Hmong American Concepts of Health, Healing, and Conventional Medicine Dia Cha, 2003 America s healthcare system in the twenty first century faces a variety of pressures and challenges not the least of which is that posed by the increasingly multicultural nature of American society itself Large numbers among the Hmong immigrants from the landlocked Asian nation of Laos continue to prefer their own ancient medical traditions That these Hmong Americans should continue to adhere to a tradition of folk medicine rather than embrace the modern healthcare system of America poses questions that must be answered This book takes up the task of examining Hmong American concepts of health illness and healing and looks at the Hmong American experience with conventional medicine In so doing it identifies factors that either obstruct or enable healthcare delivery to the Hmong specifically a target sample of Hmong Americans resident in Colorado Drawing upon scientific methods of data collection the research reveals attitudes currently held by a group of American citizens toward health and medicine which run the gamut from the very modern to those which have prevailed in the highlands of Southeast Asia for centuries
