Nurses Work The Sacred And The Profane:

Nurses' Work Zane Robinson Wolf, 1988 Based on a doctoral dissertation Nursing rituals in an adult acute care hospital and ethnography Preface *Anthropology of Nursing* Karen Holland, 2019-09-09 This book aims to introduce nurses and other healthcare professionals to how anthropology can help them understand nursing as a profession and as a culture Drawing on key anthropological concepts the book facilitates the understanding and critical consideration of nursing practice as seen across a wide range of health care contexts and which impacts the delivery of appropriate care for service users Considering the fields in which nurses work the book argues that in order for nurses to optimize their roles as deliverers of patient care they must not only engage with the realities of the cultural world of the patient but also that of their own multi professional cultural environment The only book currently in the field on anthropology of nursing this book will be a valuable resource for nursing students at all academic levels especially where they can pursue specific modules in the subject as well as those other students pursuing medical anthropology courses As well as this it will be an essential text for those post graduate students who wish to consider alternative world views from anthropology and their application in nursing and healthcare in addition to their undertaking ethnographic research to explore nursing in all its fields of practice Devices & Desires Margarete Sandelowski, 2000 The author traces the relationship between nursing and technology from the 1870s to the present She argues that while technology has helped shape and intensify persistent dilemmas in nursing it has also both advanced and impeded the development of the nursing profession The Palgrave Handbook of Learning for Transformation Aliko Nicolaides, Saskia Eschenbacher, Petra T. Buergelt, Yabome Gilpin-Jackson, Marguerite Welch, Mitsunori Misawa, 2022-01-24 This handbook offers an expanded discourse on transformative learning by making the turn into new passageways to explore the phenomenon of transformation It curates diverse discourses knowledges and practices of transformation in ways that both includes and departs from the adult learning mainstay of transformative learning and adult education The purpose of this handbook is not to resolve or unify a theory of transformation and all the disciplinary contributions that clearly promote a living concept of transformation Instead the intent is to catalyze a more complex and deeper inquiry into the Why of transformation Each discipline culture ethics and practice has its own specialized care and reasons for paying attention to transformation How can scholars practitioners and active members of discourses on transformative learning make a difference How can they foster and create conditions that allow us to move on to other unaddressed or understudied questions To answer these questions the editors and their authors employ the metaphor of the many turns into passageways to convey the potential of transformation that may emerge from the many connecting passageways between for instance people and society theory and practice knowledge created by diverse disciplines and fields professions individual and collective transformations and individual and social action **Exploring Rituals in Nursing** Zane Robinson Wolf, 2013-07-15 Awarded first place in the 2013 AJN Book of the Year Awards in the History and Public
