Clarke,2017-07-05 First published in 1975 this book compiles a number of studies concerning institutional care and children which address the question of why institutions that serve apparently similar functions differ so much The book uses comparative methods such as measurement of different dimensions of institutional care and analysis of interrelationships among specific structural and functional features which characterise particular institutions As a result the book draws broad conclusions about the importance of factors that have dynamic influence on the manner in which institutions function and the reasons why they differ The editors reject the steampress model which postulates that institutions are more or less alike They discuss ideological and organisational variation differences in staffing and the manner in which children respond to them and consider these issues as factors that influence the way in which an institution functions as a whole Subsequent chapters describe comparative studies carried out in institutions for the mentally handicapped approved schools residential nurseries probation hostels other correctional institutions and units for autistic children The book enables the reader to appreciate achievements and shortcomings of contemporary research and thinking in this field **Report of the Illinois State Entomologist Concerning Operations Under the Horticultural Inspection Act** Illinois State Entomologist,1900 *A Mother's Job* Elizabeth Rose,1999-01-14 Americans today live with conflicting ideas about day care We criticize mothers who choose not to stay at home but we pressure women on welfare to leave their children behind We recognize the benefits of early childhood education but do not provide it as a public right until children enter kindergarten Our children are priceless

but we pay minimum wages to the overwhelmingly female workforce which cares for them We are not really sure if day care is detrimental or beneficial for children or if mothers should really be in the workforce To better understand how we have arrived at these present day dilemmas Elizabeth Rose argues we need to explore day care s past *A Mother s Job* is the first book to offer such an exploration In this case study of Philadelphia Rose examines the different meanings of day care for families and providers from the late nineteenth century through the postwar prosperity of the 1950s Drawing on richly detailed records created by social workers she explores changing attitudes about motherhood charity and children s needs How did day care change from a charity for poor single mothers at the turn of the century into a recognized need of ordinary families by 1960 This book traces that transformation telling the story of day care from the changing perspectives of the families who used it and the philanthropists and social workers who administered it We see day care through the eyes of the immigrants whites and blacks who relied upon day care service as well as through those of the professionals who provided it This volume will appeal to anyone interested in understanding the roots of our current day care crisis as well as the broader issues of education welfare and women s work all issues in which the key questions of day care are enmeshed Students of social history women s history welfare policy childcare and education will also encounter much valuable information in this well written book
