## Rethinking Objectivity:

**Rethinking Objectivity** Allan Megill, 1994 Although objectivity is a term used widely in many areas of public discourse from discussions concerning the media and politics to debates over political correctness and cultural literacy the question What is objectivity is often ignored as if the answer were obvious In this volume Allan Megill has gathered essays from fourteen leading scholars in a variety of fields history anthropology philosophy psychology history of science sociology of science feminist studies literary studies and accounting to gain critical understanding of the idea of objectivity as it functions in today's world In diverse essays the authors provide fascinating studies of objectivity in such areas as anthropological research corporate and governmental bureaucracies legal discourse photography and the study and practice of the natural sciences Taken together Megill argues this volume calls for developing a notion of objectivities The absolute sense of objectivity that is objectivity as a God's eye view must be supplemented and in part supplanted by disciplinary procedural and dialectical senses of objectivity This book will be of great interest to a broad range of scholars as it presents current thinking on a topic of fundamental concern across the disciplines in the humanities and social sciences Contributors Barry Barnes Dagmar Barnouw Lorraine Code Lorraine Daston Johannes Fabian Kenneth J Gergen Mary E Hawkesworth Barbara Herrnstein Smith Evelyn Fox Keller George Levine Allan Megill Peter Miller Andy Pickering Theodore M Porter

thought provoking book explores the multifaceted phenomenon of objectivity and its relations to various aspects of jurisprudence legal interpretation and practical reasoning Featuring contributions from an international group of researchers from differing legal contexts it addresses topics relevant not only from a theoretical point of view but also themes directly connected with legal and judicial practice      **The Many Faces of Clio** Q. Edward Wang, Franz L. Fillafer, Georg G.

Iggers, 2007 Born in Germany Georg Iggers escaped from Nazism to the United States in his adolescence where he became one of the most distinguished scholars of European intellectual history and the history of historiography In his lectures delivered all over the world and in his numerous books translated into many languages Georg Iggers has reshaped historiography and indefatigably promoted cross cultural dialogue This volume reflects the profound impact of his oeuvre Among the contributors are leading intellectual historians but also younger scholars who explore the various cultural contexts of modern historiography focusing on changes of European and American scholarship as well as non Western historical writing in relation to developments in the West Addressing these changes from a transnational perspective this well rounded volume offers an excellent introduction to the field which will be of interest to both established historians and graduate students      **The Politics of Objectivity** Peter J. Steinberger, 2015-08-10 Modern political conflict

characteristically reflects and represents deep seated but also unacknowledged and unanalyzed disagreements about what it means to be objective In defending this proposition Peter J Steinberger seeks to reaffirm the idea of rationalism in politics by examining important problems of public life explicitly in the light of established philosophical doctrine The Politics of Objectivity invokes thereby an age old though now widely ignored tradition of western thought according to which all political thinking is inevitably embedded in and underwritten by larger structures of metaphysical inquiry Building on earlier studies of the idea of the state and focusing on highly contested practices of objectivity in judgement this book suggests that political conflict is an essentially discursive enterprise deeply implicated in the rational pursuit of theories about how things in the world really are      **Archaeological Approaches to Cultural Identity** S. J. Shennan, 2003-05-20 Examines the

critical implications of cultural identity from a variety of perspectives Questions the nature and limits of archaeological knowledge of the past and the relationship of material culture to cultural identity      *Revisiting Intelligence and Policy* Stephen Marrin, 2023-04-14 The relationship between intelligence organizations and the national security policymakers which they support has its ups and downs Sometimes the relationship is a good one communication flows and both sides benefit from the interaction but sometimes difficulties arise and problems develop For example when knowledge is required for decision but is not available or is inaccurate the outcome is frequently described as an intelligence failure A subset of this kind of intelligence failure occurs when knowledge is distorted in order to reinforce or oppose policymaker preferences or expectations Another less successful outcome occurs when good accurate knowledge is not used to improve policy but is instead set aside or ignored by those who have the responsibility and obligation to make decisions This collection explores

the difficulties that can arise in the relationship between intelligence and policy The chapters consider both politicization of and lack of receptiveness to intelligence on the part of policymakers from a variety of different angles Readers will find that this book challenges conventional wisdom and offers new ways of thinking about this important but understudied area This book was published as a special issue of *Intelligence and National Security*

**Pathology and Visual Culture** Natasha Ruiz-Gómez, 2024-05-01 In this book Natasha Ruiz G me z delves into an extraordinary collection of pathological drawings photographs sculptures and casts created by neurologists at Paris s H pital de la Salp tri re in the nineteenth century Led by Dr Jean Martin Charcot 1825 1893 and known collectively as the Salp tri re School these savants artistes produced works that demonstrated an engagement with contemporary artistic discourses and the history of art even as the artists clinicians professed their dedication to absolute objectivity During his lifetime Charcot became internationally famous for his studies of hysteria and hypnosis establishing himself as a pioneer in modern neurology However this book brings to light the often overlooked contributions of other clinicians such as Dr Paul Richer who created scientific artworks that merged scientific objectivity with artistic intervention Challenging conventional interpretations of visual media in medicine Ruiz G me z analyzes how these images and objects documented symptoms and neuropathology while defying disciplinary categorization Grounded in extensive archival research *Pathology and Visual Culture* targets an international audience of historians and students of art visual culture medicine and the medical humanities It will also captivate neurologists and anyone interested in fin de si cle French history and culture

**Chaos and Cosmos** Karen Lang, 2018-08-06 Writing in 1940 the prominent German art historian Erwin Panofsky asked How then is it possible to build up art history as a respectable scholarly discipline if its objects come into being by an irrational and subjective process In *Chaos and Cosmos* Karen Lang addresses the power of art to resist the pressures of the transcendental vantage point history Uncovering the intellectual and cultural richness of the early years of academic art history in Germany the period from the 1880s to 1940 she explores various attempts within art history to transform aesthetic phenomena chaos into the cosmos of a systematic unified field of inquiry Lang starts by examining Panofsky s approach to aesthetic phenomena in his early theoretical essays alongside Ernst Cassirer s contemporaneous publications on the substance and function of scientific concepts and on Einstein s theory of relativity She then turns to the subject of aesthetic judgment through a rereading of Kantian subjectivity and Kant s uneasy legacy in art history From here Lang considers the different organizing theories of symbolic form proposed by Aby Warburg and Cassirer as well as Goethe s inspiration for both Alois Riegl s notion of age value and Walter Benjamin s conceptions of the aura concluding with an extended examination of objectivity and the figure of the art connoisseur Extensively illustrated with works of art from the Enlightenment to the present day this venturesome book illuminates an intellectual legacy that has profoundly shaped the study of the history of art in ways that have until now been largely unacknowledged Addressing the interplay of chaos and cosmos in terms of history art history philosophy and epistemology Lang traces shifts in point of

view in art history and the way these shifts change aesthetic objects into historical objects and even objects of knowledge
