Electricity Restructuring Mark Gaffigan,2009-03 In 1999 the Fed Energy Regulatory Commission FERC began encouraging the voluntary formation of Regional Transmission Org RTO independent entities to manage regional networks of electric transmission lines FERC oversees 6 RTOs that cover 35 states and D C and serve over half of U S electricity demand As electricity prices increase stakeholders have voiced concerns about RTO benefits and how RTO expenses and decisions influence electricity prices This report reviews 1 RTO expenses and key investments in property plant and equipment from 2002 to 2006 2 how RTOs and FERC review RTO expenses and decisions that may affect electricity prices and 3 is there is consensus about RTO benefits Charts and tables      Alternating Currents Timothy J. Brennan,Karen L. Palmer,Salvador Martinez,2002 Annotation Many states within the U S and many countries across the world are opening their electricity markets to competition Many others are uncertain about their plans These differences emphasize the complexities involved in the technology and regulatory structure of the electricity industry an industry for which the introduction of market competition has been notoriously difficult In response to these challenges Alternating Currents provides a timely overview and analysis of the concerns facing industry regulators legislators and others as they consider whether when and how to open electricity markets      **Restructuring the Electric Power Industry in New Jersey** New Jersey. Marat Terterov, 2004-09 *Doing Business with Russia's Electrical Energy Sector* examines the vast Russian energy system as it is being updated and restructured to become an integral part of the global energy system. This guide highlights commercial opportunities and explains business practice in the sector including the investment climate, legislation, plans for restructuring, regional system development, international cooperation and other relevant topics. Major investment projects from the Russian electricity industry and some of the major regional electricity companies are also discussed. *Monthly Energy Review* ,

*Energy Law and the Environment* Rosemary Lyster, Adrian Bradbrook, 2006-08-31 Unsustainable practices worldwide in energy production and consumption have led to a plethora of environmental problems. Until recently, environmental law largely overlooked the relevance of energy production and consumption; energy was seen to be of little significance to the advancement of sustainable development. This has changed since 2000 with the global concern attached to climate change. The publication by the United Nations of the World Energy Assessment and the detailed consideration given to this issue at the World Summit on Sustainable Development in Johannesburg in 2002, Australia has been seen to be lagging behind the other major industrialised nations of the world in addressing sustainable energy issues. This book was first published in 2006.
