**Food and nutrition security in transforming Ghana: A descriptive analysis of national trends and regional patterns** Van Asselt, Joanna, Ecker, Olivier, 2017-06-16 In recent decades Ghana has experienced high economic growth and transformation which contributed to the nation achieving the Millennium Development Goal targets on reducing extreme poverty and hunger Against this background and in view of achieving the food and nutrition security targets of the Sustainable Development Goals Ghana started a process of reviewing its food security and nutrition strategies and policies including the overarching Zero Hunger Strategy This discussion paper aims to contribute to this process by providing an update on the state of Ghana's food and nutrition security In addition to providing an overview of long term historical trends at the national level this analysis provides an overview of regional patterns of food and nutrition insecurity and recent changes across Ghana's 10 administrative regions Finally the analysis identifies regional hot spots of food and nutrition insecurity This paper confirms that Ghana has achieved substantial improvements in food and nutrition security overall especially over the past decade Nationwide progress has been made in improving households economic access to food by reducing poverty and extreme poverty and in reducing chronic and acute child undernutrition However progress in reducing micronutrient malnutrition particularly anemia and especially among young children has been more modest Across Ghana large rural urban gaps and regional differences mainly between the north and the south remain for most dimensions of food and nutrition security In addition Ghana is increasingly facing new nutrition related public health problems that result from overnutrition and diets too rich in calories Overweight and obesity among adults are rising rapidly in both urban and rural areas leading to an increase in the risk of noncommunicable diseases The rising double burden of malnutrition that is the coexistence of overnutrition and undernutrition including micronutrient deficiencies constitutes a challenge to public health and social protection policy These new nutritional realities may make some existing food and nutrition security policies obsolete or even detrimental to nutrition security

*Adequate Food for All* Wilson G. Pond, Buford L. Nichols, Dan L. Brown, 2009-02-12 Food is the sustenance of life But while we understand that a secure supply of food has been affected by many factors over the course of history we do not often allow ourselves to entertain the idea that a lack of adequate food worldwide is a very real and dangerous possibility While soil degradation water distribution climate change populati

*Nutrition and economic development* Ecker, Olivier, Al-Riffai,

Perrihan, Breisinger, Clemens, El-Batrawy, Rawia, 2016-11-15 This book's main hypothesis is that Egypt's large food subsidy system has been ineffective in reducing undernutrition in fact it may have contributed to sustaining and even aggravating both nutrition challenges For a long time the subsidy system provided only calorie rich foods at very low and constant prices and with quotas much above dietary recommendations This system has created incentives to consume calorie overladen and unbalanced diets increasing the risks of child and maternal overnutrition and at high subsidy levels the risk of inadequate child nutrition Moreover the large public budget allocated to the food subsidies is unavailable for possibly more nutrition beneficial spending such as for child and maternal nutrition specific interventions The authors findings consistently suggest that in addition to the well known economic rationale for reforming the Egyptian food subsidy system there are strong reasons to reform food subsidies due to nutrition and public health concerns A fundamental food subsidy reform process has been under way since June 2014 The already implemented changes can be expected to have reduced some incentives for overconsumption and may have positive dietary effects However further major reform efforts are needed to transform the current subsidy system into a key policy instrument in the fight against malnutrition The findings of this book should be valuable to policy makers analysts development partners and others concerned with improving food security and promoting healthy nutrition in Egypt and other developing countries with large social protection programs Food, Diet and Obesity D Mela, 2005-10-14 The global obesity epidemic is arguably the most serious health issue facing the food industry today Food manufacturers are under increasing pressure over both the degree to which they are seen as contributing to the problem and the role they should play in solving it Drawing on the expertise of many of the world's leading experts in this area Food diet and obesity summarises the key research on the links between obesity and diet Topics discussed include trends in obesity the evidence behind popular diets and meal replacers the effectiveness of fat and sugar replacers in food emerging issues such as the value of the glycemic index protein content and calcium in weight control and potential functional food targets and ingredients for weight control After an introductory chapter on global trends in obesity part one looks at the range of contributing factors to obesity from nutrient gene interactions energy metabolism and physical activity to sensory responses to food portion size and the psychology of overeating Part two looks at macronutrients and their role in weight gain or loss with chapters on topics such as energy density dietary fat carbohydrates protein and dietary fibre The final part of the book discusses issues in developing effective strategies for weight control from gaining consumer acceptance of weight control food products through functional food ingredients to community based public health approaches in preventing obesity With its distinguished editor and contributors Food diet and obesity is a standard work for health professionals nutritionists and R D staff throughout the food industry as well as all those concerned with understanding and reducing obesity Summarises key research which links diet and obesity Trends in obesity are examined Contributory factors to obesity are investigated including lifestyle and genetics Evolving Human Nutrition Stanley J. *Geographies of Obesity* Karen Witten, 2016-04-15 Over the past two decades rates of adult and childhood obesity in the developed world have risen sharply By the year 2000 65% of the United States population were overweight 30% of these obese Whilst medical treatment has tended to focus on individual habits of diet and exercise this approach does little to account for globally increasing levels of obesity and the external environmental factors that may be responsible This in depth study assembles the evidence for a geographical explanation of current obesity trends and is the first work to examine the ways in which environment and living conditions promote an imbalance of energy intake over energy expenditure The book calls upon the expertise of geographers nutritionists epidemiologists sociologists and public health researchers resulting in a broad multidisciplinary analysis of this important health issue Cover graphic designed by Georgia Witten Sage

*The Way We Eat Now* Bee Wilson, 2019-05-07 An award winning food writer takes us on a global tour of what the world eats and shows us how we can change it for the better Food is one of life s great joys So why has eating become such a source of anxiety and confusion Bee Wilson shows that in two generations the world has undergone a massive shift from traditional limited diets to more globalized ways of eating from bubble tea to quinoa from Soylent to meal kits Paradoxically our diets are getting healthier and less healthy at the same time For some there has never been a happier food era than today a time of unusual herbs farmers markets and internet recipe swaps Yet modern food also kills diabetes and heart disease are on the rise everywhere on earth This is a book about the good the terrible and the avocado toast A riveting exploration of the hidden forces behind what we eat *The Way We Eat Now* explains how this food revolution has transformed our bodies our social lives and the world we live in

*Handbook of Pediatric Obesity* Michael I. Goran, Melinda S. Sothorn, 2016-04-19 Understanding the numerous factors involved with body weight regulation and identifying interventions to prevent or treat the problem is an enormous task in and of itself Addressing this issue in growing children is further complicated by the diverse challenges specific to children Because of this the field of childhood obesity is both extremely
