**Detain and Deport** Nancy Hiemstra, 2019 Detention and deportation have become keystones of immigration and border enforcement policies around the world The United States has built a massive immigration enforcement system that detains and deport more people than any other country This system is grounded in the assumptions that national borders are territorially fixed and controllable and that detention and deportation bolster security and deter migration Nancy Hiemstra's multisited ethnographic research pairs investigation of enforcement

practices in the United States with an exploration into conditions migrants face in one country of origin Ecuador Detain and Deport s transnational approach reveals how the U S immigration enforcement system s chaotic organization and operation distracts from the mismatch between these assumptions and actual outcomes Hiemstra draws on the experiences of detained and deported migrants as well as their families and communities in Ecuador to show convincingly that instead of deterring migrants and improving national security detention and deportation generate insecurities and forge lasting connections across territorial borders At the same time the system s chaos works to curtail rights and maintain detained migrants on a narrow path to deportation Hiemstra argues that in addition to the racialized ideas of national identity and a fluctuating dependence on immigrant labor that have long propelled U S immigration policies the contemporary emphasis on detention and deportation is fueled by the influence of people and entities that profit from them *Software Engineering and Formal Methods* Carlos Canal,Akram Idani,2015-01-31 This book constitutes revised selected papers from the workshops collocated with the SEFM 2014 conference on Software Engineering and Formal Methods held in Grenoble France in September 2014 The 26 papers included in this volume were carefully reviewed and selected from 49 submissions They are from the following workshops the 1st Workshop on Human Oriented Formal Methods From Readability to Automation HOFM 2014 the 3rd International Symposium on Modelling and Knowledge Management Applications Systems and Domains MoKMaSD 2014 the 8th International Workshop on Foundations and Techniques for Open Source Software Certification Open Cert 2014 the 1st Workshop on Safety and Formal Methods SaFoMe 2014 and the 4th Workshop on Formal Methods in the Development of Software WS FMDS 2014
