Numbers In Your Head:

Number Training Your Brain: Teach Yourself Jonathan Hancock, Jon Chapman, 2011-05-27 Train your brain to be quicker sharper and more acute by challenging yourself with these puzzles and games This book does much more than give you the skills to tackle maths with confidence instead it shows you how by learning to solve practical problems and perfecting your mental arithmetic you can strengthen all your key thinking skills and astonish your friends and family This is the ultimate mental workout and the only one to show you how these fun and diverting number games will actually make you smarter quicker and more acute than any of your peers

Number Connections Rose Griffiths, 2005 Mental Math Abhishek VR, 2019-05-19 Discover the Mental Math Secrets to Become a Human Calculator Schools taught you a way to do math that works when you have a pen paper But the same methods takes a lot of effort when you have to do math in your head This is because it uses a lot of your working memory the short term memory used to complete a mental task For example try to mentally multiply $73\ 201 \times 3$ It might take only a few seconds to multiply the individual digits But if you multiply right to left the way you learnt in school you will rely on your working memory You will use it to recall every single digit you calculate to put it back together and get your final answer You may even find yourself calculating some digits again because you forgot one of the numbers The difficulty increases further when you have to multiply larger numbers like 732×323 You will have to remember numbers across many steps Mental arithmetic would be a lot easier to do in your head if you didn't have to remember so many numbers In school you learnt to write the down numbers as you calculate to free up your working memory In mental math there are many other ways to do the same thing One of the tricks to free up your working memory is to calculate from left to right instead of right to left Try multiplying $73\ 201 \times 3$ from left to right starting from 7×3 and ending with 1×3 You will find yourself calling out the answer before you even finish the whole problem You can use this trick to solve any math problem in the future But we have just scratched the surface There are many more tricks inside the book that make doing mental math as easy as reading a comic Here is a glimpse of what you will be able to master

Mentally add large numbers Example Add $8739\ 5492$ in your head in seconds Subtract numbers fast Example Mentally subtract $7520\ 4998$ without writing anything down Multiplication tricks to multiply three digit numbers Example Multiply 323×123 in your head Square large numbers in seconds Example Calculate 64×64 faster than a calculator Mentally divide large numbers Example Divide 601324 by 73 entirely in your head Quickly check a calculation with 90% accuracy without recalculating Overcome math anxiety Cement your mental math skills with bonus weekly training This book only has the best techniques used by over 27 mental and Vedic math experts across the world The techniques in this book are so simple you will wonder why nobody taught you this before You will be able to master it even if you have failed math in school Imagine waking up tomorrow being able to do lightning fast math in your head Your family friends will look at you like you are some kind of a genius Since you do the calculations in your head you will acquire better mental habits in the process So you will

not just look like a genius You will actually be one Buy Now To Become A Human Calculator Every minute you wait to buy this book is another minute you don't see the benefit of being good with math numbers Put the power of mental math to work in your life so you can quickly easily make math and numbers more useful develop better memory habits increase concentration develop new ways to think and do speed math entirely in your head faster than a calculator Get your copy today A MUST BUY for students of Vedic Mathematics GMAT GRE SAT Case Study Interview and Case Interview Head First Physics Heather Lang, 2008-09-24 Wouldn't it be great if there were a physics book that showed you how things work instead of telling you how Finally with Head First Physics there is This comprehensive book takes the stress out of learning mechanics and practical physics by providing a fun and engaging experience especially for students who just don't get it Head First Physics offers a format that's rich in visuals and full of activities including pictures illustrations puzzles stories and quizzes a mixed media style proven to stimulate learning and retention One look will convince you This isn't mere theory this is physics brought to life through real world scenarios simple experiments and hypothetical projects Head First Physics is perfect for anyone who's intrigued by how things work in the natural world You'll quickly discover that physics isn't a dry subject It's all about the world we live in encompassing everything from falling objects and speeding cars to conservation of energy and gravity and weightlessness and orbital behavior This book Helps you think like a physicist so you can understand why things really work the way they do Gives you relevant examples so you can fully grasp the principles before moving on to more complex concepts Designed to be used as a supplement study guide for the College Board's Advanced Placement Physics B Exam Introduces principles for the purpose of solving real world problems not memorization Teaches you how to measure observe calculate and yes how to do the math Covers scientific notation SI units vectors motion momentum conservation Newton's Laws energy conservation weight and mass gravitation and orbits circular motion and simple harmonic motion and much more If Myth Busters and other TV programs make you curious about our physical world or if you're a student forced to take a physics course now you can pursue the subject without the dread of boredom or the fear that it will be over your head Head First Physics comes to rescue with an innovative engaging and inspirational way to learn physics

Fantastic Numbers and Where to Find Them Antonio Padilla,2022-07-26 A fun dazzling exploration of the strange numbers that illuminate the ultimate nature of reality For particularly brilliant theoretical physicists like James Clerk Maxwell Paul Dirac or Albert Einstein the search for mathematical truths led to strange new understandings of the ultimate nature of reality But what are these truths What are the mysterious numbers that explain the universe In *Fantastic Numbers and Where to Find Them* the leading theoretical physicist and YouTube star Antonio Padilla takes us on an irreverent cosmic tour of nine of the most extraordinary numbers in physics offering a startling picture of how the universe works These strange numbers include Graham's number which is so large that if you thought about it in the wrong way your head would collapse into a singularity TREE 3 whose finite nature can never be definitively proved because to do so would take so much time that the universe would experience a Poincaré Recurrence resetting to precisely the state it currently holds down to the arrangement of individual atoms and 10¹²⁰ measuring the desperately unlikely balance of energy needed to allow the universe to exist for more than just a moment to extend beyond the size of a single atom in other words the mystery of our unexpected universe Leading us down the rabbit hole to a deeper understanding of reality Padilla explains how these unusual numbers are the key to understanding such mind boggling phenomena as black holes relativity and the problem of the cosmological constant that the two best and most rigorously tested ways of understanding the universe contradict one another *Fantastic Numbers and Where to Find Them* is a combination of popular and cutting edge science and a lively entertaining and even funny exploration of the most fundamental truths about the universe

The School of Numbers Emily Hawkins, 2019-03-05. Greetings Cadet! Congratulations on being accepted into the prestigious Astro Academy for math. Now strap on your space boots, secure your helmet, and let's get ready for a mathematical journey like no other. Hop on board the spaceship School of Numbers and head off on an intergalactic mathematical journey that will introduce young readers to key concepts including arithmetic, shapes, fractions, percentages, and sequences. Six eccentric professors will teach budding space mathematicians all there is to know about the world of numbers. Meet Captain Archimedes Brown who keeps everyone in order, Lois Carmen Denominator who's got a passion for fractions, Di-A-meter who's a stickler for geometry, Al-Jabra who loves algebra, Ava Ridge who's looney for statistics, and last but certainly not least, Adam Up who just can't get enough of arithmetic. Float into this gravity-free classroom, prepare yourself for antics aplenty, and get ready to see math in action like never before.

Dr. Mark's Magical Math Mark Biddiss, 2004. Uses brain teasers and engaging activities to help teach young readers intermediate mathematics skills.
