Roam Reader On The Aesthetics Of Mobility:

Reader on the Aesthetics of Mobility Anthony Hoete, 2003 What is it like to wander from one place to another with no particular objective or direction Operating at different reading speeds ROAM alternates an architectural perspective on the urban environment and mobility with essays on art cultural studies design and politics With contributions by photographer Andrew Cross architect Zaha Hadid animator Geoffrey de Crecy writer Neil Olliberia two architectural practices Monolab and NL Architects and the FAT cross disciplinary group Communications and Mobility David Morley, 2017-06-26 Communications and Mobility is a unique interdisciplinary look at mobility territory communication and transport in the 21st century with extended case studies of three icons of this era the mobile phone the migrant and the container box Urges scholars in media and communication to return to broader conceptions of the field that include mobility of all kinds information people and commodities Embraces perspectives from media studies science and technology studies sociology media anthropology and cultural geography Discusses ideas of virtual and embodied mobility network geographies de territorialization sedentarism nomadology connectivity containment and exclusion Integrates the often neglected transport studies into contemporary communication studies and theories of globalization *The Oxford Handbook of Mobile Music Studies, Volume 2* Sumanth Gopinath, Jason Stanyek, 2014-03 The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical electrical and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile portable fungible and ubiquitous At once a marketing term a common mode of everyday life performance and an instigator of experimental aesthetics mobile music opens up a space for studying the momentous transformations in the production distribution consumption and experience of music and sound that took place between the late nineteenth and the early twenty first centuries Taken together the two volumes cover a large swath of the world the US the UK Japan Brazil Germany Turkey Mexico France China Jamaica Iraq the Philippines India Sweden and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility Volume 2 investigates the ramifications of mobile music technologies on musical sonic performance and aesthetics Two core arguments are that mobility is not the same thing as actual movement and that artistic production cannot be absolutely sundered from the performances of quotidian life The volume's chapters investigate the mobilization of frequency range by sirens and miniature speakers sound vehicles such as boom cars ice cream trucks and trains the gestural choreographies of soundwalk pieces and mundane interactions with digital media dance music practices in laptop and iPod DJing the imagery of iPod commercials production practices in Turkish political music and black popular music the aesthetics of handheld video games and chiptune music and the mobile device as a new musical instrument and resource for musical ensembles The Wireless Spectrum Barbara Crow, Michael Longford, Kim Sawchuk, 2010-06-18 As evidenced by the clientele in any urban coffee shop devices such as cell phones BlackBerries and Wi Fi enabled laptops have proliferated

particularly during the past ten years The Wireless Spectrum explores how wireless technologies have modified both individual and public life transforming our experiences of space time and place while reshaping our day to day interactions Bringing together visual artists designers activists and communication and humanities scholars to reflect on mobile media this collection engages a new terrain of interdisciplinary research Interrogating these new forms of community and communication practices as they are emerging in Canada and around the world the essays in The Wireless Spectrum ask how these new technologies transfigure subjectivities creating new forms of social behaviour and provocative aesthetic practices

Designing Ubiquitous Information Environments: Socio-Technical Issues and Challenges Carsten Sørensen, Youngjin Yoo, Kalle Lyytinen, Janice I. DeGross, 2006-01-17 This book records one of the continuous attempts of the IFIP Working Group 8.2 studying the interaction of information systems and the organization to explore and understand the shifting boundaries and dependencies between organizational activities and their computer support The book marks the result of the IFIP WG 8.2 conference on Designing Ubiquitous Information Environments Socio Technical Issues and Challenges Since its inception in the late 1970s IFIP WG 8.2 has sought to understand how computer based information systems interact and must be designed as an integrated part of the organizational design At that time information systems handled repetitive and remote back office functions and the main concern was work task design for repetitive input tasks and the potential impact of improved information support on organizational decision making and structure The focus of the information system design shifted in the 1980s when computers became part of the furniture and moved into the office Reflecting this significant change IFIP WG 8.2 in 1989 organized a conference dedicated to the design and impact of desktop technology in order to examine how organizational processes and the locus of action changed when the computer was moved into the office Sixteen years later we are experiencing another significant change Computers are now becoming part of our body and sensory system and will move out of the traditional office locations and into the wilderness Again IFIP WG 8
