Rethinking Time The Origins And Evolution Of A Concept:

The Origin of Time Heath Massey, 2015-02-23 A critical examination of the relationship between the philosophies of Martin Heidegger and Henri Bergson focusing on the central issue of time The recent renewal of interest in the philosophy of Henri Bergson has increased both recognition of his influence on twentieth century philosophy and attention to his relationship to phenomenology Until now the question of Martin Heidegger's debt to Bergson has remained largely unanswered Heidegger's brief discussion of Bergson in *Being and Time* is geared toward explaining why he fails in his attempts to think more radically about time Despite this dismissal a close look at Heidegger's early works dealing with temporality reveals a sustained engagement with Bergson's thought In *The Origin of Time* Heath Massey evaluates Heidegger's critique of Bergson and examines how Bergson's efforts to rethink time in terms of duration anticipate Heidegger's own interpretation of temporality Massey demonstrates how Heidegger follows Bergson in seeking to uncover primordial time by disentangling temporality from spatiality how he associates Bergson with the tradition of philosophy that covers up this phenomenon and how he overlooks Bergson's ontological turn in *Matter and Memory* Through close readings of early major works by both thinkers Massey argues that Bergson is a much more radical thinker with respect to time than Heidegger allows

Rethink Steven Poole, 2017-11-07 A brilliant and groundbreaking argument that innovation and progress are often achieved by revisiting and retooling ideas from the past rather than starting from scratch from The Guardian columnist and contributor to The Atlantic Baker Taylor

Rethinking American History in a Global Age Thomas Bender, 2002-05-14 In

One eloquent essay after another some of the wisest historians of our time write American history in a grand cosmopolitan context From the era of discovery to the present histories that we thought we knew of labor of race relations of politics of gender relations of diplomacy of ethnicity are more richly understood when causes and consequences are traced throughout the globe One emerges invigorated ready to welcome a new American history for a new international century Linda K Kerber author of *No Constitutional Right to Be Ladies Women and the Obligations of Citizenship* *Rethinking American History in a Global Age* is an extremely stimulating and thought provoking collection of essays written by leading historians who offer wider contexts for illuminating the traditional themes and issues of American national history Particularly impressive is the book's combination of caution and original sometimes daring insights David Brion Davis author of *In the Image of God Religion Moral Values and Our Heritage of Slavery* For decades American historians have been urging one another to place

our culture in comparative or transnational perspective Thomas Bender's unique volume includes not only essays theorizing such efforts and essays exemplifying such work at its most successful and its most provocative it also provides more skeptical assessments questioning whether American historians can meet the challenge of overcoming our longstanding national preoccupations *Rethinking American History in a Global Age* is an indispensable book that will shape the work of a rising generation of historians whose horizons will extend beyond our own shores James T Kloppenberg author of *The Virtues of Liberalism* *Rethinking the Principles of War* Anthony McIvor, 2012-11-16 This new work features the fresh thinking of twenty eight leading authors from a variety of military and national security disciplines Following an introduction by Lt Gen James Dubik Commander I Corps U S Army and an opening essay titled *State of the Question* by Dr Colin Gray the anthology first considers the general question of *An American Way of War* Sections on operational art with writers addressing the issues in both conventional and small wars stability and reconstruction and intelligence complete the volume Among the well known contributors are Fred Kagan Ralph Peters Harlan Ullman and Milan Vego This collection of essays is the outcome of a seminar series sponsored by the Office of Force Transformation and the U S Navy to examine the future of warfare and the underlying principles of war and to educate future military strategists and leaders on these principles Footnotes index and a bibliographic essay make the work a useful tool for students of war and general readers alike *The Origin and Evolution of Life on Earth* David W. Hollar, 1992 Covers the major works from the late 1800s to the present Aimed at anyone interested in the subject regardless of whether the reader is a layperson a high school or college student or a research scientist

Rereading Darwin's Origin of Species Richard G. Delisle, James Tierney, 2022-02-10 Widely seen as evolution's founding figure Charles Darwin is taken by many evolutionists to be the first to propose a truly modern theory of evolution Darwin's greatness however has obscured the man and his work at times even to the point of distortion Accessibly written this book presents a more nuanced picture and invites us to discover some neglected ambiguities and contradictions in Darwin's masterwork Delisle and Tierney show Darwin to be a man who struggled to reconcile the received wisdom of an unchanging natural world with his new ideas about evolution Arguing that Darwin was unable to break free entirely from his contemporaries more traditional outlook they show his theory to be a fascinating compromise between old and new Rediscovering this other Darwin and this other side of *On the Origin of Species* helps shed new light on the immensity of the task that lay before 19th century scholars as well as their ultimate achievements **A Companion to Global Historical Thought** Prasenjit Duara, Viren Murthy, Andrew Sartori, 2014-01-21 A COMPANION TO GLOBAL HISTORICAL THOUGHT A Companion to Global Historical Thought provides an overview of the development of historical thinking from the earliest times to the present directly addressing issues of historiography in a globalized context Questions concerning the global dissemination of historical writing and the relationship between historiography and other ways of representing the past have become important not only in the academic study of history but also in public arenas in many countries With contributions

from leading international scholars the book considers the problem of the global in the multiplicity of traditions of narrating the past in the global dissemination of modern historical writing and of the global as a concept animating historical imaginations It explores the different intellectual approaches that have shaped the discipline of history and the challenges posed by modernity and globalization while illustrating the shifts in thinking about time and the emergence of historical thought Complementing A Companion to Western Historical Thought this book places non Western perspectives on historiography at the center of discussion helping scholars and students alike make sense of the discipline at the start of the twenty first century

United States History James Warren Oberly, 1995 The Columbia History of Western Philosophy Richard Henry Popkin, 1999 Richard Popkin has assembled 63 leading scholars to forge a chronological account of the development of Western philosophical traditions From Plato to Wittgenstein and from Aquinas to Heidegger this volume provides lively in depth and up to date historical analyses of all the key figures schools and movements of Western philosophy Each chapter includes an introductory essay and Popkin provides notes that draw connections among the separate articles The rich bibliographic information and the indexes of names and terms make the volume a invaluable resource

Plurihistoricity Zoltán Boldizsár Simon, 2025-07-25 This book situates historical scholarship within a plurihistoricity of contemporary historical culture exploring conflicting conceptions of historical change in technological utopias of human enhancement in prospects of human extinction in societal responses to the Anthropocene and in the imperative of bringing colonial patterns of historical injustice to justice Contemporary societies increasingly reclaim history from the academic pursuit of historiography On the one hand societal engagement in history is growing palpably History is literally everywhere in the fallen statues of past political regimes in trajectories of environmental degradation and in technological prospects of space expansion On the other hand societal demand for history seems to diminish rather than strengthen the authority of professionalized historical studies What do these societal historicities stand for How do they create pasts that matter What futures do they desire or attempt to avoid How do they view the historical transitions into those futures And what is the societal role of historical scholarship and scholarly conceptions of history in the plurihistoricity of contemporary historical culture By addressing these questions Simon s book is essential reading for everyone interested in the present and future of viewing the world historically

The Routledge Handbook to Rethinking Ethics in International Relations Birgit Schippers, 2020-05-21 Discussing cutting edge debates in the field of international ethics this key volume builds on existing work in the normative study of international relations It responds to a substantial appetite for scholarship that challenges established approaches and examines new perspectives on international ethics and that appraises the ethical implications of problems occupying students and scholars of international relations in the twenty first century The contributions written by a team of international scholars provide authoritative surveys and interventions into the field of international ethics Focusing on new and emerging ethical challenges to international relations and approaching existing challenges through the lens of

new theoretical and methodological frameworks the book is structured around five themes New directions in international ethics Ethical actors and practices in international relations The ethics of climate change globalization and health Technology and ethics in international relations The ethics of global security Interdisciplinary in its scope this book will be an important resource for scholars and students in the fields of politics and international relations philosophy law and sociology and a useful reference for anyone who wishes to acquire ethical competence in the area of international relations *The Future of Social Epistemology* James H. Collier, 2015-12-02 The Future of Social Epistemology A Collective Vision sets an agenda for exploring the future of what we human beings reimagining our selves and our society want need and ought to know The book examines concretely practically and speculatively key ideas such as the public conduct of philosophy models for extending and distributing knowledge the interplay among individuals and groups risk taking and the welfare state and envisioning people and societies remade through the breakneck pace of scientific and technological change An international team of contributors offers a collective vision one that speaks to what they see unfolding and how to plan and conduct the dialogue and work leading to a knowable and desirable world The book describes and advances an intellectual agenda for the future of social epistemology **Cultural History and Education** Thomas S. Popkewitz, Barry M. Franklin, Miguel A. Pereyra, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company *The Music of Reality* Ylia Callan, 2025-07-31 Discover the hidden symphony of the cosmos in The Music of Reality This book explores how vibration resonance and frequency shape everything from the formation of the universe to the rhythms of human emotion Journey through the origins of sound the sacred harmonies underlying life and the intricate architecture of music as it mirrors the cosmos itself Through engaging chapters you ll explore How ancient instruments and early human expression connect us to universal rhythms The role of breath movement and the body as instruments in the orchestra of life Silence resonance and the emotional power of music The connections between musical frequencies memory and the passage of time The possibility of a universal music scale bridging life brain activity Earth and the cosmos How vibration underpins reality linking science consciousness and creativity Perfect for musicians scientists and seekers alike The Music of Reality invites you to hear the universe in a new way revealing a cosmic score that resonates through matter mind and spirit The Concept of History Dmitri Nikulin, 2017-01-26 The Concept of History reflects on the presuppositions behind the contemporary understanding of history that often remain implicit and not spelled out It is a critique of the modern understanding of history that presents it as universal and teleological progressively moving forward to an end Although few contemporary philosophers and historians maintain the view that there is strict universality and teleology in history the remnants of these positions still affect our understanding of history But if history is not universal and singular evolving toward an objective universal end it should be possible to admit of multiple histories some of which we appropriate as our own An another important aspect of this book is that it provides an account of history that is itself both historical and rooted in attempts to narrate and explain history from

its inception in antiquity The book seeks to establish features or constituents of history that might be found in any historical account and might themselves be considered historical invariants in history

The Time of Anthropology Elisabeth Kirtsoglou, Bob Simpson, 2020-12-29 The Time of Anthropology provides a series of compelling anthropological case studies that explore the different temporalities at play in the scientific discourses governmental techniques and policy practices through which modern life is shaped Together they constitute a novel analysis of contemporary chronopolitics The contributions focus on state power citizenship and ecologies of time to reveal the scalar properties of chronopolitics as it shifts between everyday lived realities and the macro institutional work of nation states The collection charts important new directions for chronopolitical thinking in the future of anthropological research The Introduction and Chapters 5 6 and 8 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Globalization: The Career of a Concept Manfred Steger, Paul James, 2017-10-02 One of the keywords of our time globalization frames how we understand our interconnected world An ambiguous signifier carrying multiple meanings the term is usually used to refer to the extension and intensification of social relations across the world Many works have been authored that deal with various aspects of globalization However it is surprising that no critical history of the concept has yet provided a historical mapping of its conceptual origins evolution and genealogical lineages This book investigates the meaning formation of globalization by featuring interviews with twelve prominent academic pioneers of the new trans disciplinary field of Global Studies who were central in forging the career of the concept of globalization Together with an introductory chapter these interviews clarify how and why a previously obscure scholarly concept suddenly exploded in the public discourse of the 1990s In particular the interviews trace the processes by which economistic discourses of free market economics became the basis for the influential association of the meaning of globalization with the dominant neoliberal framework of the 21st century This book was originally published as a special issue of Globalizations
