International Issues in Nursing Research Shirley M. Stinson, Janet C. Ross-Kerr, 2025-09-17 Originally published in 1986 this book presents a review of specific international themes in nursing research particularly methodological issues policy and funding issues preparation for nursing research and other perspectives such as publication and the role of professional associations in nursing research development In the past geographical political cultural educational and economic barriers all contributed to insularity in nursing but the authors maintain that there are many common problems and the profession can benefit greatly by an exchange of ideas The chapters were written by leading authorities in the UK USA and Canada and the book will be of use to student and practising nurses

Using Knowledge and Evidence in Health Care François Champagne, Louise Lemieux-Charles, 2008-05-24 At the clinical management and policy levels the use of knowledge and evidence in health care has become a worldwide priority The contributors to Using Knowledge and Evidence in Health Care seek to broaden our understanding of the complexity involved in health care decision making by integrating social science knowledge and exploring some of the challenges and limits of evidence in different health care contexts Louise Lemieux Charles and François Champagne have brought together an esteemed group of scholars to provide a conceptual framework that illustrates the factors critical to analysing and optimizing the use of knowledge and evidence Previous studies have focused primarily on the medical literature without acknowledging the social sciences tradition With its integration of works from political science public policy informatics and other disciplines Using Knowledge and Evidence in Health Care provides a bridge between both worlds By bringing together different views on the topic the volume goes beyond strict disciplinary boundaries to provide the fullest exploration of knowledge and evidence in health care
