Rethinking Urban Policy:

Rethinking Urban Policy National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on National Urban Policy, 1983-02-01

Independent Cities Robert J. Waste, 1998 Since at least 1990 American cities have been forced to deal with high levels of poverty hunger homelessness crime and low levels of funding for mass transit infrastructure needs and education *Independent Cities* explores the factors which have caused the decline of America's major industrial cities with particular attention paid to the effects of federal policies The author gives an overview of policy makers opinions and offers his own inventive solutions detailing what American cities will need to do in the late 1990s and the early part of the next century to help create strong healthy independent cities

Rethinking Urban Policy Royce Hanson, 1983 **Rethinking Urban Policy** National Research Council Staff, **Rethinking Urban Transformations** Nebojša Čamprag, Lauren Uğur, Anshika Suri, 2023-09-29 This edited volume delves into the intricate challenges that cities face in the midst of evolving socio-political economic and environmental landscapes With a focus on inclusivity and diversity the book thoroughly examines the transformation of urban systems and their manifestations within broader spatial contexts Employing a trans and interdisciplinary approach the editors have strategically curated diverse research clusters to address key aspects of inclusive urban transformation from multiple perspectives These clusters explore alternative paradigms for sustainable urban transformation the dynamics of city regions inclusive tourism development the decontestation of urban heritage to diversify urban identities and inclusive intersectional city making practices By fostering collaboration and cross-pollination among these clusters the volume fosters a transdisciplinary understanding of inclusive and sustainable urban transformation facilitating the development of more holistic approaches in conceptualizing and promoting inclusive urban theory and praxis

Rethinking Urban Policy Michael Ward, 1994 **Rethinking Urban Transitions** Andrés Luque-Ayala, Simon Marvin, Harriet Bulkeley, 2018-03-15 *Rethinking Urban Transitions* provides critical insight for societal and policy debates about the potential and limits of low carbon urbanism It draws on over a decade of international research undertaken by scholars across multiple disciplines concerned with analysing and shaping urban sustainability transitions It seeks to open up the possibility of a new generation of urban low carbon transition research which foregrounds the importance of political geographical and developmental context in shaping the possibilities for a low carbon urban future The book's contributions propose an interpretation of urban low carbon transitions as primarily social political and developmental processes Rather than being primarily technical efforts aimed at measuring and mitigating greenhouse gases the low carbon transition requires a shift in the mode and politics of urban development The book argues that moving towards this model requires rethinking what it means to design practise and mobilize low carbon in the city while also acknowledging the presence of multiple and contested developmental pathways Key to this shift is thinking about transitions not solely as technical

infrastructural or systemic shifts but also as a way of thinking about collective futures societal development and governing modes a recognition of the political and contested nature of low carbon urbanism The various contributions provide novel conceptual frameworks as well as empirically rich cases through which we can begin to interrogate the relevance of socio economic political and developmental dimensions in the making or unmaking of low carbon in the city The book draws on a diverse range of examples including world cities and ordinary cities from North America South America Europe Australia Africa India and China to provide evidence that expectations aspirations and plans to undertake purposive socio technical transitions are both emerging and encountering resistance in different urban contexts Rethinking Urban Transitions is an essential text for courses concerned with cities climate change and environmental issues in sociology politics urban studies planning environmental studies geography and the built environment Rethinking Urban Sprawl Moving Towards Sustainable Cities OECD,2018-06-14 This report provides a new perspective to the nature of urban sprawl and its causes and environmental social and economic consequences **National Academy Press ... Nonprofits in Urban America Cynthia Jackson-Elmoore,Richard C. Hula,2000-09-30 From their experience in nonprofit operations and their understanding of the realities of urban politics the editors of this wide ranging volume and their contributors dig into issues seldom explored in the literature They study the role of nonprofits in local governing coalitions the potential of nonprofits to replace social welfare programs their efforts to restructure key elements of the local political process and the unanticipated internal impacts of the changing roles of nonprofit organizations in the urban community The result is a compelling argument that to understand life in contemporary American cities we must take into account the expanding role of nonprofit organizations their response to increased service demands and their participation in common efforts to direct policy choices Hula Jackson Elmoore and their panel of scholars researchers and close observers of urban policymaking focus on the delivery of social services to illustrate the complex and important set of roles that nonprofits have assumed As social programs are cut at all levels of government it is often believed that nonprofits can and should take up the slack and restore at least some portion of the cutbacks in such services They examine how some nonprofit organizations have taken a proactive stance in this regard by implementing efforts that do not simply react to political and social change but attempt to initiate and guide it instead They attempt to change the political environment in which they operate and the result has been to change the face of local politics in many jurisdictions Each chapter of their book explores these expanding and emerging roles Themes and focuses vary which in turn reflects the variation and complexity within the nonprofit sector itself At the same time each chapter presents an emerging political or policy role now being played by today s nonprofits and voluntary associations and a theoretical context in which such activities and behavior can best be understood Scholars and advanced students in public administration economics and nonprofit management as well as executive level nonprofit managers will find here an important update on what is happening in their special worlds and the knowledge they need to

make sense of it **Advanced City** Ali Cheshmehzangi, 2025-09-01 Evolution is by choice This is not a passive truth but a conscious commitment one that lies at the heart of what I call the Advanced City Coined and thoroughly introduced here in the book this new concept is based on people centric and data informed processes to enhance our cities and communities for their future and not for imagining future cities This is not another model in the long line of urban prescriptions nor a distant techno utopia to be fantasized It is a paradigm shift an invitation to think feel and build differently The Advanced City is a lived revolution a dynamic process grounded in values purpose and practice Too often we romanticize the future city glass towers flying cars machines and robots everywhere data driven dreams But these visions distract us from the urgency of the present They bypass the real work of transformation by projecting change onto an abstract tomorrow The Advanced City asks something deeper What kind of cities are we actively creating today here and now It is not about waiting for innovation to arrive It is about choosing a different path rooted in responsibility equity and long view thinking This book is not about cities as machines markets or spectacles It is about cities as ecosystems of meaning struggle creativity and care The Advanced City is a movement of re engagement for academics for planners for civic leaders and for all who call the city home It calls on us to be co creators of our urban futures not passive consumers of predesigned and predetermined solutions We need radical honesty about the failures of current systems and the intellectual courage to reimagine what s possible The advanced city resists the illusion of smartness and returns us to human truths interdependence justice and purpose It is about making change not waiting for it So this is not a new product for urban branding it is rather a process for transformation a paradigm shift and an urban revolution A call to co create cities that are not merely advanced in function but advanced in wisdom Here I also call for the development of Brother Cities and Advanced Development Goals ADGs If not now when If not us who Let the Advanced City be an urban revolution of now and the future to be lived not later but now not for the future cities but for the future of our cities and communities Infinite Suburbia MIT Norman B.
