Introduction to Numerical Control, Hearing Before the Subcommittee on Science and Technology ... 92-1, June 24, and July 26, 1971 United States. Congress. Senate. Select Committee on Small Business,1971 Introduction to Numerical Control United States. Congress. Senate. Select Committee on Small Business. Subcommittee on Science and Technology,1971 **Numerical Control Part Programming** James J. Childs,1973 Develops the subject to include detailed treatment of how to write both manual point to point and manual and computer assisted APT continuous path programs Presents each topic in a logical and clear manner Places heavy emphasis on concepts and terminology **Guide to the Evaluation of Educational Experiences in the Armed Services** American Council on Education,1978 **Logic and Programming** Michel. Parent,2013-06-29 In contrast to the effortless ease with which human beings control their limbs the design of controllers for robotic manipulator arms is a detailed meticulous business Motors controlling the arms need to be

started and stopped at just the right moment so that the performance demanded by the user may be achieved at the end of a complicated manoeuvre And yet the same user wishes to express the task for the robot in the simplest possible terms without reference to the minute details of control sequences that his task demands It is the design of such interfaces between man and machine that is the subject of this volume Parent and Lauryeau develop the subject in a direct and logical order They first explain the principles of maximal effort control which not only ensure that motors are driven to provide high accuracy but also that this should be done with the least waste of energy and in the shortest possible time In this context they describe the operation of pneumatic logical devices that make rapid decisions at power levels that exceed by several orders those that can be achieved with electronic devices They achieve this whilst keeping the reader aware of the logical principles that are involved in the design of master control units the devices responsible for appropriate actions being taken as a function of time
