporate governance, enterprise restructuring, network transformation and the emergence of markets.

The Microeconomics of Transformation and Growth European Association for Comparative Economic Studies, 1998. A theoretical and empirical discussion of the significance of a microeconomic approach to the transformation process in Eastern Europe. It reveals that microeconomic conditions constitute the framework for the successful restructuring and recovery of the post socialist countries in Europe.

Innovation and Structural Change in Post-Socialist Countries: A Quantitative Approach David A. Dyker, S. Radosevic, 2012-12-06. This book uses a range of S T and structural indicators to analyse the transformation process in particular the transformation of science, technology and industry in the former communist countries. The book originates from a sense of the tremendous need for quantitative indicators for assessing trends and performance in the post socialist economies. S T systems in the region have passed through the first phase of rapid deterioration or as it is called by some analysts, implosion. After ten years of transformation we are witnessing a process of increasing differentiation of these countries in terms of general patterns of growth and structural change as well as specific lines of restructuring in their S T systems. The question of sources of growth or indeed of stagnation is an increasingly urgent one from both the policy and academic perspectives. In that context there is a pressing need for in depth assessment of restructuring patterns in science, technology and industry in the region as a basis for understanding how restructuring in S T is linked to industrial restructuring and to general economic and social transformation. As the contributions to this volume show, there is now a

critical mass of quantitative data across the post socialist countries which deserves to be studied more thoroughly in a comparative manner The changes of the last ten years have produced varying patterns of adjustment which are now clearly visible in S T and structural indicators Canadian-American Slavic Studies ,1997 **Enterprise Restructuring and the Role of Managers in Russia** Gary Krueger,2015-07-17 This book tells the story of what might have been considered an unlikely source of dynamic change in Russia formerly state owned manufacturing enterprises and their managers Based on interviews conducted over a six year span with managers at 47 manufacturing light industry consumer durable and food processing firms in four Russian cities the study documents the real world challenge of turning hidebound often dysfunctional manufacturing operations into thriving companies With analytical rigor and theoretical creativity this work will dispel some common misconceptions about the Russian economy and make a contribution to the literature about management company strategies and corporate governance *Foreign Direct Investments in the Estonian Economy* Tartu Ülikool. Majandusteaduskond,2001 **Environmental Taxation in Practice** Thomas Sterner,2017-05-15 Since the 1980 s market based instruments for environmental policy have become increasingly important Focusing on environmental taxation in practice this volume collects key contributions on a wide range of topics including comparisons of environmental taxation schemes in different countries political economy issues and key aspects of concrete implementation It presents a wealth of ex ante and ex post analyses intended as a source of guidance for policy implementation and research The volume features a full length introduction locating the literature on environmental taxation in practice in a wider context of theoretical and applied issues **Transitional Survival Strategies of Peripheral Resource Communities in Hungary and North-Western Russia** Eira Varis,2000 Composition of Foreign Direct Investment and Protection of Intellectual Property Rights in Transition Economies Beata Smarzynska,1999 *Industrial and Labor Relations Review* ,2012 Transition in Survival: Enterprise Restructuring in Twenty East German and Hungarian Companies 1990-1997 Enese Lieb-Doczy,2019-07-16 This title was first published in 2001 This work features different companies and their change in situation between 1990 and 1997 The author focused on changes in each company s vertical integration its integration with and relationship to its investor changes in its human resource policies and the general handling of labour shedding changes in its product range production methods product markets and competitive situation and the regional effects of FDI and changes in the company s procurement policies The study comprises mainly of manufacturing companies with a few construction companies included to examine issues arising from localized company operations Small Firms and Entrepreneurship in Central and Eastern Europe Oliver Pfirrmann,Günter H. Walter,2012-12-06 Much of the research on transformation transition in Central and Eastern European Countries CEECs focuses on macroeconomic issues inflation economic growth employment Little research has been devoted so far to microeconomic analysis Recently the issue of new enterprises and firm founders has moved to the centre of economic and policy considerations Readers of this book will learn about the role played by these firms in the

transformation of central and eastern European countries The book also includes contributions from Central and Eastern Europe on which little or no investigation has been performed until now Yugoslavia Romania Slovakia
