Retirement Counseling A Handbook For Action:

Retirement Counseling Jane E. Myers, Harold C. Riker, 2014-07-22 This portrays retirement as an exceptional opportunity for individuals to create new lifestyles for themselves The authors encourage professionals in various fields to assist pre retirees as well as retirees in planning for a stimulating retirement future The Columbia Retirement Handbook Abraham Monk, 2010-06-01 The Columbia Retirement Handbook Grieving Beyond Gender Kenneth J. Doka, Terry L. Martin, 2011-01-19 Grieving Beyond Gender Understanding the Ways Men and Women Mourn is a revision of Men Don't Cry Women Do Transcending Gender Stereotypes of Grief In this work Doka and Martin elaborate on their conceptual model of styles or patterns of grieving a model that has generated both research and acceptance since the publication of the first edition in 1999 In that book as well as in this revision Doka and Martin explore the different ways that individuals grieve noting that gender is only one factor that affects an individual's style or pattern of grief The book differentiates intuitive grievers where the pattern is more affective from instrumental grievers who grieve in a more cognitive and behavioral way while noting other patterns that might be more blended or dissonant The model is firmly grounded in social science theory and research A particular strength of the work is the emphasis placed on the clinical implications of the model on the ways that different types of grievers might best be supported through individual counseling or group support *Dealing with Dying, Death, and Grief during Adolescence* David E. Balk, 2014-02-18 For some life's introduction to death and grief comes early and when it does it can take many forms Not only does *Dealing with Dying Death and Grief during Adolescence* tackle them all it does so with David Balk's remarkable sensitivity to and deep knowledge of the pressures and opportunities adolescents face in their transition from childhood to adulthood In seamless jargon free language Balk brings readers up to date with what we know about adolescent development because over time such changes form the backstory we need to comprehend the impact of death and bereavement in an adolescent's life The book's later chapters break down the recent findings in the study of life threatening illness and bereavement during adolescence And crucially these chapters also examine interventions that assist adolescents coping with these difficulties Clinicians will come away from this book with both a grounded understanding of adolescent development and the adolescent experience of death and they'll also gain specific tools for helping adolescents cope with death and grief on their own terms For any clinician committed to supporting adolescents facing some of life's most difficult experiences this integrated up to date and deeply insightful text is simply the book to have David E Balk is professor in the department of health and nutrition sciences at Brooklyn College CUNY where he directs the graduate program in thanatology He is the author of *Adolescent Development Early Through Late Adolescence* *Helping the Bereaved College Student* and several other books on death and bereavement He is also co editor of the 2nd edition of the *Handbook of Thanatology* Routledge 2013 **Parenting After the Death of a Child** Jennifer L. Buckle, Stephen J. Fleming, 2011-01-19 The death of a child has a tremendous and overwhelming impact on parents and

siblings completely altering the psychological landscape of the family In the aftermath of such a tragedy parents face the challenge of not only dealing with their own grief but also that of their surviving children How can someone attempt to cease parenting a deceased child while maintaining this role with his her other children Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children Parenting After the Death of a Child A Practitioner s Guide addresses this complex and daunting dilemma Following on the heels of a qualitative research study that involved interviewing bereaved parents both fathers and mothers Buckle and Fleming have put together several different stories of loss and recovery to create an invaluable resource for clinicians students and grieving parents The authors present the experience of losing a child and its subsequent impact on a family in a novel and effective way demonstrating the strength and importance of their book for the counseling field **Bereavement Care for Families**

David W. Kissane, Francine Parnes, 2014-01-03 Grief is a family affair When a loved one dies the distress reverberates throughout the immediate and extended family Family therapy has long attended to issues of loss and grief yet not as the dominant therapeutic paradigm Bereavement Care for Families changes that it is a practical resource for the clinician one that draws upon the evidence supporting family approaches to bereavement care and also provides clinically oriented strategic guidance on how to incorporate family approaches into other models Subsequent chapters set forth a detailed research based therapeutic model that clinicians can use to facilitate therapy engage the ambivalent deal with uncertainty manage family conflict develop realistic goals and more Any clinician sensitive to the roles family members play in bereavement care need look no further than this groundbreaking text *AIDS, Fear and Society* Kenneth J.

Doka, 2014-05-01 Historically AIDS is just one of a series of dreaded diseases that have aroused both great fear and irrational actions The previous diseases including bubonic plague syphilis tuberculosis leprosy and cancer have evoked such a sense of dread that rational moves to halt the disease have become compromised This text examines the deep sense of fear that AIDS evokes stigmatizing those who suffer from the disease as well as their families and caregivers Until AIDS can be seen for what it actually is a life threatening disease policies providing for humane treatment will not evolve The book also emphasizes that diseases are more than biological phenomena or individual catastrophes they are profoundly social events The ways in which diseases are spread and treated are strongly influenced by larger sociological considerations and they may have the capacity to change social institutions or society itself Rooting Aids In The History Of Diseases The First Part Of The book reviews the nature history and responses of earlier dreaded diseases The next section examines AIDS itself proposed as the archetypal dreaded disease Already creating a sense of panic AIDS is also shown to be a social disease likely to have significant effects on the social order Thus only by containing the epidemic of fear and controlling the resulting irrationality can the AIDS epidemic be halted **Widow to Widow** Phyllis R. Silverman, 2004 Widow to Widow powerfully links theory and practice perspectives through the extensive use of case illustrations its comprehensive knowledge base and

the challenge to the professional monopoly of bereavement care makes this an important text for all carers new or experienced who are offering support to the widowed Linda Machin in BereavementCare Vol 25 No 2

Working with the Bereaved Simon Shimshon Rubin, Ruth Malkinson, Eliezer Witztum, 2012 *Working With the Bereaved* summarizes the major themes in bereavement research and clinical work and uses the authors' own cutting edge research to show mental health practitioners how to integrate these themes into their practice. It provides clinicians with a framework for exploring their own emotional and intellectual assumptions about loss and bereavement and it goes on to summarize state of the art thinking in the field. The heart of the book focuses on the theoretical and clinical implications of the empirically validated Two Track Model of Bereavement as well as a variety of therapeutic techniques designed to help the bereaved both reapproach life and manage their continuing bonds with the deceased. The later chapters examine methods for integrating systems and family perspectives in therapy for attending to the implications of culture and religion and for meeting crises and emergencies in bereavement care. The concluding chapter addresses self care, well being and resilience offering practical guidelines for both the bereaved and those who treat them.

The Art of Grief J. Earl Rogers, 2011-02-10 Art and other expressive therapies are increasingly used in grief counseling not only among children and adolescents but throughout the developmental spectrum. Creative activities are commonly used in group and individual psychotherapy programs but it is only

relatively recently that these expressive modalities have been employed within the context of clinical grief work in structured settings. These forms of nonverbal communication are often more natural ways to express thoughts and feelings that are difficult to discuss, particularly when it comes to issues surrounding grief and loss. Packed with pictures and instructional detail, this book includes an eight-session curriculum for use with grief support groups as well as alternative modalities of grief art therapy. Voices of Bereavement Joan Beder, 2013-01-11. Voices of Bereavement presents counselors with specific, sometimes unusual bereavement situations and their subsequent treatment. Joan Beder blends theoretical content with suggestions for intervention, helping the reader appreciate how theory informs practice. In addition, a section on counselor struggles focuses on what feelings were provoked in the counselor during each case and how these feelings were managed.
