Prosody Models And Measurements:

Prosody: Models and Measurements A. Cutler, D.R. Ladd, 2013-03-07 Prosody Models and Measurements is the fruit of a three day workshop held in Paris in April 1982 The workshop was one of a series which is sponsored by the Maison des Sciences de l'Homme under the auspices of the European Psycholinguistics Association and which aims to bring together workers in a particular field from different European laboratories and to encourage future collaboration across regional national and disciplinary boundaries Thus the topic of the workshop Prosody was fairly liberally interpreted in the invitations and the participants were drawn from a variety of background linguistics phonetics psychology Despite this diversity however there was a surprising degree of congruence in the topics discussed and points of view adopted We have attempted in the introduction to the present volume to as well as to account for the draw out the similarities between approaches differences and to set the individual contributions against the background of current research in the field The book is not merely a transcript of what was said during the sessions All of the papers have been rewritten by the participants in some cases extensively to reflect the comments that were made in discussion and the points of contact and disagreement that became evident during the three days

Explorations in Cognitive Neuropsychology Alan Parkin, 2016-03-23 Cognitive

neuropsychology has now established a major place in the teaching of undergraduate psychology degrees and is an important topic of postgraduate research. The subject is also of increasing interest to clinicians because of its links with devising remediation procedures for people with brain injury. *Explorations in Cognitive Neuropsychology* is the first major text to appear on this topic since the late 1980s and thus introduces the reader to a vast amount of research previously unavailable in textbook format. The book is written in a lively and engaging style which nonetheless enables the reader to get a scholarly in depth overview of this important field. The coverage of topics is very broad ranging. It begins with an overview of the subject including issues such as research strategy and advances in neuroimaging. Following this are chapters on blindsight, agnosia, facial processing impairments and the rapidly growing area of neglect. The next chapter is devoted to studies of the split brain. Two chapters then cover the enormous developments in devising functional architectures of the language system from the observation of discrete language impairments. Various aspects of memory impairments are then discussed and the book ends with a consideration of frontal lobe functions. At various points the book also covers the contribution of connectionist modelling to cognitive neuropsychology.
