Numbers And Nationhood Writing Statistics In Nineteenth Century Italy:

Numbers and Nationhood Silvana Patriarca,1996-10-03 Numbers and Nationhood explores the rise of statistics as a mode of representation in Italian society during the nineteenth century Silvana Patriarca examines the ideologies that informed numerical productions and the role that statistics played in generating a national image of Italy that nevertheless accentuated its internal territorial divisions This innovative study provides a fresh reading of the historiography of Risorgimento Italy bringing issues of science ideology and representation to the fore A Companion to Nineteenth-Century Europe, 1789 - 1914 Stefan Berger,2008-04-15 This Companion provides an overview of European history during the long nineteenth century from 1789 to 1914 Consists of 32 chapters written by leading international scholars Balances coverage of political diplomatic and international history with discussion of economic social and cultural concerns Covers both Eastern and Western European states including Britain Pays considerable attention to smaller countries as well as to the great powers Compares particular phenomena and developments across Europe **Italy's 'Southern Question'** Jane Schneider,2020-05-31 The Southern Question has been a major topic in Italian political economic and cultural life for a century and more During the Cold War it was the justification for heavy government intervention In contemporary Italy a major part of the appeal of the Lombard League has been its promise to dissociate the South from the North even to the point of secession The South also remains a resonant theme in Italian literature This interdisciplinary book endeavours to answer the following When did people begin to think of the South as a problem Who intellectuals statisticians criminologists political exiles novelists among them some important southerners contributed to the discourse about the South and why Did their view of the South correspond to any sort of reality What was glossed over or ignored in the generalized vision of the South as problematic What consequences has the Question had in controlling the imaginations and actions of intellectuals and those with political and other forms of power What alternative formulations might people create and live by if they were able to escape from the control of the Question and to imagine the political economic and cultural differences within Italy in some other way This timely book reveals how Southern Italians have been affected by distorted versions of a complex reality similar to the discourse of Orientalism In situating the devaluation of Southern Italian culture in relation to the recent emergence of anti mafia ideology in the South and the threat posed to national unity by the Lombard League it also illuminates the world s stiff inter regional competition for investment capital *Rule by Numbers* U. Kalpagam,2014-08-20 This book examines aspects of the production of statistical knowledge as part of colonial governance in India using Foucault s ideas of governmentality The modern state is distinctive for its bureaucratic organization official procedures and accountability that in the colonial context of governing at a distance instituted a vast system of recordation bearing semblance to and yet differing markedly from the Victorian administrative state The colonial rule of difference that shaped liberal governmentality introduced new categories of rule that were nested in the procedures and records and could be

unraveled from the archive of colonial governance Such an exercise is attempted here for certain key epistemic categories such as space time measurement classification and causality that have enabled the constitution of modern knowledge and the social scientific discourses of economy society and history The different chapters engage with how enumerative technologies of rule led to proliferating measurements and classifications as fields and objects came within the purview of modern governance rendering both statistical knowledge and also new ways of acting on objects and new discourses of governance and the nation The postcolonial implications of colonial governmentality are examined with respect to both planning techniques for attainment of justice and the role of information in the constitution of neoliberal subjects

Empire of Nations Francine Hirsch, 2014-11-15 When the Bolsheviks seized power in 1917 they set themselves the task of building socialism in the vast landscape of the former Russian Empire a territory populated by hundreds of different peoples belonging to a multitude of linguistic religious and ethnic groups Before 1917 the Bolsheviks had called for the national self determination of all peoples and had condemned all forms of colonization as exploitative After attaining power however they began to express concern that it would not be possible for Soviet Russia to survive without the cotton of Turkestan and the oil of the Caucasus In an effort to reconcile their anti imperialist position with their desire to hold on to as much territory as possible the Bolsheviks integrated the national idea into the administrative territorial structure of the new Soviet state In *Empire of Nations* Francine Hirsch examines the ways in which former imperial ethnographers and local elites provided the Bolsheviks with ethnographic knowledge that shaped the very formation of the new Soviet Union The ethnographers who drew inspiration from the Western European colonial context produced all union censuses assisted government commissions charged with delimiting the USSR's internal borders led expeditions to study the human being as a productive force and created ethnographic exhibits about the Peoples of the USSR In the 1930s they would lead the Soviet campaign against Nazi race theories Hirsch illuminates the pervasive tension between the colonial economic and ethnographic definitions of Soviet territory this tension informed Soviet social economic and administrative structures A major contribution to the history of Russia and the Soviet Union *Empire of Nations* also offers new insights into the connection between ethnography and empire

La Mamma Penelope Morris, Perry Willson, 2018-06-07 The idea of the *mamma italiana* is one of the most widespread and recognizable stereotypes in perceptions of Italian national character both within and beyond Italy This figure makes frequent appearances in jokes and other forms of popular culture but it has also been seen as shaping the lived experience of modern day Italians of both sexes as well as influencing perceptions of Italy in the wider world This interdisciplinary collection examines the invented tradition of *mammismo* but also contextualizes it by discussing other often contrasting ways in which the role of mothers and the mother son relationship have been understood and represented in culture and society over the last century and a half both in Italy and in its diaspora

The Cost of Living in America, 1800-1980 John A. Garraty, 1981 Prices constantly move up and down in response to changes in the supply of and demand for goods But they are

also affected by the amount of money and credit that consumers can command **The Invention of Sustainability** Paul Warde, 2018-07-12 The issue of sustainability and the idea that economic growth and development might destroy its own foundations is one of the defining political problems of our era This groundbreaking study traces the emergence of this idea and demonstrates how sustainability was closely linked to hopes for growth and the destiny of expanding European states from the sixteenth century Weaving together aspirations for power for economic development and agricultural improvement and ideas about forestry climate the sciences of the soil and of life itself this book sets out how new knowledge and metrics led people to imagine both new horizons for progress but also the possibility of collapse In the nineteenth century anxieties about sustainability often driven by science proliferated in debates about contemporary and historical empires and the American frontier The fear of progress undoing itself confronted society with finding ways to live with and manage nature

Living the Revolution Jennifer Guglielmo, 2010-05-03 Italians were the largest group of immigrants to the United States at the turn of the twentieth century and hundreds of thousands led and participated in some of the period's most volatile labor strikes Jennifer Guglielmo brings to life the Italian working class women of New York and New Jersey who helped shape the vibrant radical political culture that expanded into the emerging industrial union movement Tracing two generations of women who worked in the needle and textile trades she explores the ways immigrant women and their American born daughters drew on Italian traditions of protest to form new urban female networks of everyday resistance and political activism She also shows how their commitment to revolutionary and transnational social movements diminished as they became white working class Americans **State-Making in an Age of Revolution, 1830-1880** Christos

Aliprantis, Anna Ross, 2025-07-02 How did states expand in the mid nineteenth century While scholars now associate the period after the 1848 revolutions with a striking increase in state activity few have demonstrated how new state building measures were put into practice From France to Hungary and Scandinavia to Spain State Making in An Age of Revolution shows how officials went about implementing reform With original contributions grounded in extensive archival research this volume casts light on the scale at which officials relied on elites professionals and technical experts both inside and outside of government and even from outside their own states to carry out their expanding work Together these findings help us to re think the reach and nature of growing states during these pivotal decades of change **The Cultural Production of Social**

Movements Robert F. Carley, 2023-06-12 The Cultural Production of Social Movements offers a theory of cultural practices protest tactics strategic planning and deliberation and movement organizational structures ideological contention It is a theory of ideology from below The Cultural Production of Social Movements shows how conflicts both with external political forces and disagreements dissensus and the decision making process internal to social movements produce knowledge and meanings that in turn impact upon and change the practices that contribute to how social movements are structured and organized The Cultural Production of Social Movements theorizes the relationship between consciously held superordinate

ideas the changing composition of progressive and oppositional social struggles and the social worlds they hope to inhabit Analyzing the Black Panther Party specifically Kathleen Cleaver's break with the Student Non violent Coordinating Committee and her contributions to the Party Operaismo or Workerism in Italy and the relationship between shifting organizational strategies inventive tactics and novel and expansive ways to theorize class struggles and the communal composition of Worker Recovered Enterprise Movements in contemporary Argentina this book shows how movement ideologies change and how meanings structure organizations mobilizations and futures In *The Cultural Production of Social Movements* ideology is neither a static set of principles nor is an unconscious orientation towards power and governance Rather it is the contentious democratizing and deliberative processes which become realized as tactics in protests struggles defeats and victories that makes the relationship between movements and what they mean conscious to its participants

Gender, Mediation, and Popular Education in Venice, 1760-1830 Susan Dalton, 2023-10-11 *Gender Mediation and Popular Education in Venice 1760 1830* examines how women with enough cultural capital could turn their identity as representatives of the public those on the receiving end of education to their advantage producing knowledge under the guise of relaying it Author Susan Dalton demonstrates how elite women turned their reputation for ignorance into an opportunity to establish themselves as published authors at the dawn of the nineteenth century in Venice Many literary figures saw women as a group in need of education By deploying essentialist understandings of femininity whereby women possessed superior moral virtue but deficient rationality these women entered the world of print as cultural mediators identified by contemporaries as key players in the social projects of public education and moral edification central to the European Enlightenment Focussing on Isabella Teotochi Albrizzi and Giustina Renier Michiel both renowned Venetian authors Dalton introduces two well known Italian women of letters to English speaking scholars re evaluates the impact of their writing in Italy and raises questions about female authorship across Europe broadens our conceptions of gender norms and enriches our knowledge of a little known period of women's writing in Italy This volume is an essential resource for students and scholars alike interested in women's and gender history early modern history and social and cultural history

Mussolini's National Project in Argentina David Aliano, 2012-08-31 During the 1920s and 1930s Mussolini's fascist regime attempted to promote fascist Italy's national project in Argentina bombarding the republic with its propaganda Although politically a failure this propaganda provoked a debate over the idea of a national identity outside the nation state and the potential roles that citizens living abroad could play in their country of origin In propagating an Italian national identity within another sovereign state Mussolini's initiative also inspired heated debate among native Argentines over their own national project as a nation of immigrants Using the experiences of Mussolini's efforts in Argentina as its case study this book demonstrates how national projects take on different meanings once they enter a contested public space It details how both members of the Italian community as well as native Argentines reshaped Italy's national discourse from abroad by

entangling it with Argentina's own national project In exploring the way in which nations are imagined constructed and recast both from above as well as from below Mussolini's National Project in Argentina offers new perspectives on the politics of identity formation while providing a transatlantic example of the dynamic interplay between the Italian state and its emigrant communities It is in short a transnational perspective on what it means to belong to a nation Handbook on Sport and Culture Vassil Girginov, Katerina Girginova, 2025-10-07 This Handbook adopts an intercultural perspective to present the first systematic analysis of the relationship between culture and sport The Handbook is structured around an innovative analytical framework comprising the seven key dimensions of the culture sport nexus integrating the meanings and structures of sport with the interpretation of culture Race in Post-Fascist Italy Silvana Patriarca, 2022-02-03 Explores the untold stories of biracial children born to Italian women and Black Allied soldiers in the aftermath of World War Two
