## **Nurses Manual Of Laboratory Tests And Diagnostic Procedures:**

**Nurse's Manual of Laboratory Tests and Diagnostic Procedures** Louise M. Malarkey, Mary Ellen McMorrow, 1996  
This exceptionally comprehensive text makes it easy to find the information you need on the full range of laboratory tests and diagnostic procedures encountered in nursing. A body system organization affords you a more user friendly alternative to the alphabetical and laboratory area approaches used in other references. A consistent presentation offers convenient referral to background information, the significance of normal/abnormal test results and appropriate nursing care of the patient for each test and procedure. Quality control guidelines address procedural issues that affect the accuracy of test results. Normal values are highlighted in special boxes for easy identification. For each test and procedure, these values are listed in both conventional measures and Systeme International (SI) units. Where relevant, these values provide variations for gender and age, including children and older adults. Unique potential complications tables address complications and related nursing assessments for more complex procedures like cardiac catheterization and liver biopsy. Critical thinking margin notes call your attention to the individuality of patients and the specific issues and nursing care considerations that apply to each situation. Outstanding two-color artwork vividly illustrates all concepts and techniques. From the basics such as CBC, urinalysis and CT scans to more complex procedures used in specialty areas including ERCP, cardiocentesis, cardiac stress tests and endocrine tests, you'll know exactly what to do and what the results mean.

*Saunders Nursing Guide to Laboratory and Diagnostic Tests* Louise M. Malarkey, Mary Ellen McMorrow, 2012  
This complete lab book contains the latest information on testing, organized alphabetically for quick reference. It is both student friendly and provides great information for practicing nurses. Significance of Test Results sections list the diseases and disorders that are associated with abnormal findings and Test Result Indications sections list the possible clinical significance of abnormal findings. Tests are presented in a format that emphasizes the nurse's role and includes Basics, the Nurse Needs to Know and Nursing Care. The clinical purpose of each test is identified and how each test is performed is clearly explained. A pronunciation guide for the name of each test helps with difficult terminology.

**Nurse's Manual of Laboratory Tests and Diagnostic Procedures** Louise M. Malarkey, Mary Ellen McMorrow, 2000  
This comprehensive text and reference provides essential guidance on over 700 laboratory tests and diagnostic procedures used in nursing. It provides background information on each test, explains normal and abnormal test results and emphasizes nursing care for the patient undergoing the test. Normal values for each test and procedure appear in both conventional and international units and cover all phases of the life span. And over 120 unique tables display complications at a glance.

**Laboratory and Diagnostic Tests** Mary Ellen McMorrow, Louise M. Malarkey, 1998
