New Ethics For The Publics Health:

New Ethics for the Public's Health Dan E. Beauchamp, Bonnie Steinbock, 1999-07-29 Most books about ethics and health focus on issues arising from individual patients and their relationships with doctors and other health professionals. More and more however ethical issues are challenges that face entire communities not just individual patients. This book is an edited collection of readings that addresses these public health challenges. Many of the issues considered such as policy for alcohol and other drugs, newly emergent epidemics and violence prevention are public health concerns beyond the purview of traditional bioethics. Others such as access to health care, managed care, reproductive technologies and genetic testing are covered in bioethics texts but here they are approached from the distinct viewpoint of public health. The book makes explicit the community perspective of public health as well as the field's emphasis on prevention. It examines the conceptual issues raised by the public health perspective i.e. what is meant by community, the common good and individual autonomy as well as the policies that can be developed when health problems are approached in population based preventive terms. *Ethical Challenges in the Management of Health Information* Laurinda B. Harman, 2006 Reference for clinicians and healthcare information management professionals addressing the multifaceted ethical challenges of working with sensitive health information in an ethical way. The philosophy of public health includes metaphysical questions such as what do we mean by public in public health? How ought we to conceptualise the idea of populations? Are they merely aggregations of individuals? It also includes epistemological questions such as what methods are most appropriate for thinking about public health? How do empirical and normative issues relate to each other? Controversial ethical, political and social issues including those relating to vaccinations, the threat of pandemics and possible restrictions to
