Nelson,2020-04-17 For decades social scientists have assumed that fictive kinship is a phenomenon associated only with marginal peoples and people of color in the United States In this innovative book Nelson reveals the frequency texture and dynamics of relationships which are felt to be like family among the white middle class Drawing on extensive in depth interviews Nelson describes the quandaries and contradictions delight and anxiety benefits and costs choice and obligation in these relationships She shows the ways these fictive kinships are similar to one another as well as the ways they vary whether around age or generation co residence or the possibility of becoming real families Moreover she shows that different parties to the same relationship understand them in some similar and some very different ways Theoretically rich and beautifully written the book is accessible to the general public while breaking new ground for scholars in the field of family studies What is The Family of Law? Alan Brown,2019-02-07 This book argues that the legal understanding of family in the UK continues to be underpinned by the idealised image of the nuclear family premised upon the traditional gendered roles of father as breadwinner and mother as homemaker This examination of the law s model of the family has been prompted by the substantial reforms that have taken place in family law in recent decades and the significant evolution in social attitudes and familial practices that has occurred in parallel

Throughout the book the influence of the nuclear family is noted in several different contexts various specific legal definitions of family the legal regulation of adult conjugal relationships the attribution of legal parenthood and the construction of the role of the parent within the law Ultimately this book argues that while these reforms have resulted in additional categories of relationship coming to be situated within the nuclear family model there has not as yet been any fundamental alteration of the underpinning concept of the nuclear family itself This book concludes by considering the possibilities offered beyond the nuclear family exploring the reconceptualising of the legal understanding of family around alternative and potentially radical models of family

The War Between the State and the Family Patricia Morgan, 2017-07-28 Patricia Morgan's core assumption is that the family is an extremely effective vehicle for raising the welfare of its members If this is correct it is quite possible that the state can best support the family by doing very little by not taxing the family heavily and by minimizing the subsidization of those who choose alternatives to financially self

sustaining family life At one level Morgan argues the family can be seen as a unit within which there occurs enormous transfer of economic resources between husband and wife parents and children and on a wider scale within extended families The family is the most important vehicle of welfare and the welfare vehicle of first resort Within the family many services are provided by family members to each other rarely for direct personal benefit Basic economic analysis Morgan asserts suggests that the family could be seriously undermined if the state provided significant support for dependents who are not brought up within self sustaining family units and if it also provided services such as childcare that are generally provided within families This work shows that this is precisely what has happened in the last twenty five years The driving force of significantly reduced family formation is not economic but social Perhaps social changes have led to a desire by individuals to bring up children in family circumstances different from those of a generation or two ago but evidence does not support this hypothesis Rather tax and benefit systems seem to be important determinants of family structure worldwide Patricia Morgan does not simply analyze the problem she also suggests policy solutions The author argues that divorce laws should be reformed to ensure that those who make commitments are held financially responsible The author s argument is compelling because it is backed up with strong evidence and is argued from an unemotional economic perspective individuals within families are rational agents who respond to incentives
