Rethinking Our World:

Rethinking Our World Philip Higgs, Jane Smith, 2007 Outlining the major figures and proponents of numerous and varied philosophies including empiricism existentialism phenomenology hermeneutics systems theory postmodernism and feminism this guidebook places a critical and creative eye towards many of society's traditionally held beliefs Providing readers with the tools to analyze life and to answer existential questions this aide contextualizes each philosophy in modern terms to ensure accessibility and understanding A tabulation of each philosophy's merits and weaknesses is also included to help maximize learning **Rethinking Our Story** G. Douglas Hammack, 2014-01-13 If it ain't broke don't fix it But it's no secret that the Christian church is broke and does need fixing Despite great effort things are going badly for us We've tried trendy and tech savvy entrepreneurial and coffee house gritty They're not helping Our problem is deeper than that Our problem is our instincts instincts informed by our story There was a time when the Christian church was a powerfully transformative presence in society It can be again but it will require radical rethinking of the story that informs our instincts And it's time It's been five hundred years since the Reformation our last major update Today is a pivotal moment in history With our worldview upended by quantum physics history is demanding we renew the Christian story for our times **Rethinking Our Story** reframes the elements of the Christian narrative for the new era It explores quantum ways of thinking about God human nature Jesus salvation and the afterlife The future of the church and the health of our society depend on our willingness to rethink retell and live out a better story We will either update our instincts and contribute to the earth's well being or disappear into oblivion **Rethinking Our World** Philip Higgs, J. Smith, 2004-05 **The Oxford Handbook of Ecocriticism** Greg Garrard, 2014 The Oxford Handbook of Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard's subversive uses of the pastoral John Clare's sacred relationship with the land Thoreau's profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovich Michael Clayton and Al Gore's An Inconvenient Truth **Rethinking Our World** Maja Göpel, 2023-05-11 A

radical vision for a better future an economy that works for us rather than the other way around Our world is at a tipping point and we feel it every day Costs are rising the gap between the rich and poor is increasing natural resources are depleted and the effects of climate change are starting to take hold We are under increasing social and environmental stress But as leading economist Maja G pel argues here there is another path forward She invites us to imagine what we want our future to look like and offers solutions that will help us to get there It s time to question our principles set new goals and re evaluate our priorities Time to rethink our world and find new ways of living that don t drain our planet any further We need a fair distribution of wealth and a way to reconcile the social with the ecological We need to work smarter not harder Critical yet full of encouragement Maja G pel chooses surprising and enlightening examples to illustrate how we can leave behind our familiar ways of living to achieve a better future

Faith Thinking, Second Edition Trevor Hart,2020-11-12 Faith Thinking provides a stimulating introduction to some vital questions of method in Christian theology The book argues that faith commitments are necessary not in theology alone but in all serious acts of our knowing anything at all as human beings Knowledge in other words is always bound to be the outcome of some process of faith seeking understanding Fresh consideration is given too in this book to relationships obtaining between the authoritative canon of Scripture tradition and reason in the theological task Finally in this new edition an important reevaluation is undertaken of the potentially explosive impact of truth claims in a post truth world

Knowledge Systems of Societies for Adaptation and Mitigation of Impacts of Climate Change Sunil Nautiyal,K.S. Rao,Harald Kaechele,K.V. Raju,Ruediger Schaldach,2013-07-09 Climate change is broadly recognized as a key environmental issue affecting social and ecological systems worldwide At the Cancun summit of the United Nations Framework Convention on Climate Change s 16th Conference the parties jointly agreed that the vulnerable groups particularly in developing countries and whose livelihood is based on land use practices are the most common victims as in most cases their activities are shaped by the climate Therefore solving the climate dilemma through mitigation processes and scientific research is an ethical concern Thus combining the knowledge systems of the societies and scientific evidences can greatly assist in the creation of coping mechanisms for sustainable development in a situation of changing climate International Humboldt Kolleg focusing on knowledge systems of societies and Climate Change was organized at ISEC This event was of unique importance as the year 2011 12 was celebrated as the 60th Anniversary of Diplomatic Relations between India and Germany with the motto Germany and India Infinite Opportunities This volume is the outcome of the papers presented during the IHK 2011 at ISEC India

Rethinking the Politics of Education Nick Peim,2022-05-10 Rethinking the Politics of Education provides an entirely original rethinking of the modern and contemporary mythology of education Problematizing the ideas concerning education as fulfilment and redemption the book critically reviews the association of education with projects of social justice democracy and improvement This book argues for a fundamental rethinking of what education is exploring how things stand with education and educational apparatuses in

the contemporary world It examines relations between educational discourses and their implied ontological stances and offers new ways of thinking that draw on ontological positions from psychoanalytical philosophical and social discourses The book contends that education is an essential form of politics and must be understood through a careful examination of its history modes of operation and its basic structures rather than an idealized version of what it might be Presenting an original and alternative account of a theoretically informed political ontology of education the book will be of great interest to academics researchers and postgraduate students interested in the philosophy of education the politics of education educational theory and the sociology of education

Atheism and Love in the Modern Era Colby Dickinson,2025-04-17 Discussing the decline of faith and the rise of love in the modern era Colby Dickinson proposes a critique of religious belief which addresses how a secular world can continue to mine religious traditions for their conceptual and emotional riches **Atheism and Love in the Modern Era** argues that theism and atheism taken together can peel back the layers of abstraction alienation and disillusionment that always accompany our humanity in order to help us really see how it is to exist in this world To illuminate this vision Dickinson takes up the notion of love as a cultivation and practice of indifference as a letting go of one's identity a crucial concept that unites both religion and atheism through a concerted effort to detach from them both The book is organized into four sections each situating the concept of love in relation to a distinct theme the first outlines modern secularized versions of various religious concepts such as technology in the place of miracles or art in the place of religious revelation The second argues that in a pluralistic world the actual lived realities of various religious communities and persons defy the static categories and classifications grouped under the umbrella of religion The third section discusses and defines non absolute love The fourth section discusses how atheism in its critiques of religion misses the significance of de centring the act of love Dickinson elaborates his reflections through lucid engagement with a variety of thinkers including i ek Agamben Irigaray Derrida Erich Fromm Charles Taylor and Philip Kitcher This is essential reading for those interested in popular debates around theism and atheism as well as those concerned with the ways in which continental and analytic philosophy have addressed the continued significance of religious traditions

Big Data? Martin Hand,Sam Hillyard,2014-11-07 This book examines and engages with the ambivalence of digitization illuminating the diverse ways in which researchers approach negotiate understand and interpret objects and practices of digital research

Being Spiritual but Not Religious William B. Parsons,2018-05-30 In its most general sense the term Spiritual but Not Religious denotes those who on the one hand are disillusioned with traditional institutional religion and on the other hand feel that those same traditions contain deep wisdom about the human condition This edited collection speaks to what national surveys agree is a growing social phenomenon referred to as the Spiritual but Not Religious Movement SBNRM Each essay of the volume engages the past present and future's of the SBNRM Their collective contribution is analytic descriptive and prescriptive taking stock of not only the various analyses of the SBNRM to date but also the establishment of a new ground

Sloterdijk's Anthropotechnics Patrick Roney,Andrea Rossi,2022-03-16 Peter Sloterdijk is an internationally renowned philosopher and thinker whose work is now seen as increasingly relevant to our contemporary world situation and the multiple crises that punctuate it including those within ethical political economic technological and ecological realms This volume focuses upon one of his central ideas anthropotechnics Broadly speaking anthropotechnics refers to the technological constitution of the human as its fundamental mode of existence which is characterized by the ability to create dwelling places that immunize human beings from exterior threats while at the same time instituting practices and exercises that call on humanity to transcend itself ascetically The essays included in this volume enter a critical dialogue with Sloterdijk and his many philosophical interlocutors in order to interrogate the many implications of anthropotechnics in relation to some of the most pressing issues of our time including and especially the question of the future of humanity in relation to globalism and modernization climate change the post secular neoliberalism and artificial intelligence The chapters in this book were originally published as a special issue of Angelaki *Rethinking College Education* George Allan,1997 Not a method of turning your degree back in and having your loans forgiven but an argument that by becoming vocational schools measured by reduced cost and efficient production colleges and universities are neglecting their essential purpose The reason for college education says Allan is to provide an environment within which students can absorb the moral practices that determine how they can acquire and evaluate knowledge best conduct their lives and become responsible adults He maintains that such learning requires imagination dialogue conversation and cultured intercourse Annotation copyrighted by Book News Inc Portland OR **Interfaith Education for All** Duncan R. Wielzen,Ina Ter Avest,2017-10-10 Living together

in the midst of diversity is an issue of pivotal importance all over the world in particular for people involved in the education of the younger generation. The search intended in this publication is to find the means to go beyond mere tolerance of differences. Education as envisioned in this book engages learners in active citizenship and enables pupils and students young people to transform their social environment. Learning about the other and to a certain extent appreciating the other's perspective together with acquiring dialogical skills are key elements for learning to live together with people from different cultural backgrounds and with diverse religious and secular worldviews. Hence faith development dialogicality and citizenship are central themes in this publication. This book brings together the latest insights and best practices available in the fields of religious education from around the world which are reflected upon by distinguished scholars in the field. The input provided by the three parts of this book will give every educator further food for thought be it in the classroom at home or in leisure activities. The diversity approach of this book is mirrored in the composition of the team of editors. Duncan Wielzen is a theologian with research interest in religious education in plural societies. Ina Ter Avest is a psychologist with a focus on the intersectionality of psychology culture and religion. The focus of both editors is on interfaith education its implication and further development.

Earth Revealing; Earth Healing Denis Edwards, 2015-05-15. The damage human beings are doing to the atmosphere the seas the rivers the land and the life forms of the planet is extreme and deadly. It constitutes a crisis that demands all of humanity's wisdom ingenuity and commitment. The whole human community needs to be involved in the response to this crisis young and old women and men farmers politicians gardeners teachers planners scientists engineers artists builders cooks and theologians. In *Earth Revealing Earth Healing* the authors attempt to make clear the way in which Christian theology opens out into a theology of Earth revealing and challenges us towards a practice of Earth healing. *Earth Revealing Earth Healing* offers a rethinking of theology as a significant part of the rethinking that the human community must do in its stance toward creation. Aware that some theological attitudes have contributed to exploitative attitudes and to disregard for the good of the planet the contributors are also convinced that the biblical and theological tradition has resources that can be retrieved and developed as an ecological theology. Such a theology can contribute to the healing of our planet. The chapters of *Earth Revealing Earth Healing* stretch across a number of theological sub-disciplines and related areas. Among the perspectives from the Christian theological tradition there are reflections on the theology of the Trinity Christology Christian anthropology the theology of the Holy Spirit and contemporary feminist theology. There are also more general philosophical and cultural perspectives including discussions of place and of landscape traditions. Finally there are practical perspectives including discussions of globalization the challenge of suffering and bioethics. Essays and contributors are: *The Landscape Tradition A Broader Vision for Ecotheology* by Stephen Downs *Globalization and Ecology* by Christine Burke *IBVM For Your Immortal Spirit Is in All Things The Holy Spirit in Creation* by Denis Edwards *Enfleshing the Human An Earth Revealing Earth Healing Christology* by Duncan Reid *God's Shattering*
