A Guide to Formulation in Coaching David A. Lane, Sarah Corrie, Louise C. Kovács, 2025-06-25 Lane Corrie and

Kovacs present a foundational text for coaches wishing to improve their coaching practice through use of formulation. A Guide to Formulation in Coaching examines the nature and purpose of formulation and how to develop effective formulations that can inform and improve practice. It combines theoretical perspectives with case studies illustrating its use in different coaching contexts to provide a comprehensive and accessible account of the purpose, perspectives and processes used in formulation. In addition to providing practice-based examples and drawing on the literature, the book provides a series of exercises to enable readers to refine their individual approaches. Practical and accessibly written, this book will be a valuable resource for coaches and coaching psychologists, coaching supervisors and trainers, and academics interested in understanding the role of formulation and how it applies in a coaching context. [Research Skills for Management Studies](#)

Alan Berkeley Thomas, 2004-08-02. The recent growth of interest in the systematic study of management has transformed a once neglected area of research into one that now attracts a huge number of postgraduate students. Despite this, there has been a distinct lack of research guides tailored specifically for management studies. Designed as a comprehensive introduction to the main phases of a research project, this textbook fills that void. It leads students from the very first stage of initiation through to final publication, considering the nature of research skills and the fundamental elements of the research process whilst exploring the institutional context in which management research is carried out. Taking current debates and the surrounding philosophical and strategic issues in hand, this book combines the key theories with the best practical advice to offer a completely rounded introduction to the topic. It includes guidance and specific reference to real management research projects as well as case examples, activities and further reading lists, and is essential reading for anyone undertaking a management studies research project.
