It is a generational saga spanning parts of three centuries that reveals a great deal not just about his unique basketball journey but about America itself. Through hundreds of interviews with Johnson's coaches, representatives, past and present teammates, opponents, friends, and loved ones, as well as key conversations with Johnson himself over the years, Lazenby has produced the first truly definitive study, both dark and light, of Earvin Magic Johnson Jr., the revolutionary player, the icon, the man.

Quantum Dots T. Chakraborty, 1999-11-30. This book deals with the electronic and optical properties of two low-dimensional systems: quantum dots and quantum antidots, and is divided into two parts. Part one is a self-contained monograph which describes in detail the theoretical and experimental background for exploration of electronic states of the quantum confined systems. Starting from the single electron picture of the system, the book describes various experimental methods that provide important information on these systems. Concentrating on many electron systems,

theoretical developments are described in detail and their experimental consequences are also discussed The field has witnessed an almost explosive growth and some of the future directions of explorations are highlighted towards the end of the monograph The subject matter is dealt with in such a way that it is both accessible to beginners and useful for expert researchers as a comprehensive review of most of the developments in the field Furthermore the book contains 37 reprinted articles which have been selected to provide a first hand picture of the overall developments in the field The early papers have been arranged to portray the developments chronologically and the more recent papers provide an overview of future direction in the research
