Learning from the Federal Market? Based Reforms William J. Mathis, Tina M. Trujillo, 2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation's most prominent

researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity

Classroom Conversations Alexandra Miletta, 2008-10-07 In Classroom Conversations two generations of educators a mother and daughter point us to the great thinkers who have shaped their beliefs and practices in education and

who continue to influence teachers today Nineteen essays by educators from Dewey to Delpit offer parents and new educators an education degree in a nutshell The Miletas frame these touchstone texts with commentary explaining why these writers resonate for them sharing not only the personal meanings they have derived from the selections but why these writings have endured in the field over time Brief biographies set each author in context for the lay reader As educational fads and jargon come and go parents and teachers alike will appreciate and find value in the wisdom distilled here Classroom Conversations will help experienced teachers find renewed meaning in these seminal essays and will help younger teachers discover just how important the work they do can be For parents the book will inform and enrich their understanding of their children s educational experience **Z Magazine** ,2004 **Pencils Down** Wayne Au,Melissa Bollow Tempel,2012 This powerful collection from the groundbreaking Rethinking Schools magazine takes high stakes standardized tests to task Despite overwhelming evidence that the tests are invalid ways to measure teaching and learning and continuing signs of their unjust effects on students and teachers reformers and policymakers continue to force high stakes tests into the public schools Through articles that provide thoughtful and emotional critiques from the frontlines of education Pencils Down deconstructs the damage that standardized tests wreak on our education system and the human beings that populate it Better yet it offers visionary forms of assessment that are not only more authentic but also more democratic fair and accurate

Postcolonial Representations of Women Rachel Bailey Jones,2011-06-11 In this accessible combination of post colonial theory feminism and pedagogy the author advocates using subversive and contemporary artistic representations of women to remodel traditional stereotypes in education It is in this key sector that values and norms are molded and prejudice kept at bay yet the legacy of colonialism continues to pervade official education received in classrooms as well as unofficial education ingested via popular culture and the media The result is a variety of distorted images of women and gender in which women appear as two dimensional stereotypes The text analyzes both current and historical colonial representations of women in a pedagogical context In doing so it seeks to recast our conception of what difference is challenging historical patriarchal gender relations with their stereotypical representations that continue to marginalize minority populations in the first world and billions of women elsewhere These distorted images the book argues can be subverted using the semiology provided by postcolonialism and transnational feminism and the work of contemporary artists who rethink and recontextualize the visual codes of colonialism These resistive images created by women who challenge and subvert patriarchal modes of representation can be used to create educational environments that provide an alternative view of women of non western origin Unequal By Design Wayne Au,2010-04-26 Unequal By Design critically examines high stakes standardized testing in order to illuminate what is really at stake for students teachers and communities negatively affected by such testing This thoughtful analysis traces standardized testing s origins in the Eugenics and Social Efficiency movements of the late 19th and early 20th century through its current use as the central tool for national educational reform

via *No Child Left Behind* By exploring historical social economic and educational aspects of testing author Wayne Au demonstrates that these tests are not only premised on the creation of inequality but that their structures are inextricably intertwined with social inequalities that exist outside of schools

Teaching Marx Curry Malott,John M. Elmore,Mike Cole,2013-05-01 We are in the midst of yet another global crisis in capitalism In the UK we have the most right wing and ideologically driven government since Thatcher a ruthless cabal of millionaires intent on destroying the welfare state In the US President Obama whose initial record did not live up to the expectations of many on the Left is increasingly driven by right wing republicanism and other corporate interests At the same time there are developments in

Latin America in particular Venezuela which are heralding the dawn of a new politics and recovering the voice of Marx but with a twenty first century socialist focus thus giving hope to the lives of millions of working people throughout the world This is why the world media is intent on discrediting President Hugo Ch vez and insisting that ordinary people have to pay the cost of the crisis in capitalism The Arab Spring and the Occupy movement also show signs of an anti capitalist movement in embryo In Greece perhaps more than anywhere else in Europe even France the austerity stricken working classes are pushing for real existing socialism It is therefore not surprising that the ruling class of Greece is increasingly supporting the neo Nazi fascist Golden Dawn party threatening civil war should they lose power as a class Now is a prescient time to bring twenty first century socialism to the educational institutions of the world to teach Marx across the curriculum and across the globe Through this volume our goal was to contribute to the literature by concretely demonstrating the practical implications of Marx s theory to curriculum However while this book provides concrete examples of how Marx can and has informed a revolutionary critical education it is not intended to be prescriptive That is the chapters should not be read as a how to guide but they should be taken as inspiration for new creative approaches to Teaching Marx and interpreting and posing The Socialist Challenge
